## Allianz Life Insurance Malaysia Berhad

Company No. 198301008983 (104248-X)  
(Incorporated in Malaysia)

### Directors' report for the financial year ended 31 December 2021

The Directors have pleasure in submitting their report and the audited financial statements of the Company for the financial year ended 31 December 2021.

#### Principal activities

The Company is principally engaged in the underwriting of life insurance and investment-linked business. There has been no significant change in the nature of these activities during the financial year.

#### Results

	<b>RM'000</b>
Net profit for the financial year	<u>149,449</u>

#### Dividend

Since the end of the previous financial year, the Company paid a single tier interim dividend of 12.6 sen per ordinary share totalling RM29,811,600.00 in respect of the financial year ended 31 December 2020 on 19 January 2021.

The Directors have not recommended any final dividend to be paid for the financial year under review.

#### Reserves and provisions

There were no material transfers to or from reserves and provisions during the financial year under review except as disclosed in the financial statements.

#### Life insurance liabilities

Before the financial statements of the Company were made out, the Directors took reasonable steps to ascertain that the life insurance liabilities are adequate in accordance with the valuation methods specified in Part D of the Risk-Based Capital Framework issued by Bank Negara Malaysia ("BNM").

## **Bad and doubtful debts**

Before the financial statements of the Company were made out, the Directors took reasonable steps to ascertain that actions had been taken in relation to the writing off of bad debts and the making of provision for doubtful debts and satisfied themselves that all known bad debts had been written off and that adequate provision had been made for doubtful debts.

At the date of this report, the Directors are not aware of any circumstances that would render the amount written off for bad debts or the amount of the provision for doubtful debts in the financial statements of the Company inadequate to any substantial extent.

## **Current assets**

Before the financial statements of the Company were made out, the Directors took reasonable steps to ascertain that any current assets other than debts, which were unlikely to be realised in the ordinary course of business, their values as shown in the financial statements of the Company, have been written down to an amount which they might be expected to realise.

At the date of this report, the Directors are not aware of any circumstances that would render the value attributed to the current assets in the financial statements of the Company misleading.

## **Valuation methods**

At the date of this report, the Directors are not aware of any circumstances which have arisen which render adherence to the existing method of valuation of assets or liabilities in the financial statements of the Company misleading or inappropriate.

## **Contingent and other liabilities**

At the date of this report, there does not exist:-

- (i) any charge on the assets of the Company that has arisen since the end of the financial year and which secures the liabilities of any other person; or
- (ii) any contingent liability in respect of the Company that has arisen since the end of the financial year.

No contingent liability or other liability of the Company has become enforceable, or is likely to become enforceable within the period of twelve months after the end of the financial year which, in the opinion of the Directors, will or may substantially affect the ability of the Company to meet its obligations as and when they fall due.

For the purpose of the above paragraphs, contingent liability and other liability do not include liabilities arising from contracts of insurance underwritten in the ordinary course of business of the Company.

Company No. 198301008983 (104248-X)
-------------------------------------

## **Change of circumstances**

At the date of this report, the Directors are not aware of any circumstances not otherwise dealt with in this report or the financial statements of the Company that would render any amount stated in the financial statements of the Company misleading.

## **Items of an unusual nature**

In the opinion of the Directors, the results of operations of the Company for the financial year ended 31 December 2021 have not been substantially affected by any item, transaction or event of a material and unusual nature nor has any such item, transaction or event occurred in the interval between the end of the financial year and the date of this report.

## **Issue of shares**

There were no changes in the issued share capital of the Company during the financial year.

## **Options granted over unissued shares**

No options were granted to any person to take up unissued shares of the Company during the financial year.

## **Indemnity and insurance costs**

The Company maintains a Directors' and Officers' Liability Insurance for the purpose of Section 289(5) of the Companies Act 2016 in Malaysia, throughout the year, which provides appropriate insurance cover for the Directors and Officers of the Company. The amount of insurance premium paid during the financial year amounted to RM40,589.

There was no indemnity given to, or insurance effected for auditors of the Company in respect of the liability for any act or omission in their capacity as auditors during the financial year.

To the extent permitted by law, the Company has agreed to indemnify its auditors as part of the terms of non-audit engagement against claims by third parties arising from the non-audit engagement. No payment has been made to indemnify the auditor during the financial year.

Company No. 198301008983 (104248-X)
-------------------------------------

## Directors of the Company

The Directors of the Company who served during the financial year and during the period from the end of the financial year to the date of this report are:-

Goh Ching Yin (Chairman - Independent Non-Executive Director)  
 Peter Ho Kok Wai (Independent Non-Executive Director)  
 Dato' Dr. Kantha A/L Rasalingam (Independent Non-Executive Director)  
 Lim Fen Nee (Independent Non-Executive Director) (Appointed on 1 June 2021)  
 Joseph Kumar Gross (Non-Independent Executive Director) (Appointed on 21 January 2022)  
 Anusha A/P Thavarajah (Non-Independent Executive Director) (Resigned on 21 January 2022)

## Directors' interests

The Directors of the Company do not hold any shares in the Company as the Company is a wholly-owned subsidiary of Allianz Malaysia Berhad ("AMB"). The interests and deemed interests in the shares of AMB and of its related corporations (other than wholly-owned subsidiaries) of those who were Directors at year end (including the interest of the spouses or children of the Directors who themselves are not Directors of the Company) as recorded in the Register of Directors' Shareholdings are as follows:

Ultimate Holding Company, Allianz SE Anusha A/P Thavarajah	Number of registered shares			As at 31.12.2021
	As at 1.1.2021	Bought	Sold	
- Direct Interest	92,785 <sup>(a)</sup>	-	-	92,785
- Direct Interest	1 <sup>(b)</sup>	-	-	1

Note:

<sup>(a)</sup> Shares acquired by way of exercise of Employees Share Purchase Plan

<sup>(b)</sup> Free share granted under Allianz Free Share Program

Save as disclosed above, none of the other Directors holding office at 31 December 2021 had any interest in the shares of the Company and of its related corporations during the financial year.

## Directors' benefits

Since the end of the previous financial year, no Director of the Company has received nor become entitled to receive any benefit (other than those fees and other benefits included in the aggregate amount of remuneration received or due and receivable by Directors as disclosed in Note 25 (b) in the financial statements or the fixed salary of a full time employee of the Company or of related corporations) by reason of a contract made by the Company or a related corporation with the Director or with a firm of which the Director is a member, or with a company in which the Director has a substantial financial interest.

There were no arrangements during and at the end of the financial year which had the objective of enabling Directors of the Company to acquire benefits by means of the acquisition of shares in or debentures of the Company or any other body corporate.

## Corporate governance disclosures

### A. Board of Directors

The Board of Directors ("Board") has overall responsibility for reviewing and adopting strategic plans for the Company, overseeing the conduct of business of the Company, implementing an appropriate system of risk management and ensuring the adequacy and integrity of the Company's internal control system.

The detailed responsibilities of the Board are set out in the Board Charter, which is available at Allianz Malaysia's website, [allianz.com.my](http://allianz.com.my).

#### A1. Composition of the Board

The Board is made up of 4 Independent Non-Executive Directors and 1 Non-Independent Executive Director.

The Board comprises members from various fields with a balance of skills and experiences appropriate to the business of the Company.

All members of the Board complied with the minimum criteria of "A Fit and Proper Person" as prescribed under the Financial Services Act, 2013 ("FSA 2013").

The appointments and re-appointments of all Board members were approved by BNM.

## **Corporate governance disclosures (continued)**

### **A. Board of Directors (continued)**

#### **A3. Board Committees (continued)**

##### **A3.3. Nomination and Remuneration Committee of AMB Board (“NRC”) (continued)**

The primary objectives of the NRC are:-

- (a) to establish a documented formal and transparent procedure for the appointment and removals of Directors, CEOs and Key Responsible Persons (“KRP(s)”) of AMB Group;
- (b) to assess the effectiveness of individual Director, the respective Boards (including various committees of the Board), CEOs and KRPs of AMB Group on an on-going basis;
- (c) to provide formal and transparent procedure for developing a remuneration policy for Directors, CEOs and KRPs of AMB Group; and
- (d) to ensure that the compensation is competitive and consistent with the culture, objective and strategy of AMB Group.

The detailed terms of reference of the NRC is set out in the Board Charter, which is available at Allianz Malaysia’s website, [allianz.com.my](http://allianz.com.my).

### **B. Internal control framework**

#### **B1. Risk Management Framework**

The Board recognises the importance of having in place a risk management system to identify key risks and implement appropriate controls to manage such risks as an integral part of the Company’s operations. The Company has in place the Group Risk Management Framework Manual (“RMFM”). The RMFM outlines the guiding principles of the risk management approach, structure, roles, responsibilities, accountabilities, reporting requirements as well as the risk identification, evaluation and monitoring process of the Company. It is designed to formalise the risk management functions and practices across the Company and to increase awareness of the Company’s employees to risk identification, measurement, control, on-going monitoring and reporting.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B1. Risk Management Framework (continued)

The RMFM is in compliance with the relevant requirements of the guidelines and/or policies issued by Bank Negara Malaysia (“BNM”) and Allianz SE Group.

The system of risk governance process is integrated into the core management processes and forms part of the daily business process so that a value-added contribution in terms of sustainable competitive advantage and improved business performance can be established. Various standards are implemented by the Company, including organisational structure, risk strategy, written policies, authority limits, system documentation and reporting, to ensure accurate and timely flow of risk-related information and a disciplined approach towards decision making and execution.

The Company also adopts the three lines of defence model where the “first line of defence” rests with the business managers. They are responsible in the first instance for both the risks and returns of their decisions.

The “second line of defence” is made up of the oversight functions comprising Compliance and Risk Management that are independent from business operations.

- The Compliance function assists the Board and Senior Management in managing and mitigating the compliance risks due to any non-compliance of the requirements of the law, regulations as well as regulatory and industry guidelines.
- Risk Management function assists the Board and Senior Management to achieve its strategic goals and objectives by implementing risk management activities and controls across the organisation.

Both the Compliance and Risk Management functions report to the RMC which assists Board to discharge its oversight function effectively. As part of its responsibilities, the Compliance and Risk Management functions advise the Board and Senior Management on compliance, risk and regulatory matters; and promote risk and compliance awareness amongst the Company’s employees through trainings and workshops.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B1. Risk Management Framework (continued)

In addition to the above oversight functions, Legal and Actuarial functions constitute additional components of the “second line of defence”. An appropriate control framework has been established to avoid any potential conflict of interest to fulfil their roles as the second line of defence.

- The Legal function seeks to mitigate legal risks arising from legislative changes, major litigation and disputes, regulatory proceedings and unclear contractual terms.
- The Actuarial function contributes towards assessing and managing risks in line with regulatory requirements and reports to the Board and Senior Management. Its scope of work includes coordination and calculation of technical reserves, providing oversight on product pricing and profitability and contribution to the effective implementation of the risk management system.

The RMC drives the risk management framework of the Company and reports quarterly to the Board on its recommendations and/or decisions. The Risk Management Working Committee (“RMWC”) is established at the Management level and serves as a platform for two-way communication between the Management and the RMC on matters relating to risk strategy and management. Through the quarterly reporting from RMWC, the RMC consolidates the status of the risks and presents them to the Board for consideration.

The Governance and Control Committee (“GovCC”) supports the Management to fulfil its responsibilities with respect to regulatory governance, organisational and control requirements. The GovCC also provides a platform for structured and institutionalised interaction and collaboration on cross functional and control related topics to facilitate a consistent approach in terms of processes, methodologies, assessments, materiality and others. GovCC members consist of senior management from governance and operation functions. The GovCC reports to the Senior Management Committee on governance and internal control system related matters.

## Corporate governance disclosures (continued)

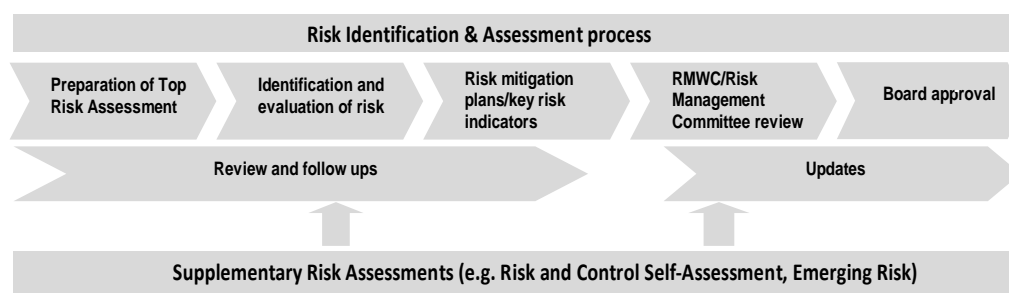

### B. Internal control framework (continued)

#### B1. Risk Management Framework (continued)

##### Risk Management Process

Risk management is considered and managed as part of the daily process of managing and directing the business. These include the implementation of a limit system, various frameworks, manuals and policies.

Besides the embedded process, the following risk management cycle to identify, assess, mitigate, monitor and report will also be carried out by the Risk Management function together with the respective risk owners: -

##### (i) Top Risk Assessment (“TRA”)

TRA approach is in place to periodically analyse all material quantifiable and non-quantifiable risks including market, credit, underwriting, business, operational, liquidity, reputational and strategic risks.

The Company identifies and remediates significant threats to financial results, operational viability or the delivery of key strategic objectives, regardless of whether they relate to quantifiable or non-quantifiable risks using the approved TRA Matrix. The identified top risks are assessed quarterly by the assigned risk owners; and the same is reviewed by the RMWC and the RMC and approved by the Board. Key risk indicators are also put in place to monitor changes in risk exposure or control effectiveness for the top risks on a quarterly basis. The key risks and their salient points on how the Company manages these risks are set out below:-

#### B1. Risk Management Framework (continued)

##### Risk Management Process (continued)

Key risks	Broad Definition	Risk Management Practices
Information Security	Information security breach losses triggered by both information technology ("IT") and non-IT leading to loss of data confidentiality, loss of data integrity, as well as business disruption and loss of availability of services resulting in legal costs, fines, forensic costs, remediation costs, compensation and/or reputation management costs.	<ul style="list-style-type: none"> <li>• Strict policy and disciplinary action for security breach.</li> <li>• Staff awareness on IT Security and Privacy.</li> <li>• Access Control.</li> <li>• Regular review on User ID access.</li> <li>• Use of virus protection software.</li> <li>• Data Loss Prevention solution.</li> <li>• Conduct of Annual Penetration Testing by independent party to detect possible external and internal vulnerabilities.</li> <li>• IT security controls in place, such as Firewall, Malware Protection and Distributed Denial-of-Service protection.</li> <li>• Privilege Identity Management.</li> <li>• Database encryption.</li> <li>• Privacy Impact Assessment.</li> <li>• Data privacy contractual obligations for Service Providers.</li> </ul>

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B1. Risk Management Framework (continued)

##### Risk Management Process (continued)

##### (ii) Operational Risk Management (“ORM”)

ORM is a continuous process which includes operational risk identification, measurement, quantification, management and monitoring to mitigate the operational loss resulting from inadequate or failed internal processes, people, system or from external events.

