7. Information on the Target Fund

Relevant Information of the Allianz All China Equity

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz All China Equity
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Allianz Global Investors Asia Pacific
Fund Currency	USD
Fund Inception Date	5 December 2017
Investment Objective	The Target Fund aims at long-term capital growth by investing in onshore and offshore PRC, Hong Kong and Macau equity markets.
Investment Strategy & Approach	<p>The Target Fund adopts an investment process that is based on fundamental, bottom-up stock selection to generates a portfolio of high-conviction ideas. Combination of stock selection overlaid with effective risk management, is the key driver of its risk and return. A minimum of 70% of Target Fund assets are invested in onshore and offshore PRC, Hong Kong and Macau equity markets. Target Fund assets may be invested in emerging markets. A maximum of 100% of Target Fund assets may be invested into the China A-Shares market either directly through Stock Connect or indirectly through eligible instruments. A maximum of 69% of Target Fund assets may be invested via RMB Qualified Foreign Institutional Investor (RQFII). The Target Fund applies the climate engagement strategy. A maximum 25% of Target Fund assets may be held directly in time deposits and/or (up to 20% of Target Fund assets) in deposits at sight and/or invested in money market instruments and/or (up to 10% of Target Fund assets) in money market funds for liquidity management. Maximum 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI").</p> <p>The Target Fund may invest in securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in UCITS and other UCIs. The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.</p>

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the absolute Value-at-Risk approach. The expected level of leverage of derivatives is 0-2. The expected level of leverage of derivatives of the Target Fund is expressed as a ratio between the aggregate of the notional values of all derivatives (excluding non-derivative investments) entered into by the Target Fund and the Net Asset Value of the Target Fund calculated based on the fair market value of all investments (including derivatives). The actual level of leverage of the Target Fund might change over time and might temporarily exceed the expected level of leverage of derivatives of the Target Fund. Derivatives might be used for different purposes including hedging and/ or investment purposes. The calculation of the expected level of leverage does not distinguish between the different purposes of a derivative. Therefore, this figure delivers no indication regarding the true riskiness of the Target Fund.

7. Information on Target Fund

Relevant Information of the Allianz Global Artificial Intelligence

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz Global Artificial Intelligence
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Voya Investment Management Co. LLC
Fund Currency	USD
Fund Inception Date	31 March 2017

Investment Objective

The Target Fund aims at long-term capital growth by investing in the global equity markets with a focus on the evolution of artificial intelligence in accordance with the Sustainability Key Performance Indicator ("KPI") Strategy (Relative). In this context, the aim is to outperform the Target Fund's sustainability KPI compared to Target Fund's benchmark to achieve the investment objective.

Investment Strategy & Approach

The Target Fund is an actively managed, focused fund that invests across all sectors and the full market cap spectrum for Artificial Intelligence (AI) opportunities. Deep bottom-up, fundamental analysis is key to understanding the companies best positioned to drive forward advances in and benefit from AI. The Target Fund will invest in companies that currently benefit, or are expected to benefit, from the following themes: 1) Deployment of AI infrastructure and enabling technologies critical to the growth of AI, 2) Development of AI applications and software to make smarter insights and decisions, 3) Adoption of AI in key business processes to drive AI-enabled industries. A minimum of 70% of Target Fund assets are invested in the global equity markets with a focus on the evolution of artificial intelligence. Target Fund assets may be invested in emerging markets. A maximum 25% of Target Fund assets may be held directly in time deposits and/or (up to 20% of Target Fund assets) in deposits at sight and/or invested in money market instruments and/or (up to 10% of Target Fund assets) in money market funds for liquidity management. A maximum 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI").

The Target Fund may invest in securities, money market instruments, deposits and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in UCITS and other UCIs. The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the Commitment Approach. The Commitment Approach measures the global exposure related solely to positions on financial derivative instruments which are converted into equivalent positions on the underlying assets.

Allianz Life Global Income Fund

1. Investment Objective

The Allianz Life Global Income Fund (the "Fund") aims to attain long term income and capital growth by investing in a broad range of asset classes, in particular in global equity and global bond markets.

2. Investment Strategy & Approach

- The Fund is a feeder fund that aims to achieve its investment objective by investing into an underlying fund known as Allianz Global Income (the "Target Fund") which in turn invest in global equity and global bond markets.
- Please refer to point 7 for further details pertaining the Target Fund.

3. Asset Allocation

- The Fund feeds minimum 95% into the Target Fund.
- The Fund has maximum 5% in liquid assets

4. Fund Manager

Allianz Life Insurance Malaysia Berhad

5. Target Market

The Fund is suitable for investors who: pursue the objective of general capital formation/asset optimisation and/or above average participation risk in price fluctuations; have basic knowledge and/or experience of financial products; and are capable of bearing a financial loss. The Fund may not be suitable for investors who wish to withdraw their capital from the Fund within a short timeframe.

6. Principal Risks in Investing in the Fund

- Market Risk
- Interest Rate Risk
- Foreign Investment Risk
- Country and Region Fund Risk
- Currency Risk
- Sector Risk
- Company Specific Risk
- Credit and Default Risk
- Liquidity Risk
- Derivatives Risk
- Target Fund Risk
- Target Fund Subscription/Redemption Time Lapse Risk
- Temporary Suspension of Dealing in the Fund Risk

7. Information on the Target Fund

Relevant Information of the Allianz Global Income

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz Global Income
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Voya Investment Management Co. LLC
Fund Currency	USD
Fund Inception Date	15 October 2020
Investment Objective	The Target Fund aims to attain long term income and capital growth by investing in a broad range of asset classes, in particular in global equity and global bond markets
Investment Strategy & Approach	A maximum of 70% of Target Fund assets may be invested in Equities in accordance with the investment objective. A maximum of 30% of Target Fund assets may be invested in High-Yield Investments Type 1*, however Target Fund assets may be invested in Debt Securities that are only rated CC (Standard & Poor's) or lower (including max. 10% of defaulted securities). Target Fund assets may be invested in emerging markets. A maximum of 25% of Target Fund assets may be held in deposits and/or may be invested directly in money market instruments and/or (up to 10% of Target Fund assets) in money market funds. A maximum of 20% of the Target Fund assets may be invested into the China A-Shares market and/or into the China B-Shares market and/or the People's Republic of China bond markets. The Target Fund may conduct securities lending transactions, over-the-counter ("OTC") based repurchase and/or reverse repurchase transactions and similar OTC transactions in aggregate for up to 80% of the Target Fund's assets. The Target Fund may invest in financial derivative instruments for efficient portfolio management (including for hedging) but will not invest primarily or extensively in financial derivative instruments for investment purposes. A maximum 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI").

