- Target Fund Subscription/Redemption Time Lapse Risk

7. Information on the Target Fund

Relevant Information of the Allianz All China Equity

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz All China Equity
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Allianz Global Investors Asia Pacific
Fund Currency	USD
Fund Inception Date	5 December 2017
Investment Objective	The Target Fund aims at long-term capital growth by investing in onshore and offshore PRC, Hong Kong and Macau equity markets.
Investment Strategy & Approach	<p>The Target Fund adopts an investment process that is based on fundamental, bottom-up stock selection to generates a portfolio of high-conviction ideas. Combination of stock selection overlaid with effective risk management, is the key driver of its risk and return. The Target Fund primarily invests in companies listed on the stock exchanges of Hong Kong, Shanghai, Shenzhen and the US (for ADR's). A minimum of 70% of Target Fund assets are invested in onshore and offshore PRC, Hong Kong and Macau equity markets. Target Fund assets may be invested in emerging markets. A maximum of 100% of Target Fund assets may be invested into the China A-Shares market either directly through Stock Connect or indirectly through eligible instruments. A maximum of 69% of Target Fund assets may be invested via RMB Qualified Foreign Institutional Investor (RQFII).</p> <p>The Target Fund may invest in securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in Undertaking For The Collective Investment in Transferable Securities ("UCITS") and other Undertaking For Collective Investments ("UCIs"). The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.</p>

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the absolute Value-at-Risk approach. The expected level of leverage of derivatives is 0-2. The expected level of leverage of derivatives of the Target Fund is expressed as a ratio between the aggregate of the notional values of all derivatives (excluding non-derivative investments) entered into by the Target Fund and the net asset value of the Target Fund calculated based on the fair market value of all investments (including derivatives). The actual level of leverage of the Target Fund might change over time and might temporarily exceed the expected level of leverage of derivatives of the Target Fund. Derivatives might be used for different purposes including hedging and/ or investment purposes. The calculation of the expected level of leverage does not distinguish between the different purposes of a derivative. Therefore, this figure delivers no indication regarding the true riskiness of the Target Fund.

Relevant Information of the Allianz Oriental Income

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz Oriental Income
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Allianz Global Investors Asia Pacific
Fund Currency	USD
Fund Inception Date	3 October 2008
Investment Objective	The Target Fund aims at long-term capital growth by investing in Asia-Pacific equity and bond markets.

Investment Strategy & Approach

The Target Fund adopts an investment process that is based on bottom up stock selection focuses on Growth, Quality and Valuation. The Target Fund's unconstrained, all cap approach leads to a portfolio of high conviction ideas. A minimum of 70% of Target Fund assets are invested in Asia-Pacific equity and bond markets. A minimum of 40% of Target Fund assets are invested in Asia-Pacific equity markets. Target Fund assets may be invested in emerging markets. A minimum of 50% of Target Fund assets are invested in equities. A maximum of 50% of Target Fund assets may be invested in debt securities. A maximum of 30% of Target Fund assets may be invested into the China A-Shares market either directly through Stock Connect or indirectly through eligible instruments. On a temporary basis for liquidity management and/or defensive purpose and/or any other exceptional circumstances, and if the investment manager considers it in the best interest of the Target Fund, up to 50% of Target Fund assets may be held in deposits and/or invested directly in money market instruments and (up to 10% of Target Fund assets) in money market funds.

The Target Fund may invest in equity and debt securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue.

The Target Fund may also invest in Undertaking For The Collective Investment in Transferable Securities ("UCITS") and other Undertaking For Collective Investments ("UCIs"). The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the Commitment Approach. The Commitment Approach measures the global exposure related solely to positions on financial derivative instruments which are converted into equivalent positions on the underlying assets.