ORM is monitored through a combination of the following activities: -

- Integrated Risk and Control System.
- Analysis of actual loss events reported into the Loss Data Capture database.
- Periodic audits by the Internal Audit Department and reviews by Risk Management function.
- Other key risk indicators and feedback from subject matter experts (for example IT Security Officer, Data Privacy Officer, Business Continuity Management Officers, Anti-Fraud and Anti-Corruption Coordinators, as well as respective operation managers).

##### (iii) Reputational Risk Management

All activities within Company can influence its reputation, which is determined by the perceptions and beliefs of its stakeholders. Hence, thorough management of any potential reputational risks is required. Any risks that might have significant impact on the Company will be escalated to Allianz SE.

The Company has adopted Allianz SE Group’s Allianz Standard for Reputational Risk Management which establishes a core set of principles and processes for the management of reputational risks within the Company. The management of direct reputational risks requires balancing the benefits of a given business decision against the potential reputational impacts, taking into account the Company’s reputational risk strategy as well as Environmental, Social and Governance (“ESG”) approach. Indirect reputational risks are managed through the TRA as well as risk and control self-assessment processes, which apply the same reputational risk assessment methodology used for direct reputational risks.

The Corporate Communications function of the Company actively manages the reputational risk by assessing any potential risk arising from media, social media or any transaction relating to pre-defined sensitive areas.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B1. Risk Management Framework (continued)

##### Risk Management Process (continued)

##### (iv) Liquidity Risk Management

Liquidity risk is a consequential risk, i.e. another adverse event has to happen before the Company runs into liquidity issues. On this background, the Company has identified various events that might lead to liquidity shortages. To mitigate this, limits on the cash position have been put in place and closely monitored.

##### (v) Climate Risk Management

Climate risks and opportunities that are emerging today are expected to increase over the mid- and long-term. In acknowledgement of this, and to align with initiatives of BNM and Allianz SE, the Group has set-up a cross-functional Climate Change Working Group that discusses and executes climate-related initiatives as directed by the Local ESG Board. The Local ESG Board, comprising top management, reports to the Board and is tasked with driving ESG, including climate-related matters, as part of business considerations.

ESG-related matters are considered in operational, underwriting and investment decisions. Efforts are undertaken to promote ESG in the Company dealings with the business partners and stakeholders while physical risks such as floods are simulated and considered in both operations and underwriting annually.

In addition, as the Company is operating in insurance business, the following risk evaluation tools are also adopted as part of the Company's risk management framework:-

##### (i) Internal Capital Adequacy Assessment Process ("ICAAP")

ICAAP is an overall process by which the Company adopted to ensure it has adequate capital to meet its capital requirements which reflects its own risk profile on an on-going basis. The formal assessment is conducted at least on an annual basis and its results are reported to the Board.

The review of the ICAAP coincides with the annual planning process and any changes in the strategic directions and business plans of the Company will be updated in its Risk Strategy, and accordingly all risks identified will also be taken into account when computing the Individual Target Capital Level ("ITCL").

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B1. Risk Management Framework (continued)

##### Risk Management Process (continued)

##### (v) Climate Risk Management (continued)

##### (i) Internal Capital Adequacy Assessment Process (“ICAAP”) (continued)

The ITCL is validated by stress testing to ensure that it will still be above the Supervisory Target Capital Level imposed by the regulator even after the occurrence of a severe plausible event demonstrating a focus on balance sheet strength and protection of shareholders’ value. A Capital Management Plan (“CMP”) was drawn up with the objective to optimise risk and return, while maintaining sufficient level of capital in accordance with the Company’s risk appetite and regulatory requirements. The CMP identified the action plans and sources of capital that are available for a pre-determined ITCL thresholds if they are triggered to bring the capital adequacy ratio above the internal soft threshold level.

##### (ii) Stress Testing

Stress test is an effective risk management tool and the Company conducts such stress test regularly. The stress test process is designed based on the Company’s solvency position, lines of business, current position within the market, investment policy, business plan and general economic conditions. The results of the stress test will then be incorporated into the Company’s capital management plan, in determining the extent of capital affected by the threats arising from adverse events and the actions required to mitigate such threats.

The Board and Management participated actively in providing feedback on its stress test results and appropriateness of its methodology and assumptions adopted to perform the stress test.

#### B2. Internal Audit

The Internal Audit function, which reports to the AC, undertakes independent reviews or assessments of the Company’s operations and its system of internal controls. It provides monitoring of the controls and risk management procedures as well as highlights significant risks impacting the Company. The internal audit personnel form the “third line of defence”, are independent from the day-to-day activities of the Company and have unrestricted access to all activities conducted by the Company.

## **Corporate governance disclosures (continued)**

### **B. Internal control framework (continued)**

#### **B2. Internal Audit (continued)**

Internal Audit Plan is developed based on annual risk assessment and approved by the AC. The audit scope covers auditable areas encompassing sales, product development, actuarial function, underwriting and claims operation, operation such as customer service, sourcing and procurement, general services, travel and expenses, internal and regulatory compliance audit such as business continuity management, replacement of policy, anti-corruption program and IT systems.

Internal audit findings are discussed at management level. Senior and functional line management are tasked to ensure that management action plans are carried out in accordance with the internal audit recommendations. All internal audit reports are submitted to the AC. The AC deliberates on key audit findings and management actions to address these findings during the AC meetings.

Follow-up audits are also performed to monitor continued compliance and the internal auditors will provide quarterly updates to the AC on the progress of the management action plans as well as progress of the Internal Audit plan.

#### **B3. Other Key Internal Control Process**

The other key processes that the Board has established to provide effective internal control include: -

##### **Clear and Defined Organisational Structure**

The Company has established an organisational structure with clearly defined lines of responsibility, authority limits and accountability aligned to its business and operation requirements and control environment. Relevant Board Committees with specific responsibilities delegated by the Board are established to provide oversight governance over the Company's activities. The Board Committees are centralised at its immediate holding company, AMB. The Board Committees have the authority to examine matters under their terms of reference and report to the Board with their observations and/or recommendations. Although specific authority is delegated to the Board Committees, the ultimate responsibility for the final decision on all matters, however, lies with the Board.

Various Management Committees are established by the Management to assist in managing the day-to-day operations and ensure its effectiveness. The Management Committees formulate tactical plans and business strategies, monitor performance and ensure activities are carried out in accordance with corporate objectives, strategies, business plans and policies as approved by the Board.

## **Corporate governance disclosures (continued)**

### **B. Internal control framework (continued)**

#### **B3. Other Key Internal Control Process (continued)**

##### **Management Authority Limit**

The Board's approving authority is delegated to the Management through formal and defined operational authority limits that governs business procedures and decision making process in the Company. The operational authority limits incorporate segregation of duties and check and balance in delegation of authority.

The Management's authority limits include limits for underwriting of risks, claims settlement, reinsurance, and capital expenditures and are reviewed and updated to ensure relevance to the Company's operations. Such authority limits are documented and made available to all staff via the Group's staff e-portal.

In ensuring that the decision making process is transparent and to the best interest of the Company, all Directors and staff including the Chief Executive Officer are required to declare their interest in other entities on an annual basis. In addition, they are also required to disclose to the Company, any circumstance that may give rise to a conflict of interest situation during the course of carrying out their duties.

##### **Policies and Procedures**

Clear, formalised and documented internal policies and procedures are in place to ensure continued compliance with internal controls and relevant rules and regulations imposed by the relevant authorities.

These policies and procedures are subject to review and improvement to reflect changing risks and process enhancement, as and when required. Policies and procedures are also made available via the Group's staff e-portal for easy access by the employees.

##### **Annual Business Plan and Performance Review**

Annual business plans are submitted to the Board for approval. Financial condition and business performance reports are also submitted to the Board for review during the Board meetings. These reports cover all key operational areas and provide a sound basis for the Board to assess the financial performance of the Company and to identify potential problems or risks faced by the Company, thus enabling the Board to effectively monitor on an on-going basis, the affairs of the Company.

## **Corporate governance disclosures (continued)**

### **B. Internal control framework (continued)**

#### **B3. Other Key Internal Control Process (continued)**

##### **Related Party Transactions**

The Group has established the necessary controls and procedures to ensure compliance with the relevant regulatory requirements in respect of related party transaction. Necessary disclosures are made to the Board of the Company and where required, prior approval of the Board of the Company and/or shareholders for the transactions will be obtained prior to execution.

A due diligence working group was formed to review the related party transactions and submit its recommendations in accordance to the levels of authority as determined by the Board for consideration. The AC will review the related party transactions that falls within its authority limit and submit its recommendation to the Board of the Company for consideration.

The AC also review the related party transaction review procedures on an annual basis to ensure that the procedures and processes are sufficient and adequate to monitor, track and identify related party transactions including recurrent transactions in a timely and orderly manner.

##### **Underwriting and Reinsurance**

The Company employs high standards in its respective underwriting process. This includes among others, risk segmentation and selection, setting adequate pricing and terms and conditions, setting of right retention limit and adequate reinsurance protection.

Underwriting authority is controlled centrally at the Head Office level. Reinsurance is in place primarily to ensure that no single loss or aggregation of losses arising from a single event will have an adverse financial impact on the Company. Reinsurers selection is guided by the guidelines issued by the regulator and the Allianz SE Group. Reinsurance needs are reviewed annually in respect of reinsurance treaties and on case to case basis on facultative arrangements.

##### **Financial Control Procedures**

Financial control procedures are put in place and are documented in the procedural workflows of each business unit. These workflows are subject to reviews and improvements to reflect changing risks and process enhancement as and when required.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B3. Other Key Internal Control Process (continued)

##### Investment

The Investment Committee of the Company is responsible for setting investment policies, objectives, guidelines and controls for the Investment Department. The Investment Department is responsible for managing the investment functions of the Company within the pre-determined parameters.

The Company has in place the Investment Manual which sets out the detailed investment procedures and controls, including an Investment Code of Ethics to ensure that the Company's interests prevail over the personal interests of the employees.

The investment limits are set at various levels with limits which are more stringent than the regulatory limits as prescribed by BNM. The investment limits are monitored monthly to ensure compliance with the investment limits as specified in the Risk Based Capital Framework for Insurers issued by BNM.

The investment performance reports are amongst the reports submitted to the Investment Committee and the Board of the Company for review at its quarterly meetings.

##### Code of Conduct ("COC")

Every employee is required to attest on an annual basis that they understand and comply with the Allianz SE Group's COC. The COC among others, is essential in promoting ethical conduct within the Company and reflects our values and principles and provides guidance to employees in their actions and decisions. Each employee has a responsibility to live by the principles contained in the Code, i.e. to

- (i) Treat each other fairly and respectfully
- (ii) Act with integrity
- (iii) Be transparent and tell the truth
- (iv) Take ownership and responsibility

## **Corporate governance disclosures (continued)**

### **B. Internal control framework (continued)**

#### **B3. Other Key Internal Control Process (continued)**

##### **Anti-Money Laundering/Counter Financing of Terrorism (“AML/CFT”) and Targeted Financial Sanctions (“TFS”)**

The Company has in place internal policies and procedures relating to AML/CFT and TFS to prevent and detect money laundering and terrorism financing activities. These include customer due diligence, screening against sanctions list, suspicious transaction reporting to the Compliance Department, customer profiling, due diligence and on-going transactions monitoring procedures are in place. In respect of education, staff and agents are trained on AML/CFT requirements to promote understanding of their fundamental responsibilities in adhering to the procedures of verifying customers’ identities and reporting of suspicious transactions.

##### **Product Development**

The Company has in place a Product Development Management Policy (“PDM Policy”) which sets out the policies and procedures on product development in accordance with the requirements of the Guideline on Introduction of New Products by Insurers and Takaful Operators (BNM/RH/STD 029-10) issued by BNM.

The PDM Policy aims to promote sound risk management practices in managing and controlling product risk by ensuring the appropriate assessment and mitigation of risk during the development and marketing stages. The PDM Policy will also assist to ensure that the products developed and marketed by the Company are appropriate to the needs, resources and financial capability of the targeted consumer segments.

The on-going product risk management is embedded within the risk management framework of the Company.

##### **Whistleblowing and Anti-Fraud**

The oversight of whistleblowing and fraud matters of the Company is performed by the AMB’s Integrity Committee (“InC”). The InC coordinates all activities concerning prevention and detection of fraud and handling of whistleblowing incidents.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B3. Other Key Internal Control Process (continued)

##### Whistleblowing and Anti-Fraud (continued)

The Company has in place the AMB Group's Anti-Fraud Policy ("AFP") and AMB Group's Whistleblowing Policies and Procedures ("WBPP") to address fraud and whistleblowing issues respectively. The AFP defines fraud events, investigation process, reporting procedures, fraud risk assessments, training and the roles and responsibilities of Management and employees. The WBPP on the other hand, describes the Company's Speak-Up Policy, avenues for filing a concern and handling of whistleblowing incidents.

In respect of whistleblowing, the Company has established a whistleblowing mechanism to enable anonymous and non-anonymous reporting of any breach of the COC, any laws, regulations, orders or any internal rules. These whistleblowing cases are assessed confidentially by the InC to determine its validity and reports the findings and any recommendations to the AC.

The effectiveness of the whistleblowing policies and procedures are reviewed periodically at least once in 3 years.

##### Anti-Corruption

The Company has adopted a localised Anti-Corruption Policy ("Policy") that outlines the guiding principles of Allianz SE, Malaysian Anti-Corruption Commission Act 2009 ("MACC Act") and Listing Requirements. The Policy serves to outline the Company's existing controls and behavioral guidelines on the risk areas of dealing with government officials, business courtesies, hiring of representatives, political contributions, charitable contributions, joint ventures and outsourcing agreements as well as facilitation payments.

Corruption risk are being assessed annually and the effectiveness of the policies and procedures are reviewed periodically at least once in 3 years.

The Vendor Integrity Screening process which is a part of the Allianz SE Group's Anti-Corruption Programme aims at ensuring an integrity based due diligence is performed before any third party vendor is engaged. The screening contains a self-assessment section which among others, includes questions on anti-corruption to be answered by the potential vendor and a risk evaluation to be completed by the relevant staff/department in charge. Only those vendors whose screening does not reveal any negative findings will be engaged.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B3. Other Key Internal Control Process (continued)

##### Employees

All staff are required to make an annual declaration that they fulfilled the minimum criteria of "A Fit and Proper Person" as prescribed in Sections 59(1), (2) and (3) of the Financial Services Act, 2013. In addition, all staff are also required to attest that they understand and comply with the requirements of the following internal guidelines and policies: -

- (i) Related Party Transaction Declaration;
- (ii) Disclosure of Data;
- (iii) Conflict of Interest;
- (iv) COC;
- (v) IT Security Policy and Guideline e-Awareness Declaration;
- (vi) Anti-Corruption Policy;
- (vii) Anti-Fraud Awareness Declaration; and
- (viii) Guidelines on the Code of Conduct for the General Insurance Industry and Code of Ethics and Conducts for the Life Insurance Industry.

##### Sales Standard and Sales Agent Code of Conduct

The Company's insurance intermediaries are guided by the Allianz SE Sales Standard and Allianz SE Singapore Branch ("AZAP") Sales Agent Code of Conduct in order to promote professional sales conduct of intermediaries representing the Company. The Company has established an Ethics and Compliance Committee to deal with intermediary behaviour that are contrary to the Sales Standard and AZAP Sales Agent Code of Conduct.