The Target Fund may invest in financial derivative instruments for efficient portfolio management (including for hedging) but will not invest primarily or extensively in financial derivative instruments for investment purposes. A maximum 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI").

The Target Fund may invest in equity and debt securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another Regulated Market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in Undertaking For The Collective Investment in Transferable Securities ("UCITS") and other Undertaking For Collective Investments ("UCIs"). The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.

**High-Yield Investments Type 1 means an investment in Debt Securities which at the time of acquisition has a rating of BB+ or below (Standard & Poor's and Fitch) or of Ba1 or below (Moody's) or the equivalent by another rating agency or, if unrated, as determined by the investment manager to be of comparable quality. In case of a minimum (maximum) investment limit of High-Yield Investment Type 1 securities according to the Target Fund's investment restrictions, the lowest (highest) available rating of a Debt Security at acquisition day is decisive for the assessment of the possible acquisition of such Debt Security as High-Yield Investment Type 1. Generally, there is no intention to acquire Debt Securities that are only rated CC, C or D (Standard & Poor's), C, RD or D (Fitch) or Ca or C (Moody's) unless otherwise specified.*

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the absolute Value-at-Risk approach. The expected level of leverage of derivatives is 0-2. The expected level of leverage of derivatives of the Target Fund is expressed as a ratio between the aggregate of the notional values of all derivatives (excluding non-derivative investments) entered into by the Target Fund and the Net Asset Value of the Target Fund calculated based on the fair market value of all investments (including derivatives). The actual level of leverage of the Target Fund might change over time and might temporarily exceed the expected level of leverage of derivatives of the Target Fund. Derivatives might be used for different purposes including hedging and/ or investment purposes.

The calculation of the expected level of leverage does not distinguish between the different purposes of a derivative. Therefore this figure delivers no indication regarding the true riskiness of the Target Fund.

Relevant Information of the PIMCO GIS Income Fund (Accumulation)

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	PIMCO GIS Income Fund (Accumulation)
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	PIMCO Global Advisors (Ireland) Limited
Fund Currency	USD
Fund Inception Date	30 November 2012
Investment Objective	The primary investment objective of the Target Fund is to seek high current income, consistent with prudent investment management. Long-term capital appreciation is a secondary objective.
Investment Strategy & Approach	The Target Fund will utilise a global multi-sector strategy that seeks to combine the Investment Advisor's total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities.

Allianz Life Elite Income Fund

1. Investment Objective

The Allianz Life Elite Income Fund (the "Fund") aims to provide income accumulation through prudent investment management, with long-term capital appreciation as a secondary objective.

2. Investment Strategy & Approach

- The Fund is a feeder fund that aims to achieve its investment objective by investing into an underlying fund known as PIMCO GIS Income Fund (Accumulation) (the "Target Fund") which will utilise a global multi-sector strategy that seeks to combine the Investment Advisor's (Pacific Investment Management Company LLC) total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities. Top-down and bottom-up strategies are used to identify multiple sources of value to generate consistent returns. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities. The Target Fund is diversified broadly across regions, industries, issuers, and asset classes, as well as through a varied set of sources of value and employs independent research and prudent diversification with respect to industries and issuers in order to seek to achieve its investment objective.
- Please refer to point 7 for further details pertaining the Target Fund.

Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities.

The Target Fund will generally allocate its assets among several investment sectors, which may include (i) high yield and investment grade corporate bonds of issuers located in the European Union ("EU") and in non-EU countries, including emerging market countries; (ii) global bonds and fixed income securities issued by EU and non-EU governments, their agencies and instrumentalities; (iii) mortgage-related and other asset-backed securities which may or may not be leveraged; and (iv) foreign currency positions, including currencies of emerging market countries. Exposure to such securities may be achieved through direct investment in the aforementioned security types or through the use of financial derivative instruments. Such derivative instruments may be used (i) for hedging purposes and/or (ii) for investment purposes and/or (iii) efficient portfolio management.

The Target Fund may invest in both investment grade securities and high yield securities, subject to a maximum of 50% of its total assets in securities rated below Baa3 by Moody's, or equivalently rated by S&P or Fitch, or if unrated, determined by the Investment Advisor to be of comparable quality (this does not apply to the Target Fund's investments in mortgage-related and other asset-backed securities). The Target Fund may invest up to 20% of its total assets in fixed income instruments that are economically tied to emerging market countries. No more than 25% of the Target Fund's net assets may be invested in securities that are convertible into equity securities. No more than 10% of the Target Fund's total assets may be invested in equity securities. The Target Fund is subject to an aggregate limit of one third of its total assets on combined investments in (i) securities that are convertible into equity securities, (ii) equity securities, (iii) certificates of deposit, and (iv) bankers' acceptances.

The Target Fund Manager is authorised as a UCITS pursuant to the regulations. Investments of a UCITS are confined to transferable securities (shares, debt securities, other negotiable securities) and money market instruments which are either admitted to official listing on a stock exchange in a member state or non-member state, or which are dealt with on a market which is regulated, operates regularly, is recognised and open to the public in a member state or non-member state.

The Target Fund may also invest in recently issued transferable securities which will be admitted to official listing on a stock exchange or other market within a year, money market instruments other than those dealt with on a Regulated Market, units of UCITS, units of alternative investment funds, deposits with credit institutions, and financial derivative instruments, subject to the guidelines laid out in the GIS Prospectus.

Risk Management

The market risk associated with the use of derivatives will be covered and will be risk managed using the Value at Risk ("VaR") methodology in accordance with the Central Bank of Ireland's requirements. VaR is a statistical methodology that predicts using historical data and calculate the likely maximum daily loss of the Target Fund to a one-tailed 99% confidence level. However, there is a 1% statistical chance that the daily VaR number may be exceeded. The VaR approach uses a historical observation period and thus the VaR result may be biased if abnormal market conditions are not prevalent or are omitted from the historical observation period. Accordingly, the Target Fund could suffer significant financial losses in abnormal market conditions.