Historical actual annual investment returns of the Target Fund compared with the benchmark[^]:

Investment Objective	<p>The Target Fund aims to attain long term income and capital growth by investing in a broad range of asset classes, in particular in global equity and global bond markets</p>
Investment Strategy & Approach	<p>A maximum of 70% of Target Fund assets may be invested in Equities in accordance with the investment objective. A maximum of 50% of Target Fund assets may be invested in High-Yield Investments Type 1*, however Target Fund assets may be invested in Debt Securities that are only rated CC (Standard & Poor's) or lower (including max. 10% of defaulted securities). Target Fund assets may be invested in emerging markets. A maximum of 25% of Target Fund assets may be held in deposits and/or may be invested directly in money market instruments and/or (up to 10% of Target Fund assets) in money market funds. A maximum of 20% of the Target Fund assets may be invested into the China A-Shares market and/or into the China B-Shares market and/or the People's Republic of China bond markets. The Target Fund may conduct securities lending transactions, over-the-counter ("OTC") based repurchase and/or reverse repurchase transactions and similar OTC transactions in aggregate for up to 80% of the Target Fund's assets. The Target Fund may invest in financial derivative instruments for efficient portfolio management (including for hedging) but will not invest primarily or extensively in financial derivative instruments for investment purposes.</p> <p>The Target Fund may invest in equity and debt securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in Undertaking For The Collective Investment in Transferable Securities ("UCITS") and other Undertaking For Collective Investments ("UCIs"). The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.</p>

**High-Yield Investments Type 1 means an investment in Debt Securities which at the time of acquisition has a rating of BB+ or below (Standard & Poor's and Fitch) or of Ba1 or below (Moody's) or the equivalent by another rating agency or, if unrated, as determined by the investment manager to be of comparable quality. In case of a minimum (maximum) investment limit of High-Yield Investment Type 1 securities according to the Target Fund's investment restrictions, the lowest (highest) available rating of a Debt Security at acquisition day is decisive for the assessment of the possible acquisition of such Debt Security as High-Yield Investment Type 1. Generally, there is no intention to acquire Debt Securities that are only rated CC, C or D (Standard & Poor's), C, RD or D (Fitch) or Ca or C (Moody's) unless otherwise specified.*

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the absolute Value-at-Risk approach. The expected level of leverage of derivatives is 0-2. The expected level of leverage of derivatives of the Target Fund is expressed as a ratio between the aggregate of the notional values of all derivatives (excluding non-derivative investments) entered into by the Target Fund and the net asset value of the Target Fund calculated based on the fair market value of all investments (including derivatives). Allianz Life Thematica Fund

1. Investment Objective

The Allianz Life Thematica Fund (the "Fund") aims to provide long-term capital growth by investing in global Equity Markets with a focus on theme and stock selection.

2. Investment Strategy & Approach

- The Fund is a feeder fund that aims to achieve its investment objective by investing into an underlying fund known as Allianz Thematica (the "Target Fund") which in turn invests in global Equity Markets with a focus on theme and stock selection.
- Please refer to point 7 for further details pertaining the Target Fund.

3. Asset Allocation

- The Fund feeds minimum 95% into the Target Fund.
- The Fund has maximum 5% in liquid assets

4. Fund Manager

Allianz Life Insurance Malaysia Berhad

5. Target Market

The Fund is suitable for investors who: pursue the objective of general capital formation/asset optimisation and/or above average participation risk in price fluctuations; have basic knowledge and/or experience of financial products; and are capable of bearing a financial loss. The Fund may not be suitable for investors who wish to withdraw their capital from the Fund within a short or medium timeframe.

6. Principal risks in investing in the fund

- Market Risk
- Country/Foreign Investment Risk
- Currency Risk
- Sector Risk
- Company Specific Risk
- Liquidity Risk
- Target Fund Risk
- Target Fund Subscription/Redemption Time Lapse Risk

7. Information on the Target Fund

Relevant Information of the Allianz Thematica

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz Thematica
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Allianz Global Investors GmbH
Fund Currency	USD
Fund Inception Date	25 January 2019

Investment Objective

The Target Fund aims at long-term capital growth by investing in global Equity Markets with a focus on theme and stock selection.