In addition, agents of the Company are also required to comply with the Code of Ethics and Conduct imposed by Life Insurance Association of Malaysia ("LIAM").

All internal control deficiencies or breaches related to the Sales Policy and Sales Agent Code of Conduct are reported to the Senior Management Committee together with corrective measures.

##### Agent Sales Disciplinary Policy

As part of the measures to improve uniformity in disciplining the agency force, the Company has formalised a Sales Disciplinary Policy detailing definition of types of offences/misconduct and the associated recommended disciplinary actions.

## Corporate governance disclosures (continued)

### B. Internal control framework (continued)

#### B3. Other Key Internal Control Process (continued)

##### **Business Continuity Management**

Business Continuity Plan for the Company has been formulated to ascertain that the Company will recover and restore any interrupted critical functions within a predetermined time upon the occurrence of any disastrous events.

The testing for Business Continuity Plan is conducted at least once a year whilst the Disaster Recovery Plan test for all main application systems is conducted at least twice a year.

##### **Crisis Management**

Crisis Management Plans for the Company have been developed to outline the processes and procedures that guides crisis handling and manage any incident with crisis potential. The plan helps to mitigate the impact of a crisis and prevent an incident with crisis potential from escalating into a crisis.

##### **Information System**

All employees are required to strictly abide to and comply with the Group Information Technology and Information Security Policy and Standard which establishes core principles, responsibilities, tasks and organisational framework for IT and Information Security, in order to facilitate the fulfilment of internal and regulatory requirements.

Following the issuance of Risk Management in Technology Policy Document (“RMiT Policy”) by BNM, the Company is committed to remedy the gaps to meet the expectations and requirements prescribed under the RMiT Policy. Accordingly, two new frameworks were implemented, namely the Technology Risk Management Framework and Cyber Resilience Framework.

The IT & Digital Steering Committee (“ITDSC”) is responsible for the overall strategic deployment of IT and digital assets in tandem with the business objectives, which including matters related to Internet Insurance, IT Outsourcing and Cloud Utilisation. Other duties and responsibilities of ITDSC include, establishing effective IT and digital plans, formulation and implementation of technology risks management program, recommending to the RMC and Board (whichever applicable) for approval on IT-related expenditure, material deviation from technology-related policies and matters related to Internet Insurance, as well as monitoring the progress of approved IT and digital programs/projects.

## **Corporate governance disclosures (continued)**

### **B. Internal control framework (continued)**

#### **B3. Other Key Internal Control Process (continued)**

##### **Data Management Framework**

The Group Data Management Framework (“DMF”) has been in place to establish and maintain a sound data and information management system framework. The objective of the DMF is to manage data and disseminate information effectively, efficiently and to maximise the value of data assets. In addition, the DMF aims to ensure the integrity of data assets by preventing unauthorised or inappropriate use of data and information.

##### **Data Privacy**

The Allianz Privacy Standard (“APS”), contains the global minimum requirements applicable within the Allianz SE Group for the processing and transfer of personal data within the Allianz SE Group. The APS takes into account the requirements of the European Union privacy law, the General Data Protection Regulation to facilitate cross-border transfers of personal data originating from or processed in the European Economic Area within the Allianz SE Group. Under the APS, there are functional rules specifying data privacy and protection requirements, which include conducting Privacy Impact Assessment to record processing activities that involve handling of personal data and to comply with the Personal Data Breach Incident Workflow. Compliance with the APS adopted by the Company ensures compliance with the Malaysian Personal Data Protection Act, 2010 and is in line with the Code of Practice on Personal Data Protection for Insurance and Takaful in Malaysia.

##### **Human Resources Policies and Procedures**

The Company has established proper policies and procedures on human resource management, including recruitment, learning and development, talent development, performance management and employee benefits. These policies and procedures are reviewed as and when the need arises and changes effected are communicated to relevant employees via-email. The policies and procedures are also made available via the Group’s staff e-portal for easy access by the employees.

## Corporate governance disclosures (continued)

### C. Remuneration

The remuneration policy and practices of the Company ("Policy") are established, implemented and maintained in line with the Company's business and risk management strategy, its risk profile, objectives, risk management practices and the long-term interests and performance. This Policy forms a key component of the governance and incentive structure through which the Board and Senior Management drive performance, convey acceptable risk taking behaviour and reinforce the Company's corporate and risk culture.

The remuneration components of employees are fixed and variable compensation. Base salary is the fixed remuneration component and rewards the role and responsibilities taking account of market conditions and providing for a stable source of income. The fixed component is dependent on position responsibility as well as the experience and qualification of incumbent.

Variable Compensation components aim to reward performance and shall not provide incentives for risks which might be incompatible with the risk profile of the Company, including risk limits. Therefore, Variable Compensation components may not be paid, or payment may be restricted in the case of a breach of risk limits or a compliance breach.

The volume and relative weighting of the variable component shall depend on the level of seniority and the position. Variable components typically consist of annual bonus (short term incentive) and mid-/long-term incentives.

Variable Compensation is determined by a combination of assessment of the individual's performance and his business unit as well as overall performance of the Company.

The Company measures performance in an annual process which includes the key steps of agreed priorities, regular feedback, and a mid-year and year-end performance assessment. Personal priorities or targets are agreed for each evaluated employee and reflects financial and non-financial ambitions. The assessment of individual performance is holistic in nature and considers relativity against peers.

The remuneration of KRPs of the Company is not only determined by performance against business objectives but include other factors such as prudent risk-taking and actions affecting the long-term interests of the Company. Remuneration of KRPs is adjusted each year to account for all types of risk and breaches, determined by both quantitative measures and qualitative judgement.

Employees in control functions are measured on the achievement of control function objectives which determine their remuneration. Similar to all employees, actual payout is subject to overall size of bonus pool.

Company No. 198301008983 (104248-X)
-------------------------------------

## Corporate governance disclosures (continued)

### C. Remuneration (continued)

A portion of the Variable Compensation for CEO and KRPs contains a deferred component. The deferral period shall be aligned with the nature of the business, its risks, and the activities of the incumbent in question, and adopt a multi-year framework to reflect the time horizon of risks.

### Ultimate holding company

The Directors regard Allianz SE, a public listed company incorporated and domiciled in Germany as the Company's ultimate holding company.

### Immediate holding company

The immediate holding company is AMB, a public limited company incorporated in Malaysia and listed on the Main Market of Bursa Malaysia Securities Berhad.

### Auditors

The auditors, PricewaterhouseCoopers PLT (LLP0014401-LCA & AF 1146) have expressed their willingness to accept re-appointment as auditors.

The auditors' remuneration is disclosed in Note 25 to the financial statements.

Signed on behalf of the Board of Directors in accordance with a resolution of the Directors:

# Allianz Life Insurance Malaysia Berhad

Company No. 198301008983 (104248-X)  
(Incorporated in Malaysia)

## Notes to the financial statements

### Corporate information

Allianz Life Insurance Malaysia Berhad is a public limited liability company incorporated and domiciled in Malaysia. The address of the principal place of business and registered office of the Company is as follows:

Level 29, Menara Allianz Sentral,  
203, Jalan Tun Sambanthan,  
Kuala Lumpur Sentral,  
50470 Kuala Lumpur, Malaysia

The Company is principally engaged in the underwriting of life insurance and investment-linked business.

The ultimate holding company is Allianz SE, a public listed company incorporated and domiciled in Germany. The immediate holding company is Allianz Malaysia Berhad, a public limited liability company, incorporated and domiciled in Malaysia and listed on the Main Market of Bursa Malaysia Securities Berhad.

These financial statements were approved by the Board of Directors on 22 February 2022.

## 1. Basis of preparation

### 1.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRSs"), International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

The following are amendments to standards and interpretations that have been issued by Malaysian Accounting Standards Board ("MASB") for the financial year beginning on or after 1 January 2021 and adopted by the Company:

## 1. Basis of preparation (continued)

### 1.1 Statement of compliance (continued)

#### ***MFRSs, Interpretations and amendments effective for annual periods beginning on or after 1 January 2021***

- Amendments to MFRS 16, *COVID-19 Related Rent Concessions*
- Amendments to MFRS 9, *Financial Instruments*, MFRS 139, *Financial Instruments: Recognition and Measurement*, MFRS 7, *Financial Instruments: Disclosures*, MFRS 4, *Insurance Contracts* and MFRS 16, *Leases – Interest Rate Benchmark Reform – Phase 2*

The following are accounting standards, amendments to standards and interpretations that have been issued by MASB but not yet effective and have not been early adopted by the Company:

#### ***MFRSs, Interpretations and amendments effective for annual periods beginning on or after 1 January 2022***

- Amendments to MFRS 16, *COVID-19 Related Rent Concessions beyond 30 June 2021*
- Amendments to MFRS 116, *Proceeds before Intended Use*
- Amendments to MFRS 3, *Reference to Conceptual Framework*
- Amendments to MFRS 137, *Onerous Contracts – Cost of Fulfilling a Contract*
- Annual Improvement to MFRSs 2018 - 2022 Cycle effective for annual periods beginning on or after 1 January 2022

#### ***MFRSs, Interpretations and amendments effective for annual periods beginning on or after 1 January 2023***

- Amendments to MFRS101, *Classification of liabilities and current or non-current*
- Amendments to MFRS 101, MFRS Practice Statement 2 and MFRS 108 on *Disclosure of Accounting Policies and Definition of Accounting Estimate*
- Amendments to MFRS 112, *Deferred tax related to Assets and Liabilities arising from Single Transaction*
- MFRS 17, *Insurance Contracts*

#### **MFRS 17, *Insurance Contracts***

MFRS 17 replaces the guidance in MFRS 4, *Insurance Contracts*.

## 1. Basis of preparation (continued)

### 1.1 Statement of compliance (continued)

#### **MFRS 17, *Insurance Contracts* (continued)**

MFRS 17 applies to insurance contracts issued, to all reinsurance contracts and to investment contracts with discretionary participating features if an entity also issues insurance contracts. For fixed-fee service contracts whose primary purpose is the provision of services, an entity has an accounting policy choice to account for them in accordance with either MFRS 17 or MFRS 15, *Revenue from Contracts with Customers*.

Insurance contracts (other than reinsurance) where the entity is the policyholder are not within the scope of MFRS 17. Embedded derivatives and distinct investment and service components should be 'unbundled' and accounted for separately in accordance with the related MFRSs. Voluntary unbundling of other components is prohibited.

MFRS 17 requires a current measurement model where estimates are remeasured at each reporting period. The measurement is based on the building blocks of discounted, probability-weighted cash flows, a risk adjustment and a contractual service margin ("CSM") representing the unearned profit of the contract. An entity has a policy choice to recognise the impact of changes in discount rates and other assumptions that related to financial risks either in profit or loss or in other comprehensive income.

Alternative measurement models are provided for the different insurance coverages:

- a) Simplified Premium Allocation Approach if the insurance coverage period is a year or less; and
- b) Variable Fee Approach should be applied for insurance contracts that specify a link between payments to the policyholder and the returns on the underlying items.

The requirements of MFRS 17 align the presentation of revenue with other industries. Revenue is allocated to the periods in proportion to the value of the expected coverage and other services that the insurer provides in the period, and claims are presented when incurred. Investment components are excluded from revenue and claims. Insurers are required to disclose information about amounts, judgements and risks arising from insurance contracts.

The Company is currently assessing the financial impact that may arise from the adoption of MFRS 17.

Except as mentioned above, the initial application of the other new standards, amendments to standards or interpretations issued by MASB effective for periods subsequent to 1 January 2022 are not expected to have any material financial impact to the current period and prior period financial statements of the Company.

## **1. Basis of preparation (continued)**

### **1.2 Basis of measurement**

The financial statements have been prepared on the historical cost basis other than as disclosed in Note 2.

### **1.3 Functional and presentation currency**

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates (the “functional currency”). The financial statements are presented in Ringgit Malaysia (“RM”), which is the Company’s functional currency. All financial information is presented in RM and has been rounded to the nearest thousand, unless otherwise stated.

### **1.4 Use of estimates and judgements**

The preparation of the financial statements in conformity with MFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, and disclosure of contingent assets and liabilities at the date of financial statement, and the reported amount of income and expenses during the year. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

There are no significant areas of estimation uncertainty and critical judgements in applying accounting policies that have significant effect on the amounts recognised in the financial statements other than those disclosed in the following notes:

- Note 2 (u)(i) – valuation of life actuarial liabilities.
- The Company has estimated deferred tax in respect of the changes in tax rate that were enacted during the financial year. The amount of deferred tax that can be recognised based on the likely level of future taxable profits forms part of the key judgement areas. Refer to Note 27(e) for details.

## **2. Significant accounting policies**

The accounting policies set out below have been applied consistently to the periods presented in these financial statements, unless otherwise stated.

## 2. Significant accounting policies (continued)

### (a) Foreign currency transactions and balances

Transactions in foreign currencies are translated to the functional currency of the Company at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities denominated in foreign currencies are not retranslated at the end of the reporting date, except for those that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising from settlement of foreign currency transactions and from retranslation of monetary assets and liabilities are recognised in profit or loss, except for differences arising on the retranslation of available-for-sale equity instruments or a financial instrument designated as a hedge of currency risk, which are recognised in other comprehensive income.

### (b) Property, plant and equipment

#### (i) Recognition and measurement

All items of property, plant and equipment except for work-in-progress are measured at cost/valuation less any accumulated depreciation and any accumulated impairment losses. Work-in-progress is stated at cost less accumulated impairment.

The Company revalues its properties comprising land and buildings every five years and at shorter intervals whenever the fair value of the revalued assets are expected to differ materially from their carrying value.

Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset.

The revalued amounts of property are determined by using the Comparison Method. The Comparison Method entails critical analysis of recent evidence of values of comparable properties in the neighbourhood and making adjustment for differences such as differences in location, size and shape of land, age and condition of building, tenure, title restrictions if any and other relevant characteristics.

Valuation of the properties involves a degree of judgement before arriving at the respective property's revalued amount. As such, the revalued amount of the properties may be different from its actual market price.

## 2. Significant accounting policies (continued)

### (b) Property, plant and equipment (continued)

#### (i) Recognition and measurement (continued)

Surpluses arising from revaluation are credited to revaluation reserve account via the statement of other comprehensive income. Any deficit arising is offset against the revaluation reserve to the extent of a previous increase for the same property. In all other cases, a decrease in carrying amount is recognised in profit or loss.

Costs include expenditures that are directly attributable to the acquisition of the asset and any other costs directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located.

Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and is recognised on a net basis within "realised gains and losses" in profit or loss. When revalued assets are sold, the amounts included in the revaluation reserve are transferred to retained earnings.

#### (ii) Subsequent costs

The cost of replacing a component of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced component is derecognised to profit or loss. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

## 2. Significant accounting policies (continued)

### (b) Property, plant and equipment (continued)

#### (iii) Depreciation

Depreciation is based on the cost of an asset less its residual value. Significant components of individual assets are assessed, and if a component has a useful life that is different from the remainder of that asset, then that component is depreciated separately.

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment from the date that they are available for use. Freehold land is not depreciated. Work-in-progress are not depreciated until the assets are ready for their intended use.