Historical actual annual investment returns of the Target Fund compared with the benchmark[^]:

- Foreign Investment Risk
- Country and Region Fund Risk
- Currency Risk
- Theme Fund Risk
- Sector Risk
- Company Specific Risk
- Liquidity Risk
- Derivatives Risk
- Target Fund Risk
- Target Fund Subscription/Redemption Time Lapse Risk
- Temporary Suspension of Dealing in the Fund Risk

7. Information on the Target Fund

Relevant Information of the BGF World Healthscience Fund

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	BGF World Healthscience Fund
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	BlackRock (Luxembourg) S.A. ("BlackRock")

Fund Currency	USD
Fund Inception Date	06 April 2001
Investment Objective	The Target Fund seeks to maximise total return by investing globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in healthcare, pharmaceuticals, medical technology and supplies and the development of biotechnology.
Investment Strategy & Approach	<p>The Target Fund focuses on equity investments. The investment style is active and bottom-up as stock selection is based on bottom-up, fundamental sub-industry and company research. Portfolio strategy and risk management are also integral components of the portfolio construction process. The Target Fund's style can be characterised as "label agnostic" as the BlackRock Health Sciences Team is indifferent to whether stocks are categorised as "growth" or "value" by style indexes.</p> <p>The Target Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the People's Republic of China by investing via the Stock Connects.</p> <p><u>Additional Disclosure</u> The Target Fund can trade derivatives such as sell put and call options and deal in financial futures. These permitted derivatives are normally used as a defensive measure and when not used for a defensive purpose may not exceed 15% of fund assets. The Target Fund may use derivatives to hedge market and currency risk and for the purposes of efficient portfolio management; however, this is not a primary strategy.</p>
Risk Management	<p>The Target Fund has an active risk between 3-8%, which is monitored by Risk & Quantitative Analysis Group ("RQA").</p> <p>The RQA leads BlackRock's risk management efforts by providing independent top-down and bottom-up oversight to help identify investment, counterparty, operational, regulatory and technology risks. In addition to producing quantitative analysis to support BlackRock in managing its fiduciary and enterprise risks, RQA ensures that portfolio risks are consistent across mandates, reflect current investment themes within particular strategies, and comply with client-specific risk guidelines. The BlackRock Health Sciences Team has a six-weekly dedicated meeting with RQA to analyse the risks across the portfolio.</p> <p>The BlackRock Health Sciences Team ensures that at any given time, it understands the riskiness of the portfolio relative to the benchmark, and crucially, the sources of risk.</p>

The Target Fund's portfolio construction adheres amongst other parameters to the risk parameters below which ensure that risk is diverse, deliberate and appropriately scaled:

- Strict control of portfolio construction to combine focus with risk
- Minimise unintended risk - no blind spots
- Have diverse range of exposures
- Key aim is to avoid performance being driven by a single stock or 'factor'
- Largest positions will reflect risk adjusted upside to price target, level of conviction and visibility of catalysts

The Target Fund benefits from BlackRock's extensive real time risk analytics which are available on the desktop as well as regular meetings with the RQA team which provide additional insights into the Target Fund risk profile, such as macro / economic stress tests, style and factor changes, market volatility and correlations. Whilst the investment approach described seeks to control risk, risks cannot be eliminated.

In terms of derivatives used for risk management, the Target Fund may use hedging strategies which seek to provide exposure to certain currencies (i.e. where a currency is subject to currency trading restrictions). These hedging strategies involve converting the Net Asset Value of the relevant share class into the relevant currency using financial derivative instruments such as currency forwards.

Historical actual annual investment returns of the Target Fund compared with the benchmark[^]:

7. Information on the Target Fund

Relevant Information of the BGF ESG Multi-Asset Fund

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	BGF ESG Multi-Asset Fund
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	BlackRock (Luxembourg) S.A. ("BlackRock")
Fund Currency	Euro
Fund Inception Date	04 January 1999
Investment Objective	The Target Fund follows an asset allocation policy that seeks to maximise total return by investing globally in the full spectrum of permitted investments including equities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments whilst in a manner consistent with the principles of ESG* focused investing.
Investment Strategy & Approach	<p>The Target Fund is a global multi-asset portfolio that is designed as a core solution for clients. The Target Fund seeks to deliver attractive total returns, with a strong focus on ESG factors, within a robust risk framework. The BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team aims to provide a better outcome for clients through a strong focus on diversification and a dynamic approach to asset allocation in order to strike a balance between upside capture and downside protection. The Target Fund is run by a deeply experienced BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team that focuses on top-down macro driven asset allocation. The BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team then leverages the best of BlackRock's global security selection experts across equities, fixed income and alternatives to construct the portfolio thereby granting client's access to a truly diversified array of compelling investment opportunities across asset classes, managed within a dynamic and risk-focused framework.</p> <p>The Target Fund invests globally in the full spectrum of permitted investments including equities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of CIS, cash, deposits and money market instruments. The Target Fund seeks to invest in sustainable investments and its total assets will be invested in accordance with the ESG Policy described below. The Target Fund has a flexible approach to asset allocation (which includes taking indirect exposure to commodities through permitted investments, principally through derivatives on commodity indices and exchange traded funds).</p>

The Target Fund may invest in securities denominated in currencies other than the reference currency (Euro). The currency exposure of the Target Fund is flexibly managed. The Target Fund is a Stock Connect Fund and may invest directly in the People's Republic of China ("PRC") by investing via the Stock Connects. The Target Fund is a China Interbank Bond Market (CIBM) Fund and may gain direct exposure to onshore bonds distributed in Mainland China in the CIBM via the Foreign Access Regime and/ or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time. The Target Fund may invest up to 20% in aggregate of its total assets in the PRC via the Stock Connects, the Foreign Access Regime and/or Bond Connect. As part of its investment objective the Target Fund may invest up to 10% of its total assets in Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Target Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.

Expected level of leverage of the Fund: 175% of Net Asset Value ("NAV").

***ESG Policy**

The Target Fund will apply the BlackRock EMEA Baseline Screens.

The Investment Advisor (BlackRock Financial Management, Inc) also intends to limit investments in companies within the Global Industry Classification Standard (GICS) Oil & Gas Exploration & Production sector and companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets. The Investment Advisor also intends to limit direct investment in securities of issuers involved in the production, distribution or licensing of alcoholic products; the ownership or operation of gambling-related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials.

The assessment of the level of involvement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received. The Investment Advisor will exclude any issuer with a MSCI ESG rating below BBB.

The remaining companies (i.e. those companies which have not yet been excluded from investment by the Target Fund) are then evaluated by the Investment Advisor based on their ability to manage the risks and opportunities associated with ESG compliant business practices and their ESG risk and opportunity credentials, such as their leadership and governance framework, which is considered essential for sustainable growth, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials.

To undertake this analysis, the Investment Advisor may use data provided by external ESG providers, proprietary models and local intelligence and may undertake site visits. The Target Fund may gain limited exposure (through, including but not limited to, derivatives, cash and near cash instruments and shares or units of CIS and fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide) to issuers with exposures that do not meet the ESG criteria described above.

More than 90% of the issuers of securities the Target Fund invests in are ESG rated or have been analysed for ESG purposes.

Limits on Collective Investment Schemes (CIS)

The Target Fund may only buy CIS approved by BlackRock's EMEA Funds Compliance division.