Investment Strategy & Approach

A maximum of 50% of Target Fund assets may be invested in emerging markets. A maximum of 10% of Target Fund assets may be invested in China A-Shares market. The Target Fund applies the Climate Engagement Strategy. The Target Fund may use financial derivative instruments for efficient portfolio management (including for hedging) purposes and/or for the purpose of optimising returns or in other words investment purposes.

The Target Fund may invest in securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in Undertakings For The Collective Investment in Transferable Securities ("UCITS") and other Undertakings For Collective Investments ("UCIs"). The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the Commitment Approach. The Commitment Approach measures the global exposure related solely to positions on financial derivative instruments which are converted into equivalent positions on the underlying assets

Allianz Life Elite Income Fund

1. Investment Objective

The Allianz Life Elite Income Fund (the "Fund") aims to provide income accumulation through prudent investment management, with long-term capital appreciation as a secondary objective.

2. Investment Strategy & Approach

- The Fund is a feeder fund that aims to achieve its investment objective by investing into an underlying fund known as PIMCO GIS Income Fund (Accumulation) (the "Target Fund") which will utilise a global multi-sector strategy that seeks to combine the investment advisor's (Pacific Investment Management Company LLC) total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities. Top-down and bottom-up strategies are used to identify multiple sources of value to generate consistent returns. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities. The Target Fund is diversified broadly across regions, industries, issuers, and asset classes, as well as through a varied set of sources of value and employs independent research and prudent diversification with respect to industries and issuers in order to seek to achieve its investment objective.
- Please refer to point 7 for further details pertaining the Target Fund.

3. Asset Allocation

- The Fund feeds minimum 95% into the Target Fund.
- The Fund has maximum 5% in liquid assets

4. Fund Manager

Allianz Life Insurance Malaysia Berhad

5. Target Market

The Fund seeks to meet the needs of investors who are looking for a competitive and consistent level of income without compromising long-term capital appreciation and are looking for a diversified exposure to global fixed income markets and are willing to accept the risks and volatility associated with investing in such markets, including emerging markets and non investment grade securities, and who have an investment horizon over the medium to long term. The Fund may not be suitable for investors who wish to withdraw their capital from the Fund within a short or medium timeframe.

6. Principal risks in investing in the fund

- Market Risk
- Interest Rate Risk
- Country/Foreign Investment Risk
- Currency Risk
- Sector Risk
- Company Specific Risk
- Credit and Default Risk
- Liquidity Risk
- Target Fund Risk
- Target Fund Subscription/Redemption Time Lapse Risk

7. Information on the Target Fund

Relevant Information of the PIMCO GIS Income Fund (Accumulation)

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	PIMCO GIS Income Fund (Accumulation)
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	PIMCO Global Advisors (Ireland) Limited
Fund Currency	USD
Fund Inception Date	30 November 2012
Investment Objective	The primary investment objective of the Target Fund is to seek high current income, consistent with prudent investment management. Long-term capital appreciation is a secondary objective.
Investment Strategy & Approach	The Target Fund will utilise a global multi-sector strategy that seeks to combine the investment advisor's total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities.

The Target Fund will generally allocate its assets among several investment sectors, which may include (i) high yield and investment grade corporate bonds of issuers located in the European Union ("EU") and in non-EU countries, including emerging market countries; (ii) global bonds and fixed income securities issued by EU and non-EU governments, their agencies and instrumentalities; (iii) mortgage-related and other asset-backed securities which may or may not be leveraged; and (iv) foreign currency positions, including currencies of emerging market countries. Exposure to such securities may be achieved through direct investment in the aforementioned security types or through the use of financial derivative instruments. Such derivative instruments may be used (i) for hedging purposes and/or (ii) for investment purposes and/or (iii) efficient portfolio management.