The estimated useful lives for the current and comparative periods are as follows:

- |  |             |
|--|-------------|
| • Buildings                                | 50 years    |
| • Office equipment, furniture and fittings | 2 -10 years |
| • Computers                                | 5 years     |
| • Motor vehicles                           | 5 years     |
| • Office renovation and partitions         | 10 years    |

Depreciation methods, useful lives and residual values are reviewed at the end of the reporting period, and adjusted as appropriate.

Leased assets (including leasehold land) are presented as a separate line item in statement of financial position. See accounting policy Note 2(d)(i) on right-of-use assets for these assets.

## 2. Significant accounting policies (continued)

### (c) Intangible assets

#### (i) Development costs

Expenditure incurred on software development is capitalised, only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Company intends to and has sufficient resources to complete development and to use the asset.

The expenditure capitalised includes the cost of materials, direct labour and overhead costs that are directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in profit or loss as an expense as incurred. Capitalised development expenditure is measured at cost less any accumulated amortisation and any accumulated impairment losses.

#### (ii) Other intangible assets

Other intangible assets that are acquired by the Company, which have finite useful lives, are measured at cost less any accumulated amortisation and any accumulated impairment losses.

## 2. Significant accounting policies (continued)

### (c) Intangible assets (continued)

#### (iii) Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

#### (iv) Amortisation

Amortisation is based on the cost of an asset less its residual value. Intangible assets with finite useful lives are amortised from the date that they are available for use. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date they are available for use.

The estimated useful lives for the current and comparative periods are as follows:

- Capitalised software development costs 3-5 years
- Other intangible assets 11 years

Amortisation methods, useful lives and residual values are reviewed at the end of each reporting period and adjusted, if appropriate.

### (d) Leases

#### (i) Accounting by lessee

Leases are recognised as right-of-use ('ROU') asset and a corresponding liability at the date on which the leased asset is available for use by the Company (i.e. the commencement date).

Contracts may contain both lease and non-lease components. The Company allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of properties for which the Company is a lessee, it has elected the practical expedient provided in MFRS 16 not to separate lease and non-lease components. Both components are accounted for as a single lease component and payments for both components are included in the measurement of lease liability.

## 2. Significant accounting policies (continued)

### (d) Leases (continued)

#### (i) Accounting by lessee (continued)

##### Lease term

In determining the lease term, the Company considers all facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not to be terminated).

The Company reassess the lease term upon the occurrence of a significant event or change in circumstances that is within the control of the Company and affects whether the Company is reasonably certain to exercise an option not previously included in the determination of lease term, or not to exercise an option previously included in the determination of lease term. A revision in lease term results in remeasurement of the lease liabilities.

##### ROU assets

ROU assets are initially measured at cost comprising the following:

- The amount of the initial measurement of lease liability;
- Any lease payments made at or before the commencement date less any lease incentive received;
- Any initial direct costs; and
- Decommissioning or restoration costs.

ROU assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. In addition, the ROU assets are adjusted for certain remeasurement of the lease liabilities.

## 2. Significant accounting policies (continued)

### (d) Leases (continued)

#### (i) Accounting by lessee (continued)

##### **Lease liabilities**

Lease liabilities are initially measured at the present value of the lease payments that are not paid at that date. The lease payments include fixed payments (including in-substance fixed payments), less any lease incentive receivable.

Lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Company, the lessee's incremental borrowing is used. This is the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the ROU in a similar economic environment with similar term, security and conditions.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

The Company presents the lease liabilities as a separate line item in the statement of financial position. Interest expense on the lease liability is presented within the interest expenses in profit or loss in the statement of profit or loss.

##### **Short term leases and leases of low value assets**

Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise photocopiers. Payments associated with short-term leases of equipment and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss.

## 2. Significant accounting policies (continued)

### (d) Leases (continued)

#### (ii) Accounting by lessor

As a lessor, the Company determines at lease inception whether each lease is a finance lease or an operating lease. To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset to the lessee. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

#### Operating lease

The Company classifies a lease as an operating lease if the lease does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee.

The Company recognises lease payments received under operating lease as lease income on a straight-line basis over the lease term.

When assets are leased out under an operating lease, the asset is included in the statement of financial position based on the nature of the asset. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of underlying asset and recognised as an expense over the lease term on the same basis as lease income.

#### Sublease classification

When the Company is an intermediate lessor, it assesses the lease classification of a sublease with reference to the ROU asset arising from the head lease, not with reference to the underlying asset.

### (e) Financial instruments

#### (i) Initial recognition and measurement

A financial asset or a financial liability is recognised in the statement of financial position when, and only when, the Company becomes a party to the contractual provisions of the instrument.

## 2. Significant accounting policies (continued)

### (e) Financial instruments (continued)

#### (i) Initial recognition and measurement (continued)

A financial instrument is recognised initially, at its fair value plus, in the case of a financial instrument not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial instrument.

An embedded derivative is recognised separately from the host contract and accounted for as a derivative if, and only if, it is not closely related to the economic characteristics and risks of the host contract and the host contract is not categorised at fair value through profit or loss. The host contract, in the event an embedded derivative is recognised separately, is accounted for in accordance with policy applicable to the nature of the host contract.

#### (ii) Financial instrument categories and subsequent measurement

The Company categorises and measures financial instruments as follows:

##### ***Financial assets***

##### **(1) *Financial assets at fair value through profit or loss***

Fair value through profit or loss category comprises financial assets that are held for trading, including derivatives (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument) or financial assets that are specifically designated into this category upon initial recognition.

Derivatives that are linked to and must be settled by delivery of unquoted equity instruments whose fair values cannot be reliably measured are measured at cost.

Financial assets categorised as fair value through profit or loss are subsequently measured at their fair values with the gain or loss recognised in profit or loss.

##### **(2) *Loans and receivables, excluding insurance receivables***

Loans and receivables category comprises debt instruments that are not quoted in an active market and include other receivables, deposits and cash and cash equivalents.

Financial assets categorised as loans and receivables are subsequently measured at amortised cost using the effective interest method.

## 2. Significant accounting policies (continued)

### (e) Financial instruments (continued)

#### (ii) Financial instrument categories and subsequent measurement (continued)

##### *Financial assets (continued)*

##### **(3) Available-for-sale financial assets**

Available-for-sale category comprises investment in equity and debt securities instruments that are not held for trading.

Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost. Other financial assets categorised as available-for-sale are subsequently measured at their fair values with the gain or loss recognised in other comprehensive income, except for impairment losses, foreign exchange gains and losses arising from monetary items and gains and losses of hedged items attributable to hedge risks of fair value hedges which are recognised in profit or loss. On derecognition, the cumulative gain or loss recognised in other comprehensive income is reclassified from equity into profit or loss. Interest calculated for a debt instrument using the effective interest method is recognised in profit or loss.

##### **(4) Insurance receivables**

Insurance receivables are recognised when due and measured on initial recognition at the fair value of the consideration received or receivable. Subsequent to initial recognition, insurance receivables are measured at amortised cost, using the effective interest method.

If there is objective evidence that the insurance receivable is impaired, the Company reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in profit or loss. The Company gathers the objective evidence that an insurance receivable is impaired using the same process adopted for financial assets carried at amortised cost. The impairment loss is calculated under the same method used for these financial assets. These processes are described in Note 2(f)(ii).

Insurance receivables are derecognised when the derecognition criteria for financial assets, as described in Note 2(e)(v), have been met.

All financial assets, except for those measured at fair value through profit or loss, are subject to review for impairment (see Note 2(f)(i)).

## 2. Significant accounting policies (continued)

### (e) Financial instruments (continued)

#### (ii) Financial instrument categories and subsequent measurement (continued)

##### *Financial liabilities*

All financial liabilities are initially measured at fair value and subsequently measured at amortised cost other than those categorised as fair value through profit or loss.

Fair value through profit or loss category comprises financial liabilities that are held for trading, derivatives (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument) or financial liabilities that are specifically designated into this category upon initial recognition.

Derivatives that are linked to and must be settled by delivery of equity instruments that do not have quoted price in an active market for identical instruments whose fair values otherwise cannot be reliably measured are measured at cost.

Financial liabilities categorised as fair value through profit or loss are subsequently measured at their fair values with the gain or loss recognised in profit or loss.

#### (iii) Regular way purchase or sale of financial assets

A regular way purchase or sale is a purchase or sale of a financial asset under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

A regular way purchase or sale of financial assets is recognised and derecognised, as applicable, using trade date accounting. Trade date accounting refers to:

- (a) the recognition of an asset to be received and the liability to pay for it on the trade date, and
- (b) derecognition of an asset that is sold, recognition of any gain or loss on disposal and the recognition of a receivable from the buyer for payment on the trade date.

## 2. Significant accounting policies (continued)

### (e) Financial instruments (continued)

#### (iv) Hedge accounting

##### Cash flow hedge

A cash flow hedge is a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction and could affect the profit or loss. In a cash flow hedge, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in other comprehensive income and the ineffective portion is recognised in profit or loss.

Subsequently, the cumulative gain or loss recognised in other comprehensive income is reclassified from equity into profit or loss in the same period or periods during which the hedged forecast cash flows affect profit or loss. If the hedge item is a non-financial asset or liability, the associated gain or loss recognised in other comprehensive income is removed from equity and included in the initial amount of the asset or liability. However, loss recognised in other comprehensive income that will not be recovered in one or more future periods is reclassified from equity into profit or loss.

Cash flow hedge accounting is discontinued prospectively when the hedging instrument expires or is sold, terminated or exercised, the hedge is no longer highly effective, the forecast transaction is no longer expected to occur or the hedge designation is revoked. If the hedge is for a forecast transaction, the cumulative gain or loss on the hedging instrument remains in equity until the forecast transaction occurs. When the forecast transaction is no longer expected to occur, any related cumulative gain or loss recognised in other comprehensive income on the hedging instrument is reclassified from equity into profit or loss.

The Company enters into forward purchase agreements as cash flow hedging instruments to hedge against variability in future cash flows arising from movements in interest rates of debt securities.

## 2. Significant accounting policies (continued)

### (e) Financial instruments (continued)

#### (v) Derecognition

A financial asset or part of it is derecognised when, and only when, the contractual rights to the cash flows from the financial asset expire or control of the asset is not retained or substantially all of the risks and rewards of ownership of the financial asset are transferred to another party. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received (including any new asset obtained less any new liability assumed) and any cumulative gain or loss that had been recognised in the equity is recognised in profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged, cancelled or expires. On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

### (f) Impairment

#### (i) Financial assets, excluding insurance receivables

All financial assets (except for financial assets categorised as fair value through profit or loss) are assessed at each reporting date whether there is any objective evidence of impairment as a result of one or more events having an impact on the estimated future cash flows of the asset. Losses expected as a result of future events, no matter how likely, are not recognised. For an investment in an equity instrument, a significant or prolonged decline in the fair value below its cost is an objective evidence of impairment. If any such objective evidence exists, then the impairment loss of the financial asset is estimated.

An impairment loss in respect of loans and receivables (excluding insurance receivables as set out in Note 2(f)(ii) below) is recognised in profit or loss and is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account.

## 2. Significant accounting policies (continued)

### (f) Impairment (continued)

#### (i) Financial assets, excluding insurance receivables (continued)

An impairment loss in respect of available-for-sale financial assets is recognised in profit or loss and is measured as the difference between the asset's acquisition cost (net of any principal repayment and amortisation) and the asset's current fair value, less any impairment loss previously recognised. Where a decline in the fair value of an available-for-sale financial asset has been recognised in other comprehensive income, the cumulative loss in other comprehensive income is reclassified from equity to profit or loss.

An impairment loss in respect of unquoted equity instrument that is carried at cost is recognised in profit or loss and is measured as the difference between the financial asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

Impairment losses recognised in profit or loss for an investment in an equity instrument classified as available-for-sale are not reversed through profit or loss.

If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed, to the extent that the asset's carrying amount does not exceed what the carrying amount would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in profit or loss.

#### (ii) Insurance receivables

Insurance receivables are assessed at each reporting date whether there is any objective evidence of impairment as a result of one or more events having an impact on the estimated future cash flows of the asset. Losses expected as a result of future events, no matter how likely, are not recognised. An objective evidence of impairment is deemed to exist where the principal or interest or both for insurance receivables is past due for more than 90 days or 3 months for those individually assessed, as prescribed in the Guidelines on Financial Reporting for Insurers issued by Bank Negara Malaysia ("BNM").

## 2. Significant accounting policies (continued)

### (f) Impairment (continued)

#### (ii) Insurance receivables (continued)

An impairment loss in respect of insurance receivables is recognised in profit or loss and is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account.

If, in a subsequent period, the fair value of insurance receivables increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed, to the extent that the insurance receivable's carrying amount does not exceed what the carrying amount would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in profit or loss.

#### (iii) Other assets

The carrying amounts of other assets (except for investment properties measured at fair value and deferred tax assets) are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash-generating unit.

An impairment loss is recognised if the carrying amount of an asset or its related cash-generating unit exceeds its estimated recoverable amount.

Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amounts of the assets in the cash-generating unit (groups of cash-generating units) on a *pro rata* basis.

## 2. Significant accounting policies (continued)

### (f) Impairment (continued)

#### (iii) Other assets (continued)

Impairment losses recognised in prior periods are assessed at the end of each reporting period for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognised. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss in the financial year in which the reversals are recognised.

### (g) Equity instruments

Instruments classified as equity are measured at cost on initial recognition and are not remeasured subsequently.

#### (i) Ordinary shares

Ordinary shares are classified as equity.

#### (ii) Dividends on ordinary shares

Dividends on ordinary shares are recognised as a liability and accounted for in the equity as an appropriation of retained earnings when they are approved for payment.

Dividends for the year that are approved after the end of the reporting period are dealt with as a subsequent event.

### (h) Product classification

The Company issues insurance contracts that transfer significant insurance risk. These contracts may also transfer financial risk.

Financial risk is the risk of a possible future change in interest rate, financial instrument price, commodity price, foreign exchange rate, index of price or rate, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Insurance risk is the risk other than financial risk.

## 2. Significant accounting policies (continued)

### (h) Product classification (continued)

Insurance contracts are those contracts that transfer significant insurance risk. An insurance contract is a contract under which the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur.

Investment contracts are those contracts that do not transfer significant insurance risk.

Once a contract has been classified as an insurance contract, it remains as an insurance contract for the remainder of its life-time, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expired. Investment contracts can, however, be reclassified as insurance contracts after inception if insurance risk becomes significant.

Insurance and investment contracts (if any) are further classified as being either with or without discretionary participation features ("DPF"). DPF is a contractual right to receive, as a supplement to guaranteed benefits, additional benefits that are:

- likely to be a significant portion of the total contractual benefits;
- whose amount or timing is contractually at the discretion of the issuer; and
- that are contractually based on the:-
  - performance of a specified pool of contracts or a specified type of contract;
  - realised and/or unrealised investment returns on a specified pool of assets held by the issuer; or
  - profit or loss of the Company, fund or other entity that issues the contract.

Under the terms of the contracts, surpluses in the DPF funds can be distributed on discretion over the amount and timing of the distribution of these surpluses to policyholders. All DPF liabilities, including unallocated surpluses, both guaranteed and discretionary, at the end of the reporting period are held within insurance or investment contract liabilities, as appropriate.