- Maximum of 10% of NAV invested in other open-ended schemes which have similar characteristics to UCITS funds, and are themselves restricted to investing no more than 10% of NAV in other CIS.
- Open ended schemes subject to common management control (BlackRock or BlackRock affiliated companies) can only be held if their constitution specifies investment in a specific geographic area or economic sector, and that no fees or costs are charged.
- Investment in other BGF sub funds is not permitted.

Risk Management

Risk is monitored on a Relative VaR basis using 50% MSCI World Index and 50% Bloomberg Global Aggregate Bond Euro Hedged Index as the appropriate benchmark.*

* Risk benchmark use: the Target Fund is actively managed with multiple asset classes and the extent to which the Target Fund is invested in these may vary without limit depending on market conditions and other factors at the Investment Advisor's discretion. The Investment Advisor may refer to a composite benchmark comprising the 50% MSCI World Index and 50% Bloomberg Global Aggregate Bond Euro Hedged Index (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Target Fund remains appropriate given the Target Fund's investment objective and policy. The Investment Advisor is not bound by the components or weighting of the Index when selecting investments. The Investment Advisor may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities.

Risk management is embedded into portfolio construction process:

The following key considerations drive portfolio construction:

- How much risk do BlackRock wish to take relative to the risk benchmark given the prevailing market environment and their macro-economic outlook?
- How high is their conviction level in the given investment idea?
- What size does each investment warrant against the prevailing market environment and their macro-economic outlook?
- What effect do their investments have on each other in combination?

BlackRock size each investment using a combination of qualitative judgment by their portfolio managers and quantitative risk analysis. Questions BlackRock ask themselves before scaling a position include 'How high is our conviction in the research idea and how much upside do we expect? Is the investment a core part of the portfolio, based on our view of the global economic picture, or a more opportunistic investment idea to add incremental value? Does the investment add significant volatility to the portfolio, or help dampen portfolio risk?'

- Deviations between risk contribution and stated conviction levels are flagged in their regular weekly research and portfolio construction meetings. Sizing decisions are supported by both ex-ante and ex-post risk analysis.
- Risk metrics that are reviewed regularly for each position include standalone risk, portfolio risk contribution, historical drawdown and headwind scenario analysis done in close collaboration with their Risk & Quantitative Analysis Group ("RQA"). Reward metrics are analysed using profit targets, scenario analysis on the BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team's core macro view and historical performance. BlackRock also use a factor framework to identify unintended factor exposures or concentration.

- At bi-weekly portfolio construction meetings BlackRock review a wide range of metrics and scenario analysis to examine risk exposures and positioning relative to history.

This is a simple and intuitive process but relies on intense, high quality risk analysis by a combination of portfolio managers and BlackRock's independent RQA professionals.

These experts use the most powerful risk systems available and a variety of techniques from correlation and liquidity metrics to stress testing and scenario analysis. However, the real added value from their risk professionals comes from the way in which they interpret these data points and challenge the BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team's positioning in the context of the market environment and the BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team's outlook.

RQA also has a policing role over all BlackRock portfolios, monitoring each strategy against its objectives on a daily basis. They discuss portfolios formally on a monthly basis with the portfolio managers however, discussions of a more informal nature take place almost daily. The role of RQA is not to limit the level of risk being taken within the Target Fund, but rather to ensure that the risks are deliberate, diversified and scaled whilst accurately reflecting the benchmark. BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team also assesses portfolios in the context of the portfolios risk targets which are monitored via BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team's Risk and Performance Target ("RPT") framework. RPT helps back out target risk based on the return profile and benchmark constraints of the strategy as well as set low, medium and high-risk thresholds to ensure BlackRock Multi-Asset Strategies and Solutions Diversified Strategies Team manages the portfolio within the defined bandwidth.

Allianz Life Income and Growth Fund

1. Investment Objective

The Allianz Life Income and Growth Fund (the "Fund") aims at long term capital growth and income by investing in corporate debt securities and equities of United States of America ("US") and/or Canadian equity and bond markets.

2. Investment Strategy & Approach

- The Fund is a feeder fund that aims to achieve its investment objective by investing into an underlying fund known as Allianz Income and Growth (the "Target Fund") which aims at long term capital growth and income by investing in corporate debt securities and equities of US and/or Canadian equity and bond markets.
- Please refer to point 7 for further details pertaining the Target Fund.

3. Asset Allocation

- The Fund feeds minimum 95% into the Target Fund.
- The Fund has maximum 5% in liquid assets.

4. Fund Manager

Allianz Life Insurance Malaysia Berhad

5. Target Market

The Fund is suitable for investors who: pursue the objective of general capital formation/asset optimisation and/or above average participation risk in price fluctuations; have basic knowledge and/or experience of financial products; and are capable of bearing a financial loss. The Fund may not be suitable for investors who wish to withdraw their capital from the Fund within a short or medium timeframe.

6. Principal Risks in Investing in the Fund

- Market Risk
- Interest Rate Risk
- Foreign Investment Risk
- Country and Region Fund Risk
- Currency Risk
- Sector Risk
- Company Specific Risk
- Credit and Default Risk
- Liquidity Risk
- Derivatives Risk
- Target Fund Risk
- Target Fund Subscription/Redemption Time Lapse Risk
- Temporary Suspension of Dealing in the Fund Risk

7. Information on the Target Fund

Relevant Information of the Allianz Income and Growth

The following relevant information provided by the Target Fund's management company (Allianz Global Investors GmbH) may be subject to change as and when the Target Fund's management company deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz Income and Growth
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Voya Investment Management Co. LLC

Fund Currency	USD
Fund Inception Date	18 November 2011
Investment Objective	The Target Fund aims at long term capital growth and income by investing in corporate debt securities and equities of US and/or Canadian equity and bond markets.
Investment Strategy & Approach	<ul style="list-style-type: none"> • A maximum of 70% of Target Fund assets may be invested in equities in accordance with the investment objective. • A maximum of 70% of Target Fund assets may be invested in convertible debt securities in accordance with the investment objective. • A maximum of 70% of Target Fund assets may be invested in High-Yield Investments Type 1*, however Target Fund assets may be invested in debt securities that are only rated CC (Standard & Poor's) or lower (including a maximum 10% of defaulted securities). • A maximum of 30% of Target Fund assets may be invested in emerging markets. • A maximum of 25% of Target Fund assets may be held in deposits and/or may be invested directly in money market Instruments and/or (up to 10% of Target Fund assets) in money market funds. • A maximum of 20% of Target Fund assets may be invested in asset-backed securities ("ABS") and/or mortgage-backed securities ("MBS"). • A maximum of 10% of Target Fund assets may be invested in contingent convertible bonds. • A maximum of 20% non-USD Currency Exposure. • A maximum of 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI"). • Hong Kong Restriction applies. • Taiwan Restriction applies, except for the respective high-yield limit. • German Investment Tax Act (GITA) Restriction (Alternative 2) applies. <p><i>*High-Yield Investments Type 1 means an investment in debt securities which at the time of acquisition has a rating of BB+ or below (Standard & Poor's and Fitch) or of Ba1 or below (Moody's) or the equivalent by another rating agency or, if unrated, as determined by the investment manager to be of comparable quality.</i></p>

In case of a minimum (maximum) investment limit of High-Yield Investment Type 1 securities according to the Target Fund's investment restrictions, the lowest (highest) available rating of a debt security at acquisition day is decisive for the assessment of the possible acquisition of such debt security as High-Yield Investment Type 1. Generally, there is no intention to acquire debt securities that are only rated CC, C or D (Standard & Poor's), C, RD or D (Fitch) or Ca or C (Moody's) unless otherwise specified.

