- Fund charges:

Types of Fund	Fund Management Charge
Allianz Life Equity Fund	1.50% per annum
Allianz Life Managed Fund	1.25% per annum
Allianz Life Dynamic Growth Fund	1.50% per annum
Allianz Life Equity Income Fund	1.35% per annum
Allianz Life Bond Fund	0.75% per annum
Allianz Life Dana Padu Fund	1.50% per annum
Allianz Life Amanah Dana Ikhlas Fund	1.35% per annum
Allianz Life ASEAN Plus Fund	1.50% per annum

The charges stated above are the maximum charges that We can impose. The actual Fund Management Charge will vary in according to the actual asset mix of the fund if the fund is invested in more than one investment instrument. The Fund Management Charge will be reviewed by Us no less frequent than quarterly basis. The Company reserves the right to vary the maximum Fund Management Charge by giving the Policy Owner at least three (3) months prior written notice.

- Although the funds may invest in Shariah-compliant assets, ALIM's insurance plan is not a Shariah-compliant product.
- Other charges include but not limited to government tax, auditor fee, custodian fee & transaction charge.
- The price per unit of the fund is the total market value of assets in the fund divided by the total number of units of the fund. To ensure fair treatment to all unit holders, transaction costs of acquiring and disposing of assets of the fund are recouped by making a dilution or transaction cost adjustment to the NAV per unit of the fund.
- The price per unit of the fund is calculated on daily basis.

Investment Alert

- Investments in the funds are not obligations of deposits or guaranteed by the Company.
- The performance of the funds is not guaranteed and the value of the units and the income derived therefrom may increase or decrease.
- Past returns and any forecast is not necessarily a guide to future performance.
- The Company does not warrant or make any representations that the funds will guarantee profits or not result in losses.
- Before deciding to invest in the funds, Policy Owner should carefully consider their investment objectives, level of experience and risk appetite.
- Policy Owner should be aware of all the risks associated with fluctuations in an investment-linked fund and are advised to seek the advice of a financial advisor/consultant before making any investment. In the event that the Policy Owner chooses not to seek advice from a financial advisor before investing in the fund, he should consider whether the fund is suitable for him.
- The Company disclaims any and all liabilities against loss, damages etc direct, indirect or consequential as a result of the Policy Owner's reliance of the fact sheet.

Notes

- The Policy Owner should be aware that reference to past experience is appropriate but the actual experience could be different.
- Investment risks under the Policy will be borne solely by the Policy Owner.
- The nature of risk changes according to the investment horizon. Equities are risky when the investment is short. However, fixed income securities / money market instruments will be risky when the investment horizon lengthens due to the erosion effect as a result of inflation.
- The Company reserves the right to suspend issuance or redemption of units under exceptional circumstances such as temporary closure of any stock exchange in which the fund is invested, during any period when assets in a fund cannot be valued or other circumstances when the Company, in its discretion, may consider exceptional.

- The performance is calculated in Ringgit Malaysia on a NAV-to-NAV basis¹. It is strictly the performance of the investment fund and not the returns earned on the actual premiums paid of the investment-linked product.

- The basis of calculation of past performance is as follows:

$$R_{20xx} = \frac{(UP_{31 \text{ December } 20xx} - UP_{31 \text{ December } 20xx-1})}{UP_{31 \text{ December } 20xx-1}} \times 100\%$$

Where:

- R_{20xx} is the rate of return
- $UP_{31 \text{ December } 20xx}$ is the price per unit as at 31st December 20xx
- $UP_{31 \text{ December } 20xx-1}$ is the price per unit as at 31st December 20xx-1
- Brief description of the types of risk referred to in this fact sheet are:

Market Risk – The value of the Fund's investment assets may be affected by changes in economic fundamentals, interest rate movement, regulatory policy, political and industrial developments. These market factors may result in fluctuations in the value of the Fund's investment assets. This risk may be mitigated by ensuring a rigorous review of macroeconomic factors and asset allocation strategy.

Currency Risk – For foreign investment, fluctuations in currency exchange rates may have an impact on the value of the Fund's investment assets. This risk may be minimized by engaging in foreign currency hedging.

Country/Foreign Investment Risk – This risk refers to the risks of investing in foreign markets. The value of the foreign investment assets directly or indirectly held by the Fund may be affected by country-specific factors, such as the country's economic fundamentals, social and political stability and regulatory policy. This risk may be mitigated by ensuring a rigorous review of macroeconomic factors and asset allocation strategy.

Specific Security Risk – The value of the assets in particular securities and money market instruments may be affected by company-specific factors, such as business situation, financial condition and corporate governance of the company. This risk may be minimized through diversification of investments in a wide scope of companies belonging to a multitude of sectors.