For financial options and guarantees which are not closely related to the host insurance contract and/or investment contract with DPF, bifurcation and unbundling is required to measure these embedded derivatives separately at fair value through profit or loss. However, bifurcation is not required if the embedded derivative is itself an insurance contract and/or investment contract with DPF, or if the host insurance contract and/or investment contract itself is measured at fair value through profit or loss.

## 2. Significant accounting policies (continued)

### (h) Product classification (continued)

When insurance contracts contain both a financial risk component and a significant insurance risk component and the cash flows from the two components are distinct and can be measured reliably, the underlying amounts are unbundled. Any premiums relating to the insurance risk component are accounted for on the same basis as insurance contracts and the remaining element is accounted for as a deposit through the statement of financial position similar to investment contracts.

### (i) Reinsurance

The Company cedes insurance risk in the normal course of business for all of its businesses. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurer's policies and are in accordance with the related reinsurance contracts.

Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders. Premiums ceded and claims reimbursed/recoveries are recognised in the same accounting period as the original policy/contract in which the reinsurance relates, and are presented on a gross basis for both ceded and assumed reinsurance in the statement of profit or loss and statement of financial position.

Reinsurance assets are reviewed for impairment at each reporting date or more frequently when an indication of impairment arises during the reporting period. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Company may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer. The impairment loss is recorded in profit or loss.

Premiums and claims on assumed reinsurance are recognised as revenue or expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the related reinsurance contract.

Reinsurance assets or liabilities are derecognised when the contractual rights are extinguished or expired or when the contract is transferred to another party.

## 2. Significant accounting policies (continued)

### (i) Reinsurance (continued)

Reinsurance contracts that do not transfer significant insurance risk are accounted for directly through the statement of financial position. These are deposit assets or financial liabilities that are recognised based on the consideration paid or received less any explicit identified premiums or fees to be retained by the reinsured. Investment income on these contracts is accounted for using the effective interest method when accrued.

### (j) Life insurance underwriting results

#### Surplus of Life Fund

The surplus transferable from the Life fund to profit or loss of Shareholders' fund is based on the surplus determined by an annual actuarial valuation of the liabilities to policyholders, made in accordance with the provisions of the Financial Services Act, 2013 by the Company's Appointed Actuary.

#### Gross premiums

Gross premiums are recognised as soon as the amount of the premiums can be reliably measured. First premium is recognised from inception date and subsequent premium is recognised when it is due.

At the end of the financial year, all due premiums are accounted for to the extent that they can be reliably measured. Premiums not received on due dates are recognised as revenue in profit or loss and reported as outstanding premiums in the statement of financial position.

#### Reinsurance premiums

Gross reinsurance premiums on ceded reinsurance are recognised as an expense when payable or on the date on which the policy is effective.

#### Benefits, claims and expenses

Benefits and claims that are incurred during the financial year are recognised when a claimable event occurs and/or the insurer is notified.

## 2. Significant accounting policies (continued)

### (j) Life insurance underwriting results (continued)

#### Benefits, claims and expenses (continued)

Benefits and claims, including settlement costs, are accounted for using the case-by-case method and for this purpose, the amounts payable under a policy are recognised as follows:

- maturity and other policy benefit payments due on specified dates are treated as claims payable on the due dates;
- death, surrender and other benefits without due dates are treated as claims payable, on the date of receipt of intimation of death of the assured or occurrence of contingency covered; and
- bonus on DPF policy upon its declaration.

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contracts.

#### Commission and agency expenses

Gross commission and agency expenses, which are costs directly incurred in securing premium on insurance policies, are charged to profit or loss in the period in which they are incurred.

#### Policy administration and investment management service income

Insurance contract policyholders are charged for policy administration services, investment management services, surrenders and other contract fees. These fees are recognised as income over the period in which the related services are performed.

Management fee income earned from the investment-linked business is recognised on an accrued basis based on the net asset value of the investment-linked funds.

## 2. Significant accounting policies (continued)

### (k) Life insurance contract liabilities

#### i) Actuarial liabilities

Life actuarial liabilities are recognised when contracts are entered into and premiums are charged.

These liabilities are measured by using a prospective actuarial valuation method (see Note 2(u)(i)). The liability is determined as the sum of the present value of future guaranteed benefits and, in the case of the participating life policy, appropriate level of non-guaranteed benefits, and the expected future management and distribution expenses, less the present value of future gross considerations arising from the policy discounted at the appropriate risk discount rate. The liability is based on best estimate assumptions and with due regard to significant recent experience. An appropriate allowance for provision of risk margin for adverse deviation from expected experience is made in the valuation of non-participating life policies, the guaranteed benefits liabilities of participating life policies, and non-unit liabilities of investment-linked policies.

The liability in respect of policies of a participating insurance contract is taken as the higher of the guaranteed benefit liabilities or the total benefit liabilities at the insurance fund level derived as stated above.

In the case of a life policy where a part of, or the whole of the premiums are accumulated in a fund, the accumulated amount, as declared to the policy owners, are set as the liabilities if the accumulated amount is higher than the figure as calculated using the prospective actuarial valuation method.

For non-unit liability of investment-linked policy, the liability is valued by projecting future cash flows to ensure that all future outflows can be met without recourse to additional finance or capital support at any future time during the duration of the investment-linked policy.

In the case of a 1-year life policy or a 1-year extension to a life policy covering contingencies other than death or survival, the liability for such life insurance contracts comprises the provision for unearned premiums or unexpired risks, as well as for claims outstanding, which includes an estimate of the incurred claims that have not yet been reported to the Company.

Adjustments to the liabilities at each reporting date are recorded in profit or loss. Profits originated from margins of adverse deviations on run-off contracts, are recognised in profit or loss over the life of the contract.

The liability is derecognised when the contract expires, is discharged or is cancelled.

## 2. Significant accounting policies (continued)

### (k) Life insurance contract liabilities (continued)

#### ii) Benefit and claims liabilities

Benefit and claims liabilities represent the amounts payable under a life insurance policy in respect of claims and benefits including settlement costs, and are accounted for using the case by-case method as set out above under benefits and claims expenses (Note 2(j)).

#### iii) Unallocated surplus

Surpluses of contracts with DPF are distributable to policyholders and shareholders in accordance with the relevant terms under the insurance contracts. The Company, however, has the discretion over the amount and timing of the distribution of these surpluses to both the policyholders and shareholders. The amount and timing of the distribution of these surpluses are subject to the recommendation of the Company's Appointed Actuary and are determined by an actuarial valuation of the long term liabilities to policyholders at the date of the statements of financial position and are made in accordance with the provision of the Financial Services Act, 2013 and related regulations.

Unallocated surplus of contracts with DPF, where the amounts are yet to be allocated or distributed to either policyholders or shareholders by the end of the financial period, are held within the insurance contract liabilities.

#### iv) Available-for-sale fair value reserve

Where unrealised gains or losses arise on AFS financial assets of the life participating fund, the adjustment to the insurance contract liabilities, which equals to the effect that the realisation of those gains or losses at the end of the reporting years would have on those liabilities, is recognised directly in the other comprehensive income.

#### v) Hedging reserve

Where unrealised gains or losses arise on cash flow hedge of the life participating fund, the adjustment to the insurance contract liabilities, which equals to the effect that the realisation of those gains or losses at the end of the reporting years would have on those liabilities, is recognised directly in other comprehensive income.

#### vi) Asset revaluation reserve

Where asset revaluation reserve arises on the self-occupied properties of the DPF fund, the adjustment to the life insurance liabilities equal to the effect that the realisation of those surpluses at the end of the reporting period would have on those liabilities is recognised directly in other comprehensive income.

## 2. Significant accounting policies (continued)

### (k) Life insurance contract liabilities (continued)

#### vii) Net asset value attributable to unitholders

The unit liability of investment-linked policy is equal to the net asset value of the investment-linked funds, which represents net premium received and investment returns credited to the policy less deduction for mortality and morbidity costs and expense charges.

### (l) Other revenue recognition

#### (i) Rental income

Rental income from investment properties is recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

#### (ii) Interest income

Interest income is recognised as it accrues using the effective interest method in profit or loss.

#### (iii) Dividend income

Dividend income is recognised in profit or loss on the date that the Company's right to receive payment is established, which in the case of quoted securities is the ex-dividend date.

#### (iv) Realised gains and losses on investments

Realised gains and losses recorded in profit or loss on investments include gains and losses on disposal of financial assets. Gains and losses arising on disposal of investments are calculated as the difference between net sales proceeds and the original or amortised cost and are recorded on occurrence of the sale transaction.

### (m) Income tax

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity, insurance contract liabilities or other comprehensive income.

## 2. Significant accounting policies (continued)

### (m) Income tax (continued)

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous financial years.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and their tax bases. Deferred tax is not recognised for temporary difference arising from the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of reporting period.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which temporary difference can be utilised. Deferred tax assets are reviewed at the end of each reporting period and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax assets and liabilities, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax assets and liabilities on a net basis or their assets and liabilities will be realised simultaneously.

## 2. Significant accounting policies (continued)

### (n) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

### (o) Contingent liabilities

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is not recognised in the statement of financial position and is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote. Contingent liabilities do not include liabilities arising from contracts of insurance underwritten in the ordinary course of business of the Company.

### (p) Short-term employee benefits

Short-term employee benefit obligations in respect of salaries, annual bonuses, paid annual leave and sick leave are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

The Company's contributions to statutory pension funds are charged to profit or loss in the financial year to which they relate. Once the contributions have been paid, the Company has no further payment obligations. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

## 2. Significant accounting policies (continued)

### (q) Provision for agent's retirement benefits

Provision for agent's retirement benefits is calculated accordance with the terms and conditions in the respective agent's agreements. The scheme is not separately funded. The Company pays fixed contributions into the Agency Provident Fund.

Provision for agent's retirement benefits is charged to profit or loss in the period in which it relates.

### (r) Other financial liabilities and insurance payables

Other financial liabilities and insurance payables are recognised when due and measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method.

### (s) Cash and cash equivalents and placements with financial institutions

Cash and cash equivalents consist of cash on hand, balances and deposits held at call with financial institutions and highly liquid investments which have an insignificant risk of changes in fair value with original maturities of three months or less, and are used by the Company in the management of their short term commitments.

### (t) Investment in subsidiaries

Subsidiaries are all entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only, and the relevant activities are directed by means of contractual arrangements. The Company has determined that the investment in structured securities, such as unit trust investment that the Company has an interest in are structured entities.

When the Company ceased to have control, any retained interest in the subsidiary is re-measured to its fair value at the date when control is lost with change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purpose of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Company had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

## 2. Significant accounting policies (continued)

### (t) Investment in subsidiaries (continued)

In the Company's financial statements, investments in structured entities are initially recognised at fair value and subsequently measured at fair value in accordance with MFRS 139 "Financial Instruments: Recognition and Measurement". On disposal of investment in structured entities, the difference between the disposal proceeds and the carrying amounts of the investment is recognised in profit or loss.

The Company is exempted from presenting consolidated financial statements based on the criteria set out in paragraph 4 of MFRS 10 "Consolidated Financial Statements".

The immediate holding company, Allianz Malaysia Berhad, prepares consolidated financial statements in accordance with MFRS in Malaysia, which are available for inspection at the registered office of the immediate holding company.

## 2. Significant accounting policies (continued)

### (u) Significant accounting judgements, estimates and assumptions

#### (i) Valuation of life actuarial liabilities

The actuarial valuation of life insurance contract liabilities is based on the Risk-Based Capital Framework for Insurers, issued by BNM. The actuarial valuation of the insurance liability arising from policy benefits made under life insurance contracts is the Company's most critical accounting estimate.

An appropriate allowance for provision of risk margin for adverse deviation from expected experience is included in the valuation of non-participating life policies, the guaranteed benefits liabilities of participating life policies, and non-unit actuarial liabilities of investment-linked policies.

The risk-free discount rate is used for all cash flows to determine the liability of a non-participating life policy, non-unit actuarial liability of an investment-linked policy and guaranteed benefits insurance liability of participating policy. A discount rate based on the historical yield and future investment outlook of the participating fund, net of tax on investment income of the Life fund is used for all cash flows to determine the total benefit liability of participating policies.

There are several sources of uncertainty in the estimation of these liabilities, including future mortality and morbidity rates, expenses, persistency and discount rates. These key assumptions used are based on past experiences, current internal data, external market indices and benchmarks which reflect current observable market prices and other published information.

Such assumptions require judgement and therefore, actual experience may differ from the assumptions made by the Company. Actual experience is monitored to assess whether the assumptions remain appropriate and assumptions are changed as warranted. Any movement in the key assumptions will have an effect in determining the actuarial liabilities recognised in life insurance contract liabilities.

The key assumptions used and the sensitivity analysis on the key assumptions are disclosed in Note 33.

Company No. 198301008983 (104248-X)

Included in property, plant and equipment are fully depreciated assets which are still in use costing RM41,553,000 (2020: RM34,652,000).

### 3. Property, plant and equipment (continued)

#### 3.1 Property, plant and equipment under the revaluation model

The land and buildings were last revalued in October 2020 by Hartamas Valuation & Consultancy Sdn Bhd, an external independent qualified valuer using the Comparison Approach. This approach considers the sales of similar or substitute properties and related market data, and establishes a value estimate by adjustments made for differences in factors that affect value. In general, the land and buildings are compared with sales of similar properties that have been transacted in the open market. Listings and offers may also be considered.

Had the land and buildings been carried at historical cost less accumulated depreciation, their carrying amounts would have been as follows:

	2021 RM'000	2020 RM'000
Land	1,420	1,420
Buildings	5,382	5,466
	<u>6,802</u>	<u>6,886</u>

#### 3.2 Fair value information

Fair value of land and buildings are categorised as follows:

	2021			Total RM'000
	Level 1 RM'000	Level 2 RM'000	Level 3 RM'000	
Land	-	-	2,300	2,300
Buildings	-	-	7,550	7,550
	<u>-</u>	<u>-</u>	<u>9,850</u>	<u>9,850</u>
	2020			Total RM'000
	Level 1 RM'000	Level 2 RM'000	Level 3 RM'000	
Land	-	-	2,300	2,300
Buildings	-	-	7,748	7,748
	<u>-</u>	<u>-</u>	<u>10,048</u>	<u>10,048</u>

### 3. Property, plant and equipment (continued)

#### 3.2 Fair value information (continued)

##### Level 3 fair value

The Level 3 unobservable input used in the valuation of land and buildings is the price per square foot ("psf") which is derived from the selling price of comparable land and building, adjusted for differences in location, property size, shape and terrain of land, any title restrictions, availability of infrastructure, age and condition of building, finishes and services and other relevant characteristics.

The estimated fair value would increase/(decrease) if the price per square foot were higher or lower and the historical sales transaction value were higher or lower.

The following table shows the valuation technique used in the determination of fair values within Level 3, as well as the significant unobservable input used in the valuation model.