Risk Management

The fund management company (Allianz Global Investors GmbH) of the Target Fund will calculate the global exposure of the Target Fund by using the Commitment Approach. The Commitment Approach measures the global exposure related solely to positions on financial derivative instruments which are converted into equivalent positions on the underlying assets.

7. Information on the Target Fund

Relevant Information of the BGF Global Unconstrained Equity Fund

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	BGF Global Unconstrained Equity Fund
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	BlackRock (Luxembourg) S.A ("BlackRock")
Fund Currency	USD
Fund Inception Date	7 March 2024

Investment Objective	The Target Fund seeks to achieve long term capital growth.
Investment Strategy & Approach	<p>Although most of the Target Fund's investments will be in companies located in developed markets globally, the Target Fund may also invest in emerging markets and namely in:</p> <ul style="list-style-type: none">• equity securities and equity related securities (namely American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of companies domiciled in, or exercising a significant part of their economic activity in, global emerging markets;• cash and/or cash equivalents (such as term deposits and bank certificates), liquid government debt instruments and money market Instruments (including certificates of deposit, commercial paper and bankers acceptances); and• other Collective Investment Schemes (CIS), including exchange-traded funds (where the objectives of such CIS are consistent with its objective or for efficiently managing cash holdings and/or collateral). The Target Fund may not invest more than 10% of its Net Asset Value in other CIS. <p>Investment decisions are based on company-specific research to identify and select equity securities that, in the opinion of the investment adviser (BlackRock Investment Management (UK) Limited), have a viable competitive advantage and the potential to produce attractive long-term capital growth. The Target Fund's portfolio is expected to be concentrated (i.e. it is expected to hold relatively few stocks in comparison to other funds), but there is no guarantee that this will always be the case.</p> <p>The Target Fund may use derivatives for the purposes of efficient portfolio management.</p> <p>The Target Fund's assets will be invested in accordance with the ESG Policy described below:</p> <p>*ESG Policy Companies are evaluated by the investment adviser based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p> <p>The investment adviser conducts enhanced analysis on all companies that it considers having heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the investment manager may determine an engagement agenda for discussion with those companies in seeking to improve their ESG credentials.</p>

To undertake this analysis, the investment adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Target Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The investment adviser then applies its proprietary "Fundamental Insights" methodology to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time or are otherwise meeting other criteria in accordance with the methodology requirements.

The methodology uses quantitative and qualitative inputs generated by the investment adviser, its affiliates and/or one or more external research providers. Where a company is identified by the investment adviser as meeting the criteria in the methodology for investment and is approved in accordance with the methodology, it is eligible to be held by the Target Fund. Such companies are regularly reviewed. In the event that the investment adviser determines that a company fails the criteria in the methodology (in whole or in part and at any time) or it is not engaging with the investment adviser on a satisfactory basis, it will be considered for divestment by the Target Fund in accordance with the methodology.

Risk Management

The Target Fund will adopt a proprietary real-world risk approach to ensure the economic risk (earnings and cash flow risk) of the portfolio does not become too skewed or concentrated. In order to track the economic risk of the Target Fund, BlackRock breaks down the portfolio into five types of economic risk: consumer cyclicals, industrial cyclicals, energy, financials and defensive companies. By means of elaboration:

- Defensive: cash flows not expected to fall significantly in an economic downturn.
- Consumer cyclicals: cash flows linked to discretionary consumer spending.
- Industrial cyclicals: cash flows linked to the industrial cycle and discretionary corporate expenditures.
- Financials: cash flows linked to equity market levels, interest rates and the credit cycle.
- Energy: cash flows linked to oil, coal or natural gas prices.

Given the view of risk as capital impairment, BlackRock typically have at least 50% of the portfolio in "defensive" stocks to ensure that even during a recessionary environment the underlying operations of the majority of their holdings remain robust. BlackRock views this as a superior alternative to notional Global Industry Classification Standard (GICS) industry or sector exposures, which do not consider the cyclical or defensiveness of businesses within each sector and the way in which they perform during different parts of the business cycle.

Day to day the portfolio managers will not attempt to manage statistical or factor risk within the fund. In the context of an unconstrained portfolio with a long-term investment horizon, such constructs based on historic correlations and regressions are likely to be less relevant. Frequently, factor rotations tend to be short and sharp and do not signify fundamental changes in businesses that might warrant portfolio activity. As such the Target Fund could experience volatile performance outcomes over the short-term in periods of significant statistical/factor rotation.

BlackRock's internal risk team takes into consideration the MSCI World Index for risk management monitoring to ensure that the active risk (i.e., degree of deviation from the index) taken by the Target Fund remains appropriate given the Target Fund's investment objective and policy. The portfolio management team does not believe this will represent a constraint on the portfolio day to day and will not be anchoring to any tracking error or benchmark in the normal running of the portfolio.

Past fund performance of BGF Global Unconstrained Equity Fund is not available as the Target Fund was launched in year 2024.