Sector Risk – The value of the Fund's investment assets may be adversely affected by the changes in sector-specific factors, such as the business condition, industry outlook and demand/supply dynamic of the industry. This risk may be minimized through portfolio diversification and control on sector concentration risk.

Interest Rate Risk – Interest rate risk arises when the value of the securities fluctuates due to interest rate movement. As prices of bonds move inversely with the interest rates, prices of bonds will decline when interest rate rise and vice-versa. Debt securities with longer maturity and lower coupon rate are more sensitive to interest rate changes. This risk may be mitigated by rigorous review of asset allocation and duration strategy.

Credit Risk – The creditworthiness (solvency and willingness to pay) of the issuer of a fixed income security, counterparty to a derivative contract or money market instrument may subsequently fall. This usually leads to a decrease in the price of the asset greater than that caused by general market fluctuations. This risk is minimized through portfolio diversification, stringent credit selection and control on sector concentration risk.

Liquidity Risk – If an asset has insufficient liquidity, there is the risk that the asset cannot be sold or can only be sold at a significant discount to the purchase price. The lack of liquidity of an asset may cause its purchase price to increase significantly. The risk is managed by including liquidity factor into security selection and further mitigated by diversification.

Dividend Policy Risk – This risk may occur when there is a significant deterioration in a company's business or if there is a change in management policy resulting in a reduction or removal of the company's dividend policy. Such risk is particularly relevant to a fund that focuses largely on dividend yielding stocks. This risk can be mitigated by investing mainly in companies with consistent historical record of paying dividends, companies operating in fairly stable industries or companies with strong cash flows.

Risk of Non-Compliant with Shariah Requirements - For Shariah-approved funds, there is the risk that the fund may hold securities which are Shariah non-compliant due to:

- 1) "Shariah-compliant securities" which are subsequently considered "Shariah non-compliant"; and
- 2) Investment in Shariah non-compliant securities.

The risk of Shariah non-compliant is mitigated by regular review of the Fund's compliance with the list of securities approved by the Shariah Advisory Council of the Securities Commission.

¹ The performance for Allianz Life Amanah Dana Ikhlas Fund and Allianz Life Equity Income Fund is calculated in Ringgit Malaysia on a NAV-to-NAV basis with gross dividends reinvested.

Dana ASEAN Plus Allianz Life

1. Objektif Pelaburan	Satu dana pelaburan terbuka yang bertujuan untuk menyediakan peningkatan modal jangka masa sederhana sehingga panjang dengan melabur terutamanya dalam ekuiti dan sekuriti berkaitan ekuiti ASEAN.
2. Pendekatan & Strategi Pelaburan	<p>Pelaburan merupakan gabungan yang berikut:</p> <ul style="list-style-type: none"> - Analisis atas ke bawah persekitaran makro ekonomi untuk menentukan pengagihan aset dan strategi pendedahan sektor; dan - Analisis bawah ke atas rapi yang termasuk analisis nilai dan analisis kewangan; memilih stok individu untuk menjana pulangan alfa.

Nota-nota

- Pemegang Polisi harus sedar bahawa walaupun rujukan kepada pengalaman lampau adalah perlu, pengalaman yang sebenar mungkin berlainan.
- Risiko pelaburan dalam Polisi ini akan ditanggung sepenuhnya oleh Pemegang Polisi.
- Pertukaran sifat risiko bergantung kepada lingkungan pelaburan. Ekuiti adalah lebih berisiko apabila lingkungan pelaburan pendek. Tetapi, sekuriti pendapatan tetap dan instrumen pasaran wang akan lebih berisiko apabila lingkungan pelaburan dipanjangkan disebabkan oleh kesan hakis akibat inflasi.
- Pihak Syarikat mempunyai hak untuk menggantungkan pengeluaran atau penebusan unit-unit di bawah keadaan luar biasa seperti penutupan sementara sebarang bursa saham di mana dana dilabur, tempoh masa di mana aset dalam dana tidak boleh dinilai atau keadaan lain di mana pihak Syarikat, pada budi bicaranya, dianggap luar biasa.

• Caj-caj dana:

Jenis-jenis Dana	Caj Pengurusan Dana
Dana Ekuiti Allianz Life	1.50% setahun
Dana Terurus Allianz Life	1.25% setahun
Dana Pertumbuhan Dinamik Allianz Life	1.50% setahun
Dana Pendapatan Ekuiti Allianz Life	1.35% setahun
Dana Bon Allianz Life	0.75% setahun
Dana Padu Allianz Life	1.50% setahun
Allianz Life Amanah Dana Ikhlas	1.35% setahun
Dana ASEAN Plus Allianz Life	1.50% setahun

Caj-caj yang dinyatakan di atas adalah caj maximum yang boleh Kami kenakan. Caj Pengurusan Dana sebenar akan berbeza mengikut campuran aset sebenar dana jika dana dilaburkan dalam lebih daripada satu instumen pelaburan. Caj Pengurusan Dana akan Kami kaji semula tidak kurang daripada setiap suku tahun. Syarikat mempunyai hak untuk menpelbagaikan Caj maksimum Pengurusan Dana dengan memberikan Pemegang Polisi sekurang-kurangnya tiga (3) bulan notis secara bertulis terlebih dahulu.