##### Land and buildings

Valuation technique used	2021 Fair Value RM'000	2021 Adjusted psf RM/psf	2020 Fair Value RM'000	2020 Adjusted psf RM/psf
Comparison Approach	9,850	223 - 911	10,048	223 - 911

### 4. Right-of-use assets

Modification/termination of leases	-	(2,715)	(2,715)
At 31 December 2021	529	11,462	11,991

#### 4. Right-of-use assets (continued)

	Leasehold land RM'000	Buildings RM'000	Total RM'000
<b>Carrying amounts</b>			
At 31 December 2020	10,110	14,615	24,725
At 31 December 2021	9,951	8,694	18,645

The Company leases a number of buildings for its office space and branches. The leases typically run for a period of 1 to 5 years, with options to renew the lease after that date. The lease agreements do not impose any covenants.

The total cash outflow for leases amounts to RM6,393,000 (2020: RM6,327,000) and income from subleasing of right-of-use assets amounts to RM640,000 (2020: RM660,000).

##### 4.1 Right-of-use assets under the revaluation model

The leasehold land was last revalued in October 2020 by Hartamas Valuation & Consultancy Sdn Bhd, an external independent qualified valuer using the Comparison Approach. This approach considers the sales of similar or substitute properties and related market data, and establishes a value estimate by adjustments made for differences in factors that affect value. In general, the leasehold land is compared with sales of similar properties that have been transacted in the open market. Listings and offers may also be considered.

Had the leasehold land been carried at historical cost less accumulated amortisation, the carrying amounts would have been RM3,639,000 (2020: RM3,695,000).

##### 4.2 Fair value information

Fair value of leasehold land is categorised as Level 3 of the fair value hierarchy.

###### Level 3 fair value

The Level 3 unobservable input used in the valuation of leasehold land is the price per square foot ("psf") which is derived from the selling price of comparable land, adjusted for differences in location, shape and terrain of land, any title restrictions, availability of infrastructure, age and condition of building erected thereon and other relevant characteristics.

The estimated fair value would increase/(decrease) if the price per square foot were higher or lower and the historical sales transaction value were higher or lower.

## 4. Right-of-use assets (continued)

### 4.2 Fair value information (continued)

The following table shows the valuation technique used in the determination of fair values within Level 3, as well as the significant unobservable input used in the valuation model.

#### Leasehold land

Valuation technique used	2021 Fair Value RM'000	2021 Adjusted psf RM/psf	2020 Fair Value RM'000	2020 Adjusted psf RM/psf
Comparison Approach	9,951	777 – 1,034	10,110	777 – 1,034

		<b>Note 5.1</b>	<b>Note 5.2</b>	

## 5. Intangible assets (continued)

### 5.1 Software development costs

The software development costs are in relation to the internal development expenditure incurred for digital application and Open Product Underwriting System ("OPUS"), the on-going integrated system to improve the efficiency of the business activity of the Company. These costs of developed software are amortised over a period of three to five years.

### 5.2 Other intangible assets

Other intangible assets are in relation to the exclusive Bancassurance Agreement which provides the Company with an exclusive right to the use of the bancassurance network of a local commercial bank to sell, market and promote conventional life product.

The fee for this exclusive right is amortised over its useful life of 11 years using the straight-line method. In the impairment assessment conducted by the Company, the future economic benefits that are attributable to the bancassurance agreement were valued at the present value of projected future cash flows to be derived from the tenure of the agreement of 11 years using the discounted cash flow model.

The following key assumptions have been used in cash flow projections in respect of bancassurance agreement have also taken into account COVID-19 impact:

Key assumptions	2021	2020
Bancassurance average annualised new premium growth rate	11.6%	16.1%
Discount rate - pre tax	10.9%	10.2%

#### 5.2.1 Sensitivity to changes in key assumptions

Management considers that it is not reasonably possible for the abovementioned key assumptions to change so significantly that would result in impairment.

## 6. Investments

Automatic premium loans	76,567	76,807
	<u>14,473,879</u>	<u>13,533,254</u>

### 6.1 Interest in structured entities

The Company has determined that its investment in quoted and unquoted unit trusts as disclosed in Note 6 to the financial statements to be investment in unconsolidated structured entities ("investee funds"). The funds aim to provide investors with steady income over the medium-term to long-term investment horizon. The investee funds finance their operations through the creation of investee fund units which entitle the holder to variable returns and fair values in the respective investee fund's net assets.

The investee funds are classified as available-for-sale and held for trading investment securities. The changes in fair value of the investee funds are included in the statement of financial position and statement of profit or loss and comprehensive income of the Company.

The Company's maximum exposure to loss arising from its interests in these unconsolidated structured entities is limited to the carrying amount of the assets. Dividend income are received during the reporting period from these interests in unconsolidated structured entities.

## 6. Investments (continued)

### 6.1 Interest in structured entities (continued)

The Company's exposure to investments in the investee funds is disclosed below:

	2021 RM'000	2020 RM'000
<b>Available-for-sale financial assets</b>		
Quoted unit trusts in Malaysia	31,900	38,946
Unquoted unit trusts in Malaysia		
- Affin Hwang Income Fund 5*	21,046	21,350
- Others	1,227	1,265
<b>Held for trading</b>

### 9.1 Amounts due from related companies and immediate holding company

The amounts due from related companies and immediate holding company are unsecured, interest free and repayable on demand.

## 10. Cash and cash equivalents

	2021 RM'000	2020 RM'000
Cash and cash equivalents comprise:		
Fixed and call deposits with licensed financial institutions (with maturity three months or less)	1,054,595	771,564
Cash and bank balances	54,821	46,615
	<u>1,109,416</u>	<u>818,179</u>

## 11. Share capital

	2021		2020	
	Number of shares '000	Amount RM'000	Number of shares '000	Amount RM'000
<b>Issued and fully paid up:</b>				
Ordinary shares				
On issue at 1 January/31 December	236,600	236,600	236,600	236,600

### Ordinary shares

The holders of ordinary shares are entitled to receive dividends as declared from time to time, and are entitled to one vote per share at meetings of the Company.

## 12. Reserves

### Fair value reserve

The fair value reserve comprises the cumulative net change in the fair value of available-for-sale financial assets until the investments are derecognised or impaired.

### Revaluation reserve

The revaluation reserve represents the surplus on revaluation of land and buildings.

### Retained earnings

### Restriction on payment of dividends

Pursuant to the RBC Framework for Insurers, the Company shall not pay dividends if its Capital Adequacy Ratio position is less than the Company's internal target capital level or if the payment of dividend would impair its Capital Adequacy Ratio position to below its internal target capital level.

Pursuant to Section 51(1) of the FSA, the Company is required to obtain BNM's written approval prior to declaring or paying any dividend on its shares.

Company No. 198301008983 (104248-X)

**15. Derivative financial assets/(liabilities)**

	<b>Nominal value RM'000</b>	<b>Assets RM'000</b>	<b>Liabilities RM'000</b>
<b>2021</b>			
Derivatives held for trading at fair value through profit or loss			
- Collateralised interest rate swap	400,000	35,642	-
- Cross currency swap	98,740	2,037	(1,641)
Derivatives used for hedging			
- Forward purchase agreements	60,000	7,837	-
	<u>558,740</u>	<u>45,516</u>	<u>(1,641)</u>
<b>2020</b>			
Derivatives held for trading at fair value through profit or loss			
- Collateralised interest rate swap	400,000	59,496	-
- Cross currency swap	119,750	5,366	(301)
Derivatives used for hedging			
- Forward purchase agreements	100,000	16,876	-
	<u>619,750</u>	<u>81,738</u>	<u>(301)</u>

The Company uses interest rate swap and cross currency swap to mitigate the changes in fair value of local and foreign currency-denominated debt securities due to movements in interest rates or foreign exchange rates.

The Company enters into forward purchase agreements as cash flow hedging instruments to hedge against variability in future cash flows arising from movements in interest rates of debt securities.

## 15. Derivative financial assets/(liabilities) (continued)

Table below shows the periods when the hedged cash flows are expected to occur:

	<b>&gt;6 to 12 months RM'000</b>	<b>&gt;1 to 5 years RM'000</b>
<b>As at 31.12.2021</b>		
Cash inflows (assets)	-	-
Cash outflows (liabilities)	(56,824)	-

## 26. Interest expense

	2021 RM'000	2020 RM'000
Interest expense on:		
Subordinated loan	-	46
Lease liabilities	423	618
	<u>423</u>	<u>664</u>

## 27. Tax expense

	2021 RM'000	2020 RM'000
<b>(a) Recognised in profit or loss</b>		
<b>Current tax expense</b>		
Current year	55,673	43,845
Under/(over) provision in prior years	1,213	(304)
	<u>56,886</u>	<u>43,541</u>
<b>Deferred tax (benefit)/ expense</b>		
Origination and reversal of temporary differences	(9,169)	58,939
<b>Total tax expense</b>	<u>47,717</u>	<u>102,480</u>
Tax expenses attributable to shareholders	40,874	76,107
Tax expenses attributable to participating fund and unitholders	6,843	26,373
	<u>47,717</u>	<u>102,480</u>

The income tax provided for in the Life fund for the current and previous financial years is in respect of investment income which is taxed at a tax rate of 8% (2020: 8%) applicable for life insurance business and 24% (2020: 24%) on income other than investment income which is taxed under Section 60(8) of the Income Tax Act, 1967.

For the Shareholders' fund, the corporate tax rate is at 24% (2020: 24%). Consequently, deferred tax assets and liabilities of Shareholders' fund are measured using this tax rate. The tax expense of respective funds are disclosed in Note 36 – Insurance funds.

## 27. Tax expense (continued)

### (b) Reconciliation of tax expense

	2021 RM'000	2020 RM'000

Net loss arising from change in fair value	13	(723)	(327)
At 31 December		<u>627</u>	<u>1,350</u>

### (e) Changes in taxation

#### Cukai Makmur

In December 2021, the government enacted a change in the national income tax rate for year of assessment ("YA") 2022 via the introduction of "Cukai Makmur" - a special one-off tax to be imposed on non-Micro, Small and Medium Enterprises (non-MSMEs) companies which generate high profits during the pandemic.

Accordingly, the applicable tax rates of the Company for YA 2022 are as follows:

- Chargeable income for the first RM100 million: 24%;
- Portion of chargeable income in excess of RM100 million: 33%

In measuring deferred tax assets and liabilities (Note 14) as at 31 December 2021, the Company has estimated an average tax rate based on a range of estimated taxable income for YA 2022 as well as the timing of reversal of deferred tax balances.

In determining the taxable income for YA 2022, the Company has also considered the effects of tax deductions and tax credits.

## 28. Dividends

Dividend declared by the Company as appropriation of profits is as follows:

	Sen per share (single tier)	Total amount RM'000	Date of payment
<b>2020</b>			
Interim 2020 ordinary	12.6	<u>29,812</u>	19 January 2021

## 29. Operating leases

Leases as lessor

The future undiscounted lease payments to be received are as follows:

	2021 RM'000	2020 RM'000
Less than one year	203	90
Between 1 and 2 years	181	87
Between 2 and 3 years	50	62
Between 3 and 4 years	-	2
	<u>434</u>	<u>241</u>

## 30. Capital commitments

	2021 RM'000	2020 RM'000
<b>Property, plant and equipment</b>		
Contracted but not provided for	<u>2,567</u>	<u>486</u>
<b>Software development</b>		
Contracted but not provided for	<u>238</u>	<u>1,283</u>

## 31. Related parties

### Identity of related parties

For the purposes of these financial statements, parties are considered to be related to the Company if the Company has the ability, directly or indirectly, to control or jointly control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Company and the party are subject to common control. Related parties may be individuals or other entities.

Related parties also include key management personnel defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Company either directly or indirectly and entity that provides key management personnel services to the Company. The key management personnel include all the Directors of the Company, and certain members of Senior Management Committee of the Company. There were no significant transactions with the Company during the financial year other than key management personnel compensation as disclosed in Note 25.

The related parties of, and their relationship with the Company are as follows:

Related Parties	Relationship
Allianz SE, Munich ("Allianz SE")	Ultimate holding company
Allianz Malaysia Berhad ("AMB")	Immediate holding company
Allianz General Insurance Company (Malaysia) Berhad	Related company of ALIM
Allianz SE Insurance Management Asia Pacific	Related company of ALIM
Allianz Technology SE (formerly known as Allianz Managed & Operations Services SE)	Related company of ALIM
Allianz Investment Management SE	Related company of ALIM
Allianz Investment Management Singapore Pte Ltd	Related company of ALIM
Allianz Global Investors Singapore Limited	Related company of ALIM
Allianz Global Investors Asia Pacific Limited	Related company of ALIM
PT Asuransi Allianz Life Indonesia	Related company of ALIM
Allianz Digital Health GMBH	Related company of ALIM
Rapidpro Consulting Sdn Bhd	Company connected to the CEO of AMB

## 31. Related parties (continued)

### Significant related party transactions

Related party transactions have been entered into in the normal course of business under normal trade terms. The significant related party transactions of the Company, other than key management personnel compensation (see Note 25), are as follows:

<b>Transactions</b>	<b>Amount transacted for the year ended 31 December 2021 RM'000</b>	<b>Amount transacted for the year ended 31 December 2020 RM'000</b>
<b>Ultimate holding company</b>

Payment for purchasing of various software licences	(83)	-
Payment of fees for IT system application services	(4,938)	-
<b>Related party – Company connected with CEO of the immediate holding company</b>		
Payment of training and other fees	(318)	(406)

\* Related companies are companies within the Allianz SE group.

Significant related party balances related to the above transactions are disclosed in Notes 8, 9, 17 and 18.

## 32. Risk management framework

As a provider of insurance services, the Company considers risk management to be one of its core competencies. It is an integral part of the Company's business process. In order to protect its assets, the Company has established a risk management framework to promote a strong risk management culture supported by a robust risk governance structure.

This framework ensures that risks are properly identified, analysed and evaluated. Risk appetite is defined by the Company's risk strategy and limit structure. Close monitoring and reporting allows the Company to detect deviations from its risk tolerance limit at an early stage.

The Allianz risk management practice consists of the following key areas:

**(a) Risk underwriting and identification**

A sound risk underwriting and identification framework including risk assessment, risk standards, and clear targets form the foundation for adequate risk taking and management decisions such as individual transaction approval, new product approval, strategic or tactical asset allocation.

**(b) Risk reporting and monitoring**

The Company's qualitative and quantitative risk reporting and controlling framework provides transparency and risk indicators to senior management with regards to its overall risk profile and whether the profile is within the delegated limits and authorities.

**(c) Risk strategy and risk appetite**

The Company's risk strategy clearly defines its risk appetite. It ensures that returns are appropriate for the risks taken and that the delegated authorities are in line with the Company's overall risk bearing capacity. The risk-return profile is managed through integration of risk appetite and capital needs in decision making processes. This also keeps risk strategy and business objectives consistent with each other and allows the Company to take opportunities within its risk appetite.

**(d) Communication and transparency**

Finally, a transparent and robust risk disclosure provides a basis for communicating this strategy to the Company's internal and external stakeholders, ensuring a sustainable positive impact on valuation and financing.

## 32. Risk management framework (continued)

### Risk governance structure

The Board assumes ultimate responsibility over the effectiveness of the Company's risk management and internal control systems by establishing and supervising the operation of the risk management framework. The Board has delegated the responsibility to establish and supervise the operation of the risk management framework to the Risk Management Committee ("RMC") to discharge their oversight function effectively.