7. Information on the Target Fund

Relevant Information of the BGF World Technology Fund

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	BGF World Technology Fund
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	BlackRock (Luxembourg) S.A ("BlackRock")
Fund Currency	USD
Fund Inception Date	3 March 1995
Investment Objective	The Target Fund focuses on equity securities of companies whose predominant economic activity is in the technology sector seeking to maximise total return investing through investing in a manner consistent with the principles of Environmental, Social and Governance ("ESG") investing.
Investment Strategy & Approach	<p>The Target Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the technology sector.</p> <p>The Target Fund looks to add alpha through both stock selection and sub-sector allocation, believing that it is critical to own the right companies in the sub-sectors that are experiencing strong growth, while being mindful of valuation.</p> <p>Stock selection is based on bottom-up, fundamental company research by sub-industry. Portfolio strategy and risk management are integral components of the portfolio construction process.</p> <p>The Target Fund is a Stock Connect Fund and may invest directly up to 20% of its total assets in the People's Republic of China ("PRC") by investing via the Stock Connects.</p> <p>The Target Fund may also use derivatives to hedge market and currency risk and for the purposes of efficient portfolio management, however this is not a primary strategy.</p> <p>In accordance with the investment limits and restrictions, all the BGF funds may use derivatives to hedge against market and currency risk, and for the purposes of efficient portfolio management.</p> <p>The Target Fund's assets will be invested in accordance with the ESG Policy described below:</p> <p>*ESG Policy Companies are evaluated by the Investment Adviser (BlackRock Investment Management, LLC) based on their ability to manage the risks and opportunities associated with ESG factors and their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financial performance.</p>

The Investment Adviser conducts enhanced analysis on all companies that it considers having heightened ESG risks, higher carbon emissions and controversial business activities. In such circumstances, the Investment Adviser may determine an engagement agenda for discussion with those companies to improve their ESG credentials. To undertake this analysis, the Investment Adviser uses its fundamental insights and may use data provided by external ESG data providers and proprietary models.

The Target Fund will apply exclusionary screens, the BlackRock EMEA Baseline Screens, to the companies within the investment universe. The Investment Adviser then applies its proprietary "Fundamental Insights" methodology to identify companies that would otherwise have been excluded by the exclusionary screens but that it considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time or are otherwise meeting other criteria in accordance with the methodology requirements.

The methodology uses quantitative and qualitative inputs generated by the Investment Adviser, its affiliates and/or one or more external research providers. Where a company is identified by the Investment Adviser as meeting the criteria in the methodology for investment and is approved in accordance with the methodology, it is eligible to be held by the Target Fund. Such companies are regularly reviewed. In the event that the Investment Adviser determines that a company fails the criteria in the methodology (in whole or in part and at any time) or it is not engaging with the Investment Adviser on a satisfactory basis, it will be considered for divestment by the Target Fund in accordance with the methodology.

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the Commitment Approach. The Commitment Approach is a methodology that aggregates the underlying market or notional values of financial derivative instruments to determine the degree of global exposure of a Target Fund to financial derivative instruments.

The Target Fund's portfolio construction adheres amongst other parameters to the risk parameters below which ensure that risk is diverse, deliberate and appropriately scaled:

- Strict control of portfolio construction to combine focus with risk
- Minimize unintended risk - no blind spots
- Have diverse range of exposures
- Key aim is to avoid performance being driven by a single stock or 'factor'
- Largest positions will reflect risk adjusted upside to price target, level of conviction and visibility of catalysts

7. Information on the Target Fund

Relevant Information of the PIMCO GIS Balanced Income and Growth Fund

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	PIMCO GIS Balanced Income and Growth Fund
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	PIMCO Global Advisors (Ireland) Limited
Fund Currency	USD
Fund Inception Date	15 April 2009
Investment Objective	The Target Fund seeks to maximise total return, consistent with preservation of capital and prudent investment management.
Investment Strategy & Approach	The Target Fund will utilize a global multi-sector strategy that seeks to combine Pacific Investment Management Company LLC's ("the Investment Advisors") total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of equity and global fixed income securities.

- Innovative approach to the multi-asset income space, providing the potential for both income and growth.
- Access to PIMCO's expertise in multi-asset investing across global fixed income, global equities, and additional macro-driven tactical strategies in a stable, yet flexible 60/40 construct.

The Target Fund may use or invest in financial derivatives.

The Target Fund leverages PIMCO's industry-leading macroeconomic views, time-tested investment process, and robust quantitative capabilities. The Target Fund is thoughtfully-designed as a diversified and stable multi-asset strategy composed of global core equities, flexible income-oriented fixed income, and tactical flexibility intended to provide a ballast in clients' portfolios across all market environments.

Risk Management

The market risk associated with the use of derivatives will be covered and will be risk managed using the Value at Risk ("VaR") methodology in accordance with the Central Bank of Ireland's requirements. VaR is a statistical methodology that predicts using historical data and calculate the likely maximum daily loss of the Target Fund to a one-tailed 99% confidence level. However, there is a 1% statistical chance that the daily VaR number may be exceeded. The VaR approach uses a historical observation period and thus the VaR result may be biased if abnormal market conditions are not prevalent or are omitted from the historical observation period. Accordingly, the Target Fund could suffer significant financial losses in abnormal market conditions.

Relevant Information of the Allianz All China Equity

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz All China Equity
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Allianz Global Investors Asia Pacific
Fund Currency	USD
Fund Inception Date	5 December 2017

Investment Objective

The Target Fund aims at long-term capital growth by investing in onshore and offshore PRC, Hong Kong and Macau equity markets.

Investment Strategy & Approach

The Target Fund adopts an investment process that is based on fundamental, bottom-up stock selection to generate a portfolio of high-conviction ideas. Combination of stock selection overlaid with effective risk management, is the key driver of its risk and return. A minimum of 70% of Target Fund assets are invested in onshore and offshore PRC, Hong Kong and Macau equity markets. Target Fund assets may be invested in emerging markets. A maximum of 100% of Target Fund assets may be invested into the China A-Shares market either directly through Stock Connect or indirectly through eligible instruments. A maximum of 69% of Target Fund assets may be invested via RMB Qualified Foreign Institutional Investor (RQFII). The Target Fund applies the climate engagement strategy. A maximum 25% of Target Fund assets may be held directly in time deposits and/or (up to 20% of Target Fund assets) in deposits at sight and/or invested in money market instruments and/or (up to 10% of Target Fund assets) in money market funds for liquidity management. Maximum 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI").

The Target Fund may invest in securities, money market instruments, cash and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another regulated market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in UCITS and other UCIs. The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the absolute Value-at-Risk approach. The expected level of leverage of derivatives is 0-2. The expected level of leverage of derivatives of the Target Fund is expressed as a ratio between the aggregate of the notional values of all derivatives (excluding non-derivative investments) entered into by the Target Fund and the Net Asset Value of the Target Fund calculated based on the fair market value of all investments (including derivatives).

The actual level of leverage of the Target Fund might change over time and might temporarily exceed the expected level of leverage of derivatives of the Target Fund. Derivatives might be used for different purposes including hedging and/ or investment purposes. The calculation of the expected level of leverage does not distinguish between the different purposes of a derivative. Therefore, this figure delivers no indication regarding the true riskiness of the Target Fund.