The Target Fund may invest in both investment grade securities and high yield securities, subject to a maximum of 50% of its total assets in securities rated below Baa3 by Moody's, or equivalently rated by S&P or Fitch, or if unrated, determined by the investment advisor to be of comparable quality (this does not apply to the Target Fund's investments in mortgage-related and other asset-backed securities). The Target Fund may invest up to 20% of its total assets in fixed income instruments that are economically tied to emerging market countries. No more than 25% of the Target Fund's net assets may be invested in securities that are convertible into equity securities. No more than 10% of the Target Fund's total assets may be invested in equity securities. The Target Fund is subject to an aggregate limit of one third of its total assets on combined investments in (i) securities that are convertible into equity securities, (ii) equity securities, (iii) certificates of deposit, and (iv) bankers' acceptances.

The Target Fund Manager is authorised as a UCITS pursuant to the Regulations. Investments of a UCITS are confined to transferable securities (shares, debt securities, other negotiable securities) and money market instruments which are either admitted to official listing on a stock exchange in a Member State or non-Member State, or which are dealt with on a market which is regulated, operates regularly, is recognised and open to the public in a Member State or non-Member State.

The Target Fund may also invest in recently issued transferable securities which will be admitted to official listing on a stock exchange or other market within a year, money market instruments other than those dealt with on a Regulated Market, units of UCITS, units of alternative investment funds, deposits with credit institutions, and financial derivative instruments, subject to the guidelines laid out in the GIS Prospectus.

Risk Management

The market risk associated with the use of derivatives will be covered and will be risk managed using the Value at Risk ("VaR") methodology in accordance with the Central Bank of Ireland's requirements. VaR is a statistical methodology that predicts using historical data and calculate the likely maximum daily loss of the Target Fund to a one-tailed 99% confidence level. However, there is a 1% statistical chance that the daily VaR number may be exceeded. The VaR approach uses a historical observation period and thus the VaR result may be biased if abnormal market conditions are not prevalent or are omitted from the historical observation period. Accordingly, the Target Fund could suffer significant financial losses in abnormal market conditions.

Historical actual annual investment returns of the Target Fund compared with the benchmark[^]:

PIMCO GIS Income Fund (Accumulation)

Year	Return	Benchmark
2012	-	-
2013	4.70%	-2.02%
2014	7.28%	5.97%

Notes

- The Policy Owner should be aware that reference to past experience is appropriate but the actual experience could be different.
- Investment risks under the Policy will be borne solely by the Policy Owner.
- The nature of risk changes according to the investment horizon. Equities are risky when the investment is short. However, fixed income securities / money market instruments will be risky when the investment horizon lengthens due to the erosion effect as a result of inflation.
- The Company reserves the right to suspend issuance or redemption of Units under exceptional circumstances such as temporary closure of any stock exchange in which the Fund is invested, during any period when assets in a Fund cannot be valued or other circumstances when the Company, in its discretion, may consider exceptional.
- Fund Charges:

Types of Fund	Fund Management Charge
Allianz Life Equity Fund	1.50% per annum
Allianz Life Managed Fund	1.25% per annum
Allianz Life Dynamic Growth Fund	1.50% per annum
Allianz Life Equity Income Fund	1.35% per annum
Allianz Life Bond Fund	0.75% per annum
Allianz Life Dana Padu	1.50% per annum
Allianz Life Amanah Dana Ikhlas	1.35% per annum
Allianz Life ASEAN Plus Fund	1.50% per annum
Allianz Life All China Equity Fund *	1.50% per annum
Allianz Life Oriental Income Fund *	1.50% per annum
Allianz Life Total Return Asian Equity Fund*	1.50% per annum
Allianz Life Global Income Fund*	1.25% per annum
Allianz Life Thematica Fund *	1.50% per annum
Allianz Life Elite Income Fund *	0.90% per annum

* The Fund Management Charge as set out above includes fund management fee of the Target Fund. There will be no additional fee that is charged to you other than the Fund Management Charge above.