RMC bears the overall responsibility for effective risk identification, measurement, monitoring and control functions of the Company. RMC also oversees the Senior Management's activities in managing the key risk areas of the Company and to ensure that the risk management process is in place and functioning effectively. The RMC is responsible for driving the risk management framework of AMB Group of companies ("AMB Group") and to report to the Board on its recommendations and/or decisions. Through structured reporting from the Risk Management Working Committee ("RMWC"), RMC will consolidate the status of the risks and present them to the Board for consideration.

RMWC serves and as a platform for two way communications between the management and the RMC on matters of the AMB Group's risk management framework and its strategies. RMWC is responsible in formulating risk management strategies, policies and risk tolerance for RMC review and onward transmission of recommendation to the Board. RMWC determines the allocation of risks by cascading and/or escalating to the relevant owners. RMWC also oversees the compliance of all risk management process by all departments of the Company and provides pre-emptive recommendations to ensure timely action is taken in managing and mitigating the identified risks.

### Asset and Liability Management ("ALM") Framework

The Investment Committee ("IC") has been tasked to manage business practices so that decisions and actions taken with respect to assets and liabilities are coordinated. It involves various management activities and responsibilities, including the formulation of long-term strategic goals and the management of various risks including liquidity risk, interest rate risk and market risk.

## 32. Risk management framework (continued)

### Asset and Liability Management (“ALM”) Framework (continued)

The Asset Liability Management (“ALM”) process is subjected to external and internal constraints.

- External constraints include supervisory and legislative requirements, market condition, as well as the interests and expectations of policyholders and other stakeholders. For instance, one of the major constraints is the liquidity of the assets and liabilities which may compromise the ability to price, measure and hedge exposures.
- Internal constraints include asset allocation and environmental, social and governance (“ESG”) integration framework, which limits reflect the Company’s management philosophy and professional judgement (although this may also be influenced by external constraints).

### Governance and regulatory framework

The Company is required to comply with the requirements of the Financial Services Act, 2013, relevant regulations and guidelines imposed by BNM, as well as including the relevant guidelines from Life Insurance Association of Malaysia (“LIAM”).

The Company is also required to comply with all Allianz SE Group’s policies and standards. If there is any conflict with the local laws or regulations, the local laws or regulations have priority while the stricter will apply where possible.

## 33. Insurance risk

Insurance risk includes the risk of incurring higher claims costs than expected owing to the random nature of claims and their frequency and severity and the risk of change in the legal or economic conditions of insurance or reinsurance cover. This may result in the insurer having either received too little premium for the risks it has agreed to underwrite and hence has not enough funds to invest and pay claims, or that claims are in excess of those expected.

The Company seeks to minimise insurance risk through a formalised reinsurance arrangement with an appropriate mix and spread of business based on its overall strategy. This is complemented by observing formalised underwriting guidelines and limits and standards applied to the security of reinsurers.

Company No. 198301008983 (104248-X)
-------------------------------------

### 33. Insurance risk (continued)

The insurance risk of life insurance contracts consists of mortality/longevity/morbidity and calamity risks. Mortality/longevity/morbidity risk represents the risk of loss attributable to positive or negative changes in the assumed medical prognosis for life expectancy, occupational disability, illness and the need for long-term care as well as underestimation of these probabilities. Calamity risk represents the risk of loss because of strong short-term fluctuation in the mortality rate, for example as a result of war or epidemics.

The table below shows the concentration of actuarial liabilities by type of contract (with and without DPF).

	Gross			Reinsurance			Net RM'000

			<b>Note 13</b>			<b>Note 13</b>	<b>Note 13</b>

As all of the business is derived from Malaysia, the entire actuarial liabilities are in Malaysia. There is no investment contract issued by the Company during the current and previous financial years.

### 33. Insurance risk (continued)

#### Key assumptions

Significant judgement is required in determining the liabilities and in the choice of assumptions. Assumptions in use are based on past experiences, current internal data, external market indices and benchmarks which reflect current observable market prices and other published information. Assumptions and prudent estimates are determined at the date of valuation. They are further evaluated on a continuous basis in order to ensure realistic and reasonable valuations.

The key assumptions to which the estimation of liabilities is particularly sensitive are as follows:

- Mortality and morbidity rates

Experience study on mortality and morbidity rates is carried out on annual basis. The actual claim experience is compared against industrial mortality table and reinsurers' mortality and morbidity risk charges. Mortality and morbidity assumptions vary by product type and underwriting procedures.

The Company can adjust the mortality/morbidity risk charges in future years in line with emerging experience for investment-linked and universal life contracts.

An appropriate allowance for provision of risk margin for adverse deviation from expected experience is made in the valuation of non-participating life policies, the guaranteed benefits insurance liabilities of participating life policies, and non-unit actuarial liabilities of investment-linked policies.

- Expenses

Expense assumption was set during initial pricing stage. Expense assumption is reviewed annually to reflect inflation due to higher cost of underwriting, issuing and maintaining the policies. Expense assumption varies by premium term, distribution channel, policy duration and underwriting procedures. The expense assumption is compared to actual expense that the Company incurred.

An appropriate allowance for provision of risk margin for adverse deviation from expected experience is made in the valuation of non-participating life policies, the guaranteed benefits insurance liabilities of participating life policies, and non-unit actuarial liabilities of investment-linked policies.

### 33. Insurance risk (continued)

#### Key assumptions (continued)

The key assumptions to which the estimation of liabilities is particularly sensitive are as follows (continued):

- Persistency

Experience study on persistency (lapse, surrender, premium holiday, partial withdrawal) is carried out on annual basis using statistical method. Persistency assumptions vary by product type, distribution channel and policy duration.

An appropriate allowance for provision of risk margin for adverse deviation from expected experience is made in the valuation of non-participating life policies, the guaranteed benefits insurance liabilities of participating life policies, and non-unit actuarial liabilities of investment-linked policies.

- Discount rate

In the valuation of the total benefits insurance liabilities of participating life policies, the Company has assumed a long term gross rate of return of 3.75% - 5.75% per annum (2020: 3.75% - 5.75% per annum). The long term gross rate of return is derived based on a basket of strategic asset allocations. The Company calculates long term gross rate by assuming each asset class will earn the targeted yield. The strategic asset allocation and targeted yield are reviewed annually in accordance with the Company's framework.

Malaysian Government Securities ("MGS") spot rate is used in the valuation of non-participating life policies, the guaranteed benefits insurance liabilities of participating life policies, and non-unit actuarial liabilities of investment-linked policies.

Risk-free discount rate for durations of less than 15 years is based on zero-coupon spot yields of MGS with matching duration. Risk-free discount rate for durations of 15 years or more is based on zero-coupon spot yields of MGS with 15 years term to maturity. Duration in this context is referring to the term to maturity of each future cash flow. The MGS zero-coupon spot yields are obtained from a recognised bond pricing agency in Malaysia.

The valuation of actuarial liabilities as at 31 December 2021 has taken into account the COVID-19 impact.

Company No. 198301008983 (104248-X)
-------------------------------------

### 33. Insurance risk (continued)

#### Key assumptions (continued)

The assumptions that have significant effects on the gross actuarial liabilities and reinsurance assets are listed below.

Type of business	Mortality and morbidity rates		Lapse and surrender rates		Discount rate	
	2021 <sup>(2)</sup> %	2020 <sup>(1)</sup> %	2021 %	2020 %	2021 %	2020 %
<b>With fixed and guaranteed terms and with DPF contracts</b>						
Life insurance	60-100	60-70	3.0-20	3.0-20	3.75-5.75	3.75-5.75
<b>Without DPF contracts</b>					MGS spot yield	MGS spot yield
Life insurance	70-130	55-110	3.0-70	3.0-70		

(1) Industry mortality and morbidity experience tables that were observed in Malaysia between year 1999 and 2003 or the respective reinsurance risk rates.

(2) Industry mortality and morbidity experience tables that were observed in Malaysia between year 2011 and 2015 or the respective reinsurance risk rates.

Company No. 198301008983 (104248-X)
-------------------------------------

### 33. Insurance risk (continued)

#### Sensitivities

The analysis below is performed for possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities and profit after tax. Sensitivities testing on individual assumptions are meaningful to analyse the magnitude of reserve changes for each assumption. However, it should be studied with care as it does not capture the possible correlation effect when all assumptions are being stressed simultaneously. It should be noted that movements in these assumptions are non-linear. Sensitivity information will also vary according to the current economic assumptions.

	Change in assumptions	Impact on Profit after tax RM'000	Impact on Gross liabilities* RM'000	Impact on Net liabilities* RM'000
<b>Life insurance contracts</b>				
<b>2021</b>				
Mortality and morbidity rates	+5%	(2,337)	6,847	5,333
Discount rate	-0.5%	(10,667)	65,774	65,180
Expenses	+10%	(4,618)	9,763	9,763
Lapse and surrender rates	-10%	831	5,843	5,977
<b>2020</b>				
Mortality and morbidity rates	+5%	(4,220)	9,956	7,941
Discount rate	-0.5%	(13,325)	71,544	70,598
Expenses	+10%	(6,287)	12,034	12,034
Lapse and surrender rates	-10%	(639)	8,986	9,019

The method used and key assumptions made for deriving sensitivity information did not change from the previous year.

### 33. Insurance risk (continued)

#### Sensitivities (continued)

The above illustration is only prepared for “what if” adverse scenario, with the key assumptions applied towards unfavourable direction. In the sensitivity analysis above, changes in assumptions for life non-participating business would impact the profit after tax and insurance contract liabilities. In respect of life participating insurance business, it would only impact the insurance contract liabilities.

- \* The impact on gross and net liabilities only reflects the changes in the prescribed assumptions above without adjustment to policyholders’ bonuses for the life participating business. Impact on insurance contract liabilities also reflects adjustments for tax, where applicable.

### 34. Financial risks

Exposure to credit, liquidity and market (currency risk, interest rate risk, equity price risk) arises in the normal course of the Company’s business. The Company is guided by its risk management framework as well as policies and guidelines from the ultimate holding company, Allianz SE which sets out its general risk management philosophy. Through financial risk management, business strategies are evaluated to ensure alignment with the Company’s risk appetite and tolerance.

#### 34.1 Credit risk

Credit risk is the risk of a financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations or due to the non-performance of instruments (i.e. payment overdue). The Company’s exposure to credit risk arises principally from the reinsurance, insurance receivables and the investment/placement in fixed income instruments and bank balances. Financial loss may materialise when the counterparty failed to meet payment obligations for various reasons.

The Company has credit policies in place to mitigate the credit risk from underwriting of insurance business and it is monitored on an on-going basis. Reinsurance is mainly to local or offshore reinsurers, and if the Company has to place overseas, only counterparties that have a credit rating that is acceptable based on Allianz Guidelines for Reinsurance Security are used.

The Company’s Investment Mandate imposes limits by issuer/counterparty and by credit ratings for investments in corporate fixed income securities (all securities that entails credit risks, e.g. credit facilities, bank deposits of longer than 1-year, certificates of deposits, notes, etc.); and these limits are reviewed at least on annual basis. Active monitoring of the exposure against those limits are in place and reporting to RMWC, RMC and IC on a quarterly basis.

#### Credit exposure by credit rating

The table below provides information regarding the credit risk exposure of the Company by classifying financial assets according to the credit rating agencies' credit ratings of counterparties. AAA is the highest possible rating. Financial assets that fall outside the range of AAA to BBB are classified as non-investment grade. Assets which are not rated by rating agencies are classified as non-rated.

	← Neither past-due nor impaired →					Investment-linked funds	Past-due but not impaired	Total

Company No. 198301008983 (104248-X)
-------------------------------------

## 34. Financial risks (continued)

### 34.1 Credit risk (continued)

Credit risk analysis on the financial assets are not provided for the investment-linked funds. This is due to the fact that, in investment-linked funds, the liability to policyholders is linked to the performance and value of the assets that back those liabilities and the shareholders have no direct exposure to any credit risk in those assets.

#### (i) Past-due but not impaired financial assets

##### Ageing analysis of financial assets past-due but not impaired

The Company maintains an ageing analysis in respect of insurance receivables only. The ageing of insurance receivables that are past-due as at the reporting date but not impaired is as follows:

##### Insurance receivables

	1 to 90 days RM'000	91 to 180 days RM'000	Investment- linked funds RM'000	Total RM'000
2021	5,622	-	-	5,622
2020	6,156	-	-	6,156

Company No. 198301008983 (104248-X)
-------------------------------------

## 34. Financial risks (continued)

### 34.1 Credit risk (continued)

#### (ii) Past-due and impaired financial assets

At 31 December 2021, based on combination of collective and individual assessment of receivables, there are impaired insurance receivables amounting to RM2,902,000 (2020: RM2,449,000) and other receivables of RM796,000 (2020: RMnil). No collateral is held as security for any past-due or impaired financial assets. The Company records impairment allowance for insurance receivables and other receivables in separate allowance for impairment accounts. A reconciliation of the allowance for impairment loss for the aforesaid insurance receivables and other receivables are as follows:

	Insurance receivables		Other receivables	
	2021 RM'000	2020 RM'000	2021 RM'000	2020 RM'000
<b>At 1 January</b>	2,449	3,949	-	3,148

	<b>Note 8</b>	<b>Note 8</b>	<b>Note 9</b>	<b>Note 9</b>

## 34. Financial risks (continued)

### 34.2 Liquidity risk

Liquidity risk is the risk of loss resulting from the danger that short-term current or future payment obligations cannot be met or can only be met on the basis of altered conditions, along with the risk that in the case of a liquidity crisis of the Company, refinancing is only possible at higher interest rates or that assets may have to be liquidated at a discount.

Besides monitoring the liquidity position of the Company on a daily basis, the investment strategies particularly focus on the quality of investments and ensure a sufficient portion of liquid assets in the portfolio. Some other tools used by the Company include to ensure that its assets and liabilities are adequately matched and drawing down of funds to meet claim payments should the claim events exceed a certain amount as provided for in the reinsurance contracts.

#### **Maturity profiles**

The table below summarises the maturity profile of the Company's financial liabilities as at the end of the reporting period based on remaining undiscounted contractual obligations, including interest/profit payable.

For insurance contract liabilities, maturity profiles are determined based on estimated timing of net cash outflows from the recognised insurance liabilities.

Investment-linked liabilities are repayable or transferable on demand and are included in the "up to a year" column. Repayments which are subject to notice are treated as if notice were to be given immediately.

## 34. Financial risks (continued)

### 34.3 Market risk

Market risk is the risk of loss arising due to changes in market prices or parameters influencing market prices, and in particular the resultant interest rate guarantee risks from asset liability management or from changes to the participations. This includes changes in market prices due to a worsening of market liquidity. Market risk comprises currency risk, interest rate risk and equity price risk.

The following risk mitigation actions are in place to control and monitor such risk:

- Investment Committee actively monitors the investment activities undertaken by the Company.
- Investment Committee would make recommendations after balancing competing and legitimate objective of various stakeholders.
- The Investment Policy and Mandate which formulated the single counterparty limits, company limits and sector limits are in place. Compliance to such limits is monitored monthly and reported to RMWC, RMC and IC on a quarterly basis.
- Stress testing is performed as and when needed.
- Stop loss policy is in place.

The Company also issues investment-linked policies in a number of products. In the investment-linked business, the policyholders bear the investment risk on the assets held in the investment-linked funds as the policy benefits are directly linked to the value of the assets in the funds. The Company's exposure to market risk on this business is limited to the extent that income arising from fund management charges is based on the value of the assets in the funds.