Relevant Information of the Allianz Global Artificial Intelligence

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	Allianz Global Artificial Intelligence
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	Voya Investment Management Co. LLC
Fund Currency	USD
Fund Inception Date	31 March 2017
Investment Objective	The Target Fund aims at long-term capital growth by investing in the global equity markets with a focus on the evolution of artificial intelligence in accordance with the Sustainability Key Performance Indicator ("KPI") Strategy (Relative). In this context, the aim is to outperform the Target Fund's sustainability KPI compared to Target Fund's benchmark to achieve the investment objective.
Investment Strategy & Approach	The Target Fund is an actively managed, focused fund that invests across all sectors and the full market cap spectrum for Artificial Intelligence (AI) opportunities. Deep bottom-up, fundamental analysis is key to understanding the companies best positioned to drive forward advances in and benefit from AI. The Target Fund will invest in companies that currently benefit, or are expected to benefit, from the following themes: 1) Deployment of AI infrastructure and enabling technologies critical to the growth of AI, 2) Development of AI applications and software to make smarter insights and decisions,

3) Adoption of AI in key business processes to drive AI-enabled industries. A minimum of 70% of Target Fund assets are invested in the global equity markets with a focus on the evolution of artificial intelligence. Target Fund assets may be invested in emerging markets. A maximum 25% of Target Fund assets may be held directly in time deposits and/or (up to 20% of Target Fund assets) in deposits at sight and/or invested in money market instruments and/or (up to 10% of Target Fund assets) in money market funds for liquidity management. A maximum 10% of Target Fund assets may be invested in UCITS and/or Undertaking For Collective Investment ("UCI").

The Target Fund may invest in securities, money market instruments, deposits and cash equivalents, as well as securities that are offered within the scope of initial public offerings, the issuing terms of which include the obligation to apply for admission to official listing on a stock exchange or in another regulated market and the admission of which is obtained no later than one year after the issue. The Target Fund may also invest in UCITS and other UCIs. The Target Fund may use financial derivative instruments for efficient portfolio management (including hedging) purposes.

Risk Management

The manager of the Target Fund will calculate the global exposure of the Target Fund by using the Commitment Approach. The Commitment Approach measures the global exposure related solely to positions on financial derivative instruments which are converted into equivalent positions on the underlying assets.

Allianz Life Elite Income Fund (USD)

1. Investment Objective

The Allianz Life Elite Income Fund (USD) (the "Fund"), a United States Dollar (USD) denominated fund, aims to provide income accumulation through prudent investment management, with long-term capital appreciation as a secondary objective.

2. Investment Strategy & Approach

- The Fund is a feeder fund that aims to achieve its investment objective by investing into an underlying fund known as PIMCO GIS Income Fund (Accumulation) (the "Target Fund") which will utilise a global multi-sector strategy that seeks to combine the investment advisor's (Pacific Investment Management Company LLC) total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities. Top-down and bottom-up strategies are used to identify multiple sources of value to generate consistent returns. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities. The Target Fund is diversified broadly across regions, industries, issuers, and asset classes, as well as through a varied set of sources of value and employs independent research and prudent diversification with respect to industries and issuers in order to seek to achieve its investment objective.
- Please refer to point 7 for further details pertaining the Target Fund.

3. Asset Allocation

- The Fund feeds minimum 95% into the Target Fund.
- The Fund has maximum 5% in liquid assets

4. Fund Manager

Allianz Life Insurance Malaysia Berhad

5. Target Market

The Fund seeks to meet the needs of investors who are looking for a competitive and consistent level of income without compromising long-term capital appreciation and are looking for a diversified exposure to global fixed income markets and are willing to accept the risks and volatility associated with investing in such markets, including emerging markets and non investment grade securities, and who have an investment horizon over the medium to long term. The Fund may not be suitable for investors who wish to withdraw their capital from the Fund within a short or medium timeframe.

6. Principal Risks in Investing in the Fund

- Market Risk
- Interest Rate Risk
- Foreign Investment Risk
- Country and Region Fund Risk
- Currency Risk
- Sector Risk
- Company Specific Risk
- Credit and Default Risk
- Liquidity Risk
- Derivatives Risk
- Target Fund Risk
- Target Fund Subscription/Redemption Time Lapse Risk
- Temporary Suspension of Dealing in the Fund Risk

7. Information on the Target Fund

Relevant Information of the PIMCO GIS Income Fund (Accumulation)

The following relevant information provided by the Target Fund manager may be subject to change as and when the Target Fund manager deems it appropriate according to the Target Fund's mandate and objectives as approved by the relevant regulatory bodies.

Name	PIMCO GIS Income Fund (Accumulation)
Type	Undertaking for Collective Investment in Transferable Securities (UCITS)
Fund Manager	PIMCO Global Advisors (Ireland) Limited
Fund Currency	USD
Fund Inception Date	30 November 2012
Investment Objective	The primary investment objective of the Target Fund is to seek high current income, consistent with prudent investment management. Long-term capital appreciation is a secondary objective.
Investment Strategy & Approach	The Target Fund will utilise a global multi-sector strategy that seeks to combine the investment advisor's total return investment process and philosophy with income maximisation. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities.

Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities.

The Target Fund will generally allocate its assets among several investment sectors, which may include (i) high yield and investment grade corporate bonds of issuers located in the European Union ("EU") and in non-EU countries, including emerging market countries; (ii) global bonds and fixed income securities issued by EU and non-EU governments, their agencies and instrumentalities; (iii) mortgage-related and other asset-backed securities which may or may not be leveraged; and (iv) foreign currency positions, including currencies of emerging market countries. Exposure to such securities may be achieved through direct investment in the aforementioned security types or through the use of financial derivative instruments. Such derivative instruments may be used (i) for hedging purposes and/or (ii) for investment purposes and/or (iii) efficient portfolio management.

The Target Fund may invest in both investment grade securities and high yield securities, subject to a maximum of 50% of its total assets in securities rated below Baa3 by Moody's, or equivalently rated by S&P or Fitch, or if unrated, determined by the Investment Advisor to be of comparable quality (this does not apply to the Target Fund's investments in mortgage-related and other asset-backed securities). The Target Fund may invest up to 20% of its total assets in fixed income instruments that are economically tied to emerging market countries. No more than 25% of the Target Fund's net assets may be invested in securities that are convertible into equity securities. No more than 10% of the Target Fund's total assets may be invested in equity securities. The Target Fund is subject to an aggregate limit of one third of its total assets on combined investments in (i) securities that are convertible into equity securities, (ii) equity securities, (iii) certificates of deposit, and (iv) bankers' acceptances.

The Target Fund Manager is authorised as a UCITS pursuant to the regulations.