- Walaupun dana-dana tersebut mungkin melabur dalam aset patuh Syariah, pelan insurans ALIM bukan merupakan produk patuh Syariah.
- Caj-caj lain termasuk tetapi tidak terhad kepada cukai kerajaan, caj juruaudit, caj kustodian & caj transaksi.
- Harga per unit dana adalah jumlah nilai pasaran aset di dalam dana yang dibahagikan dengan jumlah unit dana. Untuk memastikan rawatan yang saksama kepada semua pemegang unit, kos urusniaga untuk memperoleh dan melupuskan aset dana diperolehi dengan membuat pelarasian atau pelarasian kos transaksi kepada NAV seunit dana.
- Harga per unit dana dikira setiap hari.

Amaran pelaburan

- Pelaburan dana tidak boleh dianggap sebagai kewajipan deposit, atau dijamin Syarikat.
- Prestasi dana tidak terjamin dan nilai unit serta pendapatan dana mungkin bertambah ataupun berkurang.
- Pulangan masa dahulu dan sebarang ramalan tidak semestinya tepat digunakan sebagai panduan untuk meramal prestasi masa hadapan.
- Syarikat tidak memberi jaminan atau membuat sebarang gambaran bahawa dana-dana tersebut akan menjaminkan keuntungan atau tidak akan menyebabkan kerugian.
- Sebelum membuat keputusan untuk melabur dalam dana-dana berkenaan, Pemegang Polisi haruslah mempertimbangkan matlamat pelaburan, pengalaman, serta tahap toleransi risiko mereka dengan teliti.
- Pemegang Polisi haruslah mengetahui segala risiko terlibat yang mempengaruhi turun naik harga dana berkaitan-pelaburan dan dinasihat supaya mendapatkan nasihat daripada perunding/penasihat kewangan sebelum membuat sebarang pelaburan. Sekiranya beliau memilih untuk tidak mendapatkan nasihat daripada penasihat kewangan sebelum melabur dalam dana, beliau haruslah mempertimbangkan sama ada dana yang dipilih bersesuaian dengan matlamat pelaburannya.
- Syarikat menolak sebarang dan segala tanggungan terhadap kerugian, sama ada secara langsung, tidak langsung atau yang diakibatkan oleh ketergantungan Pemegang Polisi terhadap lembaran fakta.

• Prestasi dikira dengan Ringgit Malaysia berdasarkan asas NAV-to-NAV¹. Ia adalah sesungguhnya prestasi dana pelaburan dan bukan pulangan yang diperolehi daripada premium sebenar yang dibayar dalam produk berkaitan-pelaburan.

• Asas pengiraan prestasi masa lalu adalah seperti berikut:

$$R_{20xx} = \frac{(UP_{31 \text{ Disember } 20xx} - UP_{31 \text{ Disember } 20xx-1})}{UP_{31 \text{ Disember } 20xx-1}} \times 100\%$$

Di mana:

- R_{20xx} ialah kadar pulangan
- $UP_{31 \text{ Disember } 20xx}$ ialah harga unit pada 31 Disember 20xx
- $UP_{31 \text{ Disember } 20xx-1}$ ialah harga unit pada 31 Disember 20xx-1

¹ Prestasi Allianz Life Amanah Dana Ikhlas dan Dana Pendapatan Ekuiti Allianz Life dikira dengan Ringgit Malaysia berdasarkan asas NAV-to-NAV dengan dividen kasar yang dilaburkan semula.

- Huriaian ringkas mengenai jenis-jenis risiko yang dirujuk dalam lembaran fakta ini adalah:

Risiko Pasaran – Nilai aset pelaburan Dana mungkin dipengaruhi oleh perubahan asas-asas ekonomi, pergerakan kadar faedah, dasar pengawalseliaan, keadaan politik dan pembangunan industri. Faktor-faktor pasaran ini mungkin mengakibatkan turun-naik dalam nilai aset pelaburan Dana. Risiko ini mungkin boleh dikurangkan dengan penilaian yang rapi tentang faktor-faktor makro ekonomi dan strategi pengagihan aset.