## 34. Financial risks (continued)

### 34.3 Market risk (continued)

#### 34.3.1 Currency risk

Currency risk is the risk arising from the fluctuation of foreign exchange rates.

The Company's primary transactions are carried out in Ringgit Malaysia (RM) and its exposure to foreign exchange risk arises principally with respect to US Dollar (USD), Singapore Dollar (SGD), Thai Baht (THB) and Indonesian Rupiah (IDR). As the Company's business is conducted primarily in Malaysia, the Company's financial assets are also primarily maintained in Malaysia as required under the Financial Services Act, 2013 and hence, primarily denominated in the same currency (RM) as its insurance contract liabilities. Thus the main foreign exchange risk from recognised assets and liabilities arises from transactions other than those in which insurance contract liabilities are expected to be settled.

As the Company's main foreign exchange risk from recognised assets and liabilities arises from reinsurance transactions for which the balances are expected to be settled and realised in less than a year, the impact arising from sensitivity in foreign exchange rates is deemed minimal as the Company has no significant concentration of foreign currency risk. All currency risk in investment-linked funds is borne by policyholders.

#### Exposure to foreign currency risk

The Company's exposure to foreign currency risk, based on carrying amounts as at the end of the reporting period was:

<b>2021</b>		<b>Investment-linked</b>
<b>Financial assets</b>	<b>Life fund</b>	<b>funds</b>
	<b>RM'000</b>	<b>RM'000</b>
<b>Denominated in</b>		
USD	102,924	149,714
SGD	-	20,903
THB	-	11,963
IDR	-	37,789
	<hr/>	<hr/>

## 34. Financial risks (continued)

### 34.3 Market risk (continued)

#### 34.3.1 Currency risk (continued)

##### Exposure to foreign currency risk (continued)

2020 Financial assets	Life fund RM'000	Investment-linked funds RM'000
<b>Denominated in</b>		
USD	124,853	9,794
SGD	-	1,002
THB	-	51
IDR	-	19,175
	-	19,175

##### Currency risk sensitivity analysis

It is estimated that a 10% (2020:10%) strengthening of the Ringgit Malaysia (RM) against the following currencies at the end of the reporting period would have decreased the insurance contract liabilities by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remained constant and ignores any impact of forecasted income and expenses.

Denominated in	Impact on insurance contract liabilities 2021 RM'000	Impact on insurance contract liabilities 2020 RM'000
USD	(25,264)	(13,465)
SGD	(2,090)	(100)
THB	(1,196)	(5)
IDR	(3,779)	(1,918)
	(33,329)	(15,488)

It is estimated that a 10% (2020:10%) weakening of the Ringgit Malaysia (RM) against the above currencies at the end of the reporting period would have equal but opposite effect on the above currencies to the amount shown above, on the basis that all variables remained constant.

The method used for deriving sensitivity information and significant variables did not change from previous year.

Only Life Participating fund and investment-linked funds invested in foreign financial instruments.

Company No. 198301008983 (104248-X)
-------------------------------------

## 34. Financial risks (continued)

### 34.3 Market risk (continued)

#### 34.3.2 Interest rate risk

The Company is affected by changes in market interest rate due to the change in interest rates that will affect the value of mark to market fixed income investments and also the valuation of the liabilities, resulting in the risk of not being able to meet product guarantees.

Besides the uncertainty of the cash flows of the insurance funds and scarcity of the longer dated instruments, it is not possible to hold assets that will perfectly match the policy liabilities.

#### Interest rate risk sensitivity analysis

The analysis below is performed for assumed movements of 100 bps in interest rate with all other variables held constant, showing the impact on the profit after tax, equity and insurance contract liabilities.

	Change in variables	Impact on profit after tax RM'000	Impact on equity* RM'000	Impact on insurance contract liabilities** RM'000
<b>2021</b>				
Interest rate	+100 basis points	(137,492)	(110,432)	(508,565)
Interest rate	-100 basis points	148,227	118,972	577,224
<b>2020</b>				
Interest rate	+100 basis points	(125,482)	(103,147)	(476,094)
Interest rate	-100 basis points	136,512	112,158	546,660

Company No. 198301008983 (104248-X)

## 34. Financial risks (continued)

### 34.3 Market risk (continued)

#### 34.3.2 Interest rate risk (continued)

##### Interest rate risk sensitivity analysis (continued)

The impact on profit after tax would be dependent on whether the interest rate risk resides in Shareholders' fund, Life Non-Participating insurance fund, Life Participating insurance fund or investment-linked funds. Where the interest rate risk resides in Shareholders' fund and Life Non-Participating fund, the profit after tax and equity of the Company will be impacted. In respect of Life Participating fund and investment-linked funds, impact arising from changes in interest rate risk will affect the insurance contract liabilities. It should be noted that movements in these variables are non-linear.

\* The impact on equity reflects adjustments for tax, where applicable.

\*\* The impact on insurance contract liabilities only reflects the changes in the prescribed assumptions above without any adjustments to policyholders' bonuses for the participating insurance business. Impact on insurance contract liabilities also reflects adjustments for tax, where applicable.

The method used for deriving sensitivity information and significant variables did not change from the previous year.

Company No. 198301008983 (104248-X)
-------------------------------------

## 34. Financial risks (continued)

### 34.3 Market risk (continued)

#### 34.3.3 Equity price risk

Equity price risk is the risk that fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate or currency risk), whether those changes are caused by factors specific to the individual financial instrument of its issuer or factors affecting similar financial instruments traded in the market.

The Company's equity price risk exposures relate to financial assets and financial liabilities whose values will fluctuate as a result of changes in market prices, principally with respect to investment securities not held for the account of the investment-linked business.

The Company's equity price risk policy requires it to prioritise capital preservation besides setting limits on overall portfolio, single security and sector holdings. The Company complies with BNM stipulated limits during the financial year and has no significant concentration of equity price risk.

#### Equity price risk sensitivity analysis

The analysis below is performed for reasonable possible movements in key variables with all other variables held constant, showing the impact on profit after tax, equity and insurance contract liabilities. The correlation of variables will have a significant effect in determining the ultimate impact on equity price risk, but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear.

	Changes in variable	2021			2020		
		Impact on profit after tax# RM'000	Impact on equity* RM'000	Impact on insurance contract liabilities** RM'000	Impact on profit after tax# RM'000	Impact on equity* RM'000	Impact on insurance contract liabilities** RM'000
<b>Market indices</b>							
Market value	-10%	-	-	(269,970)	-	-	(234,803)
Market value	+10%	-	-	269,970	-	-	234,803

Company No. 198301008983 (104248-X)

## 34. Financial risks (continued)

### 34.3 Market risk (continued)

#### 34.3.3 Equity price risk (continued)

##### Equity price risk sensitivity analysis (continued)

- # The impact on profit after tax would be dependent on whether the equity price risk resides in Shareholders' fund, Life Non-Participating insurance fund, Life Participating insurance fund or investment-linked funds. Where the equity price risk resides in Shareholders' fund and Life Non-Participating fund, the profit after tax and equity of the Company will be impacted. In respect of life participating fund and investment-linked funds, impact arising from changes in equity price risk will affect the insurance contract liabilities.
- \* The impact on equity reflects adjustments for tax, where applicable.
- \*\* The impact on insurance contract liabilities only reflects the changes in the prescribed assumptions above without any adjustments to policyholders' bonuses for the participating insurance business. Impact on insurance contract liabilities also reflects adjustments for tax, where applicable.

The method used for deriving sensitivity information and significant variables did not change from the previous year.

Only Life Participating fund, universal life fund and investment-linked funds invested in equity securities.

## 34. Financial risks (continued)

### 34.4 Fair value of financial instruments

The Company's basis in estimation of fair values for financial instruments is as follows:

- The fair values of structured deposits, negotiable certificate of deposits, collateralised interest rate swap, forward purchase agreements and cross currency swap are based on the indicative market prices from the issuing banks;
- The fair values of quoted equity securities of corporations in and outside Malaysia and quoted unit trusts in Malaysia are based on quoted market bid price as at the end of the reporting period;
- The unquoted equity securities of corporations in Malaysia are stated at cost. Where in the opinion of the Directors, there is a decline other than temporary in value of unquoted equity securities, the allowance for impairment is recognised as an expense in the financial year in which the decline is identified;
- The fair values of Malaysian government securities, Malaysian government guaranteed bonds, unquoted bonds of corporations in and outside Malaysia are based on the indicative market prices provided by its custodian bank;
- The fair values of unquoted unit trusts in and outside Malaysia are based on the net asset values of the unit trusts as at the date of the statements of assets and liabilities obtained from fund managers;
- The carrying amount of policy loans, mortgage loans, automatic premium loans, fixed and call deposits approximate their fair values; and

## **34. Financial risks (continued)**

### **34.4 Fair value of financial instruments (continued)**

- The carrying amounts of cash and cash equivalents, insurance receivables, other receivables and deposits (current), insurance payables and other payables (current) and accruals reasonably approximate their fair values due to the relatively short term nature of these financial instruments.

Estimation of the fair values of Malaysian government securities, Malaysian government guaranteed bonds, unquoted bonds of corporations in and outside Malaysia are based on the indicative market prices provided by its custodian bank which involve projections of the market yields based on past transactions. There are elements of uncertainty in projecting the expected market yields and these uncertainties arise from changes in underlying risk and overall economic conditions. As such, the projected market yields may be different from the actual market yields in future.

It was not practicable to estimate the fair value of the Company's investment in unquoted equity securities of corporations in Malaysia due to lack of comparable quoted market prices and inability to estimate fair value without incurring excessive costs.

Company No. 198301008983 (104248-X)

## 35. Capital management

### Regulatory capital requirements

Under Risk-Based Capital Framework for Insurers (“RBC Framework”) issued by BNM, insurance companies need to maintain a capital adequacy level that commensurate with their risk profiles. All insurance companies are required to maintain a minimum Capital Adequacy Ratio (“CAR”) of 130% and an internal target capital level required by BNM or level determined under the Internal Capital Adequacy Assessment Process. The internal target will include additional capacity to absorb unexpected losses beyond those that are covered under the minimum required CAR.

The Company has been in compliance with the said requirement by maintaining a CAR that is in excess of minimum requirement.

The total capital available of the Company as at 31 December 2021, as prescribed under the RBC Framework is provided below:

	Note	2021 RM'000	2020 RM'000
<b>Tier 1 Capital</b>			
Paid up share capital	11	236,600	236,600
Reserves, including retained earnings		<u>2,097,600</u>	<u>1,806,116</u>
		<u>2,334,200</u>	<u>2,042,716</u>
<b>Tier 2 Capital</b>			
Revaluation reserve		9,883	9,883
Available-for-sale reserve		239,944	369,097
Other reserve		<u>7,211</u>	<u>15,526</u>
		<u>257,038</u>	<u>394,506</u>
<b>Amount deducted from capital</b>		(41,442)	(39,860)
<b>Total capital available</b>		<u><u>2,549,796</u></u>	<u><u>2,397,362</u></u>

Company No. 198301008983 (104248-X)
-------------------------------------

### 36. Insurance funds

The Company's activities are organised by funds and segregated into Life and Shareholders' funds in accordance with the Financial Services Act, 2013.

The Company's statement of financial position and statement of profit or loss have been further analysed by funds.

The life insurance business offers a wide range of participating and non-participating Whole life, Term assurance, Endowment, as well as investment-linked products.

#### Statement of financial position by funds as at 31 December

	Shareholders' fund		Life fund		Total	
	2021 RM'000	2020 RM'000	2021 RM'000	2020 RM'000	2021 RM'000	2020 RM'000

### **37. Amendments to MFRS 4 - Applying MFRS 9, *Financial Instruments with MFRS 4, Insurance Contracts***

MFRS 9 replaces the guidance in MFRS 139, *Financial Instruments: Recognition and Measurement* on the classification and measurement of financial assets and financial liabilities and on hedge accounting, effective for annual periods beginning on or after 1 January 2018.

The Company has applied the temporary exemption under Amendments to MFRS 4 - Applying MFRS 9, *Financial Instruments with MFRS 4, Insurance Contracts* ("the Amendments") which enables eligible entities to defer the implementation date of MFRS 9 to annual periods beginning before 1 January 2023 at the latest. Hence, the Company has not adopted MFRS 9 for the financial year beginning on or after 1 January 2018.

The Amendments allow entities to avoid temporary volatility in profit or loss that might result from adopting MFRS 9, *Financial Instruments* before the forthcoming new insurance contracts standard.

The Amendments provide 2 different approaches for the Company:

- (i) temporary exemption from MFRS 9 for entities that meet specific requirements; and
- (ii) the overlay approach. Both approaches are optional

The temporary exemption enables eligible entities to defer the implementation date of MFRS 9 to annual periods beginning before 1 January 2023 at the latest. An entity may apply the temporary exemption from MFRS 9 if its activities are predominantly connected with insurance whilst the overlay approach allows an entity to adjust profit or loss for eligible financial assets by removing any accounting volatility to other comprehensive income that may arise from applying MFRS 9.

The Company's business activity is predominantly insurance as the liabilities connected with the Company's insurance businesses made up of more than 90% of the Company's total liabilities. Hence, the Company qualifies for the temporary exemption from applying MFRS 9 and will defer and adopt MFRS 9 together with MFRS 17, *Insurance Contracts* for the financial year beginning on or after 1 January 2023.

### 37. Amendments to MFRS 4 - Applying MFRS 9, *Financial Instruments with MFRS 4, Insurance Contracts* (continued)

The following additional disclosures, required by Amendments to MFRS 4 for entity qualified and elected the temporary exemption from applying MFRS 9, present the Company's financial assets by their contractual cash flows characteristics, which indicate if they are solely payments of principal and interest on the principal outstanding ("SPPI"):

Fair value as at 31 December 2021	Financial assets with SPPI cash flows RM'000	All other financial assets RM'000	Total* RM'000
Investments (Note 6)	2,396,462	11,993,159	14,389,621

INDEPENDENT AUDITORS' REPORT  
TO THE MEMBERS OF ALLIANZ LIFE INSURANCE MALAYSIA BERHAD  
(Incorporated in Malaysia)  
(Company No. 198301008983 (104248-X))

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Our opinion

In our opinion, the financial statements of Allianz Life Insurance Malaysia Berhad (“the Company”) give a true and fair view of the financial position of the Company as at 31 December 2021 and of its financial performance and its cash flows for the year then ended in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

What we have audited

We have audited the financial statements of the Company, which comprise the statement of financial position as at 31 December 2021, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 38 to 181.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the “Auditors’ responsibilities for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

*Independence and other ethical responsibilities*

We are independent of the Company in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants (“By-Laws”) and the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (International Independence Standards) (“IESBA Code”), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

(CONTINUED)  
(Incorporated in Malaysia)  
(Company No. 198301008983 (104248-X))

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Information other than the financial statements and auditors' report thereon

The directors of the Company are responsible for the other information. The other information comprises Directors' Report but does not include the financial statements of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial statements

The directors of the Company are responsible for the preparation of the financial statements of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The directors are also responsible for such internal control as the directors determine is necessary to enable the preparation of financial statements of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Company, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- (d) Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Company, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