The charges stated above are the maximum charges that We can impose. The actual Fund Management Charge will vary according to the actual asset mix of the Fund if the Fund is invested in more than one investment instrument. The Fund Management Charge will be reviewed by us no less frequently than on a quarterly basis. The Company reserves the right to vary the maximum Fund Management Charge by giving the Policy Owner at least three (3) months' prior written notice.

- Although the Funds may invest in Shariah-compliant assets, Allianz Life's insurance plan is not a Shariah-compliant product.
- Other charges include but not limited to government tax, auditor fee, custodian fee & transaction charge.
- The price per Unit of the Fund is the total market value of assets in the Fund divided by the total number of Units of the Fund. To ensure fair treatment to all Unit holders, transaction costs of acquiring and disposing of assets of the Fund are recouped by making a dilution or transaction cost adjustment to the NAV per Unit of the Fund.
- The price per Unit of the Fund is calculated on a daily basis.

Investment Alert

- Investments in the Funds are not obligations of deposits or guaranteed by the Company.
- The performance of the Funds is not guaranteed and the value of the Units and the income derived therefrom may increase or decrease.
- Past returns and any forecast are not necessarily a guide to future performance.
- The Company does not warrant or make any representations that the Funds will guarantee profits or not result in losses.
- Before deciding to invest in the Funds, Policy Owner should carefully consider their investment objectives, level of experience and risk appetite.
- Policy Owner should be aware of all the risks associated with fluctuations in an investment-linked fund and are advised to seek the advice of a financial advisor/consultant before making any investment. In the event that the Policy Owner chooses not to seek advice from a financial advisor before investing in the Fund, he should consider whether the Fund is suitable for him.
- The Company disclaims any and all liabilities against loss, damages etc direct, indirect or consequential as a result of the Policy Owner's reliance of the fund fact sheet.

Allianz Life Dana Padu	: 50% FTSE Bursa Malaysia Shariah Index + 50% 12-months General Investment Account Rate
Allianz Life Amanah Dana Ikhlas	: 50% FTSE Bursa Malaysia EMAS Shariah Index + 50% 12-months General Investment Account Rate
Allianz Life ASEAN Plus Fund	: 50% FTSE Bursa Malaysia Top 100 Index + 50% FTSE ASEAN 40 Index

- The performance is calculated in Ringgit Malaysia on a NAV-to-NAV basis. It is strictly the performance of the investment fund and not the returns earned on the actual premiums paid for the investment-linked product.
- The basis of calculation of past performance is as follows:

$$R_{20xx} = \frac{(UP_{31 \text{ December } 20xx} - UP_{31 \text{ December } 20xx-1}) \times 100\%}{UP_{31 \text{ December } 20xx-1}}$$

Where:

$UP_{31 \text{ December } 20xx-1}$

- R_{20xx} is the rate of return
- $UP_{31 \text{ December } 20xx}$ is the price per Unit as at 31 December 20xx
- $UP_{31 \text{ December } 20xx-1}$ is the price per Unit as at 31 December 20xx-1
- Brief description of the types of risk referred to in this fact sheet are:

On top of regulatory limits imposed by Bank Negara Malaysia, Allianz Life have put in place tight internal investment limits for all asset classes to ensure that the Fund does not take on excessive risk, while recognising there cannot be total elimination of risks associated with investing in the Fund. The following is a non-exhaustive list of key risk factors when investing into the Fund.

Market Risk – The value of the Fund’s investment assets may be affected by changes in economic fundamentals, interest rate movement, regulatory policy, political and industrial developments. These market factors may result in fluctuations in the value of the Fund’s investment assets. This risk may be mitigated by ensuring regular and rigorous reviews of macroeconomic factors and asset allocation strategy.

Interest Rate Risk – Interest rate risk arises when the value of the debt instrument fluctuates due to interest rate movement. When interest rate rises, the debt instrument prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rate falls. Debt instruments with longer maturities and lower coupon rates are more sensitive to interest rate changes. This risk may be mitigated by regular and rigorous reviews of asset allocation and duration strategy.