Risiko Mata Wang – Bagi pelaburan asing, turun-naik dalam kadar pertukaran mata wang mungkin membawa kesan terhadap nilai aset pelaburan Dana. Risiko ini mungkin dapat diminimumkan melalui penglibatan dalam lindungan nilai pertukaran mata wang asing.

Risiko Pelaburan Negara/Pelaburan Asing – Risiko ini merujuk kepada risiko melabur dalam pasaran asing. Nilai aset pelaburan asing yang dimiliki oleh Dana adalah secara langsung atau tidak langsung dipengaruhi oleh faktor khusus sesebuah negara, seperti asas ekonomi negara, kestabilan sosial dan politik dan dasar pengawalseliaan. Risiko ini boleh dikurangkan dengan memastikan penilaian yang rapi tentang faktor makro ekonomi dan strategi pengagihan aset.

Risiko Keselamatan Khusus – Nilai aset khususnya dalam sekuriti dan instrumen pasaran wang mungkin dipengaruhi oleh faktor khusus syarikat, seperti keadaan perniagaan, keadaan kewangan dan pentadbiran korporat syarikat itu. Risiko ini boleh diminimumkan melalui kepelbagaian pelaburan dalam raung lingkup yang luas dari syarikat milik pelbagai sektor.

Risiko Sektor – Nilai aset pelaburan Dana mungkin terjejas teruk oleh perubahan dalam faktor khusus sektor seperti keadaan perniagaan, pandangan industri dan permintaan/pembekalan industri yang dinamik ini. Risiko ini mungkin boleh diminimumkan dengan mempelbagaikan portfolio dan mengawal risiko penumpuan sektor.

Risiko Kadar Faedah – Risiko kadar faedah timbul apabila turun-naik nilai sekuriti yang berpunca daripada pergerakan kadar faedah. Apabila harga bon bergerak secara bertentangan dengan kadar faedah, harga bon akan merosot manakala kadar faedah meningkat atau sebaliknya. Sekuriti hutang yang mempunyai tempoh matang yang lebih panjang dan kadar kupon yang lebih rendah adalah lebih peka terhadap perubahan kadar faedah. Risiko ini boleh mungkin boleh dikurangkan dengan penilaian yang rapi ke atas pengagihan aset dan strategi tempoh masa.

Risiko Kredit – Kebolehpercayaan kredit (kemampuan membayar dan kesanggupan untuk membayar) bagi penerbit suatu sekuriti pendapatan tetap, rakan niaga kepada kontrak derivatif atau instrumen pasaran wang mungkin kemudiannya jatuh. Ini biasanya membawa kepada penurunan dalam harga aset yang lebih besar daripada yang disebabkan oleh turun-naik pasaran umum. Risiko ini diuruskan dengan mempelbagaikan portfolio, pilihan kredit yang ketat dan mengawal risiko penumpuan sektor.

Risiko Kecairan – Sekiranya aset tidak mempunyai kecairan yang secukupnya, risiko aset berkenaan tidak boleh dijual atau hanya boleh dijual pada harga diskau kepada harga pembelian akan timbul. Kekurangan kecairan aset mungkin menyebabkan harga belian meningkat dengan ketara. Risiko ini diuruskan dengan termasuk faktor kecairan ke pemilihan keselamatan dan selanjutnya dikurangkan dengan mempelbagaikan porfolio.

Risiko Dividen Polisi – Risiko ini mungkin berlaku apabila terdapatnya kemerosotan ketara dalam perniagaan sesebuah syarikat atau sekiranya ada terdapat satu perubahan dalam polisi pengurusan yang mengakibatkan satu pengurangan atau penyingkiran polisi dividen syarikat. Risiko sedemikian adalah relevan kepada satu dana yang menumpukan sebahagian besar ke atas saham yang menghasilkan dividen. Risiko ini boleh dikurangkan dengan melabur terutamanya dalam syarikat yang mempunyai rekod sejarah yang membayar dividen secara konsisten, syarikat yang beroperasi dalam industri yang agak stabil atau syarikat yang mempunyai aliran tunai yang kukuh.

Risiko Ketidakpatuhan Syarat Syariah – Untuk Dana yang diluluskan Syariah, terdapat risiko bahawa Dana tersebut mungkin memegang sekuriti yang tidak patuh kepada Syarat Syariah disebabkan oleh:

- 1) 'sekuriti patuh Syariah' yang kemudiannya dianggap sebagai 'tidak mematuhi Syariah'; dan
- 2) pelaburan dalam sekuriti yang tidak mematuhi Syariah.

Risiko ketidakpatuhan Syariah dikurangkan dengan semakan pematuhan Dana secara tetap terhadap senarai sekuriti yang diluluskan oleh Majlis Penasihat Syariah Suruhanjaya Sekuriti.