Country/Foreign Investment Risk – This risk refers to the risks of investing in foreign markets. The value of the foreign investment assets directly or indirectly held by the Fund may be affected by country-specific factors, such as the country’s economic fundamentals, social and political stability and regulatory policy. This risk may be mitigated by ensuring regular and rigorous reviews of macroeconomic, socio – politic and regulatory factors as well as adopting an appropriate asset allocation strategy.

Currency Risk – For foreign investments, fluctuations in currency exchange rates may have an impact on the value of the Fund’s investment assets. This risk may be managed by engaging in foreign currency hedging.

Sector Risk – The value of the Fund’s investment assets may be adversely affected by the changes in sector-specific factors, such as the business condition, industry outlook and demand/supply dynamic of the industry. This risk may be managed through portfolio diversification and control on sector concentration risk.

Company Specific Risk – The asset values of securities may be affected by company-specific factors, some of which include volatile business situations, adverse financial conditions and poor corporate governance. This risk may be contained through appropriate portfolio diversification, prudent investment selection and better control on investment concentration risks.

Credit and Default Risk – This relates to the creditworthiness of the issuers of the debt and money market instruments as well as their abilities to make timely payments of interest and principal. Any adverse situations faced by the issuer may impact the value of the Fund as well as the liquidity of the debt instrument or money market instrument. This risk is managed through appropriate portfolio diversification, stringent credit selection and control on sector as well as credit concentration risks.

Liquidity Risk – If an asset has insufficient liquidity, there is the risk that the asset cannot be sold or can only be sold at a significant discount to the purchase price. Appropriate portfolio diversification, control on investment concentration limits taking into account liquidity constraints and regular monitoring could help mitigate the said risk.

Dividend Policy Risk – This risk may occur when there is a significant deterioration in a company's business or if there is a change in management policy resulting in a reduction or removal of the company's dividend policy. Such risk is particularly relevant to a fund that focuses largely on dividend yielding stocks. This risk can be mitigated by investing mainly in companies with consistent historical record of paying dividends, companies operating in fairly stable industries or companies with strong cash flows.

Risk of Non-Compliance with Shariah Requirements - For Shariah-approved funds, there is the risk that the Fund may hold securities which are Shariah non-compliant due to:

- 1) "Shariah-compliant securities" which are subsequently considered "Shariah non-compliant"; or
- 2) Investment in Shariah non-compliant securities.

This risk may be mitigated by pre – trade Shariah Compliant checks conducted whenever the Fund invests into securities, regular monitoring of our portfolio's investments to identify if any investments may be in danger of losing their Shariah compliant status, and regular reviews of the Fund's compliance with the list of securities approved by the Shariah Advisory Council of the Securities Commission.

Target Fund Risk - As the Fund is a feeder fund, it will invest into a Target Fund which is being managed by a Target Fund manager. While we would make every effort to ensure that the objectives of the Target Fund are appropriately aligned with those of ours, we do not have control over the Target Fund manager's investment in terms of its approach, intelligence, operations and management. In the unlikely event of any mishandling of the Target Fund, the NAV of our Fund, which is investing predominantly into the Target Fund, could be similarly adversely affected. This risk may be mitigated by our constant monitoring of the Target Fund, which is requisite to ensuring that the Target Fund's objective, risk profile and characteristics are in line with ours. Please also refer to the Target Fund's prospectus for more detailed and comprehensive information on Target Fund specific risks.

Target Fund Subscription/Redemption Time Lapse Risk - Due to the inherent unitisation and Target Fund subscription/redemption processing times, there could be a time lapse between the time monies are received by the Fund and the times the monies are subsequently invested into the Target Fund, vice versa for redemption. The risk of unnecessary subscription/redemption time lapse may be minimised by our best efforts in optimising the process while adhering strictly to the stipulated asset allocation.