Investments of a UCITS are confined to transferable securities (shares, debt securities, other negotiable securities) and money market instruments which are either admitted to official listing on a stock exchange in a member state or non-member state, or which are dealt with on a market which is regulated, operates regularly, is recognised and open to the public in a member state or non-member state. The Target Fund may also invest in recently issued transferable securities which will be admitted to official listing on a stock exchange or other market within a year, money market instruments other than those dealt with on a regulated market, units of UCITS, units of alternative investment funds, deposits with credit institutions, and financial derivative instruments, subject to the guidelines laid out in the GIS Prospectus.

Risk Management

The market risk associated with the use of derivatives will be covered and will be risk managed using the Value at Risk ("VaR") methodology in accordance with the Central Bank of Ireland's requirements. VaR is a statistical methodology that predicts using historical data and calculate the likely maximum daily loss of the Target Fund to a one-tailed 99% confidence level. However, there is a 1% statistical chance that the daily VaR number may be exceeded. The VaR approach uses a historical observation period and thus the VaR result may be biased if abnormal market conditions are not prevalent or are omitted from the historical observation period. Accordingly, the Target Fund could suffer significant financial losses in abnormal market conditions.

Notes

- The Policy Owner should be aware that reference to past experience is appropriate but the actual experience could be different.
- Investment risks under the Policy will be borne solely by the Policy Owner.
- The nature of risk changes according to the investment horizon. Equities are risky when the investment is short. However, fixed income securities / money market instruments will be risky when the investment horizon lengthens due to the erosion effect as a result of inflation.
- The Company reserves the right to suspend issuance or redemption of Units under exceptional circumstances such as temporary closure of any stock exchange in which the Fund is invested, during any period when assets in a Fund cannot be valued or other circumstances when the Company, in its discretion, may consider exceptional.
- Fund Charges:

Types of Fund	Fund Management Charge

* The Fund Management Charge as set out above includes fund management fee of the Target Fund. With regard to the fund charges, there will be no additional fee that is charged to you other than the Fund Management Charge above.

The charges stated above are the maximum charges that we can impose. The actual Fund Management Charge will vary according to the actual asset mix of the Fund if the Fund is invested in more than one investment instrument. The Fund Management Charge will be reviewed by us no less frequently than on a quarterly basis. The Company reserves the right to vary the maximum Fund Management Charge by giving the Policy Owner at least three (3) months' prior written notice.

- Although the Funds may invest in Shariah-compliant assets, Allianz Life's insurance plan is not a Shariah-compliant product.
- Other charges include but not limited to government tax, auditor fee, custodian fee and transaction charge.
- The price per Unit of the Fund is the total market value of assets in the Fund divided by the total number of Units of the Fund. To ensure fair treatment to all Unit holders, transaction costs of acquiring and disposing of assets of the Fund are recouped by making a dilution or transaction cost adjustment to the Net Asset Value ("NAV") per Unit of the Fund.
- The price per Unit of the Fund is calculated on a daily basis.

Investment Alert

- Investments in the Funds are not obligations of deposits or guaranteed by the Company.
- The performance of the Funds is not guaranteed and the value of the Units and the income derived therefrom may increase or decrease.
- Past returns and any forecast are not necessarily a guide to future performance.
- The Company does not warrant or make any representations that the Funds will guarantee profits or not result in losses.
- Before deciding to invest in the Funds, Policy Owner should carefully consider their investment objectives, level of experience and risk appetite.
- Policy Owner should be aware of all the risks associated with fluctuations in an investment-linked fund and are advised to seek the advice of a financial advisor/consultant before making any investment. In the event that the Policy Owner chooses not to seek advice from a financial advisor before investing in the Fund, he should consider whether the Fund is suitable for him.
- The Company disclaims any and all liabilities against loss, damages etc direct, indirect or consequential as a result of the Policy Owner's reliance of the Fund Fact Sheet.

Allianz Life Amanah Dana Ikhlas	: 50% FTSE Bursa Malaysia EMAS Shariah Index + 50% 12-months General Investment Account Rate
Allianz Life ASEAN Plus Fund	: 50% FTSE Bursa Malaysia Top 100 Index + 50% FTSE ASEAN 40 Index

- The performance is calculated in Ringgit Malaysia or United States Dollar (for USD denominated Funds) on a NAV-to-NAV basis. It is strictly the performance of the investment fund and not the returns earned on the actual premiums paid for the investment-linked product.
- The basis of calculation of past performance is as follows:

$$R_{20xx} = \frac{(UP_{31 \text{ December } 20xx} - UP_{31 \text{ December } 20xx-1}) \times 100\%}{UP_{31 \text{ December } 20xx-1}}$$

Where:

- R_{20xx} is the rate of return
- $UP_{31 \text{ December } 20xx}$ is the price per Unit as at 31 December 20xx
- $UP_{31 \text{ December } 20xx-1}$ is the price per Unit as at 31 December 20xx-1
- Brief description of the types of risk referred to in this Fund Fact Sheet are:

On top of regulatory limits imposed by Bank Negara Malaysia, the Company have put in place tight internal investment limits for all asset classes to ensure that the Fund does not take on excessive risk, while recognising there cannot be total elimination of risks associated with investing in the Fund. The following is a non-exhaustive list of key risk factors when investing into the Fund.

Market Risk – The value of the Fund's investment assets may be affected by changes in economic fundamentals, interest rate movement, regulatory policy, political and industrial developments. These market factors may result in fluctuations in the value of the Fund's investment assets. This risk may be mitigated by ensuring regular and rigorous reviews of macroeconomic factors and asset allocation strategy.

Interest Rate Risk – Interest rate risk arises when the value of the debt instrument fluctuates due to interest rate movement. When interest rate rises, the debt instrument prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rate falls. Debt instruments with longer maturities and lower coupon rates are more sensitive to interest rate changes. This risk may be mitigated by regular and rigorous reviews of asset allocation and duration strategy.

Foreign Investment Risk – This risk refers to the risks of investing in foreign markets. The value of the foreign investment assets directly or indirectly held by the Fund may be affected by country-specific factors, such as the country's economic fundamentals, social and political stability and regulatory policy. For example, an investment in foreign markets may be impacted by the rules and restrictions of the respective foreign market including investment restrictions, limitations on foreign ownership or holdings, which may have an adverse impact on its performance and/or its liquidity. Investments in foreign markets are also exposed to foreign exchange rate risk and there can be no assurance that the exchange rates will not fluctuate widely. Any restrictions on repatriation of the invested capital and net profits may impact on the Fund's ability to meet redemption requests from the Policy Owner. In extreme circumstances, the Fund may incur significant loss due to limited investment capabilities or may not be able to fully implement or pursue its investment objectives or strategies, due to investment restrictions, illiquidity of the foreign market, and delay or disruption in execution of trades or in settlement of trades. This risk may be mitigated by ensuring regular and rigorous reviews of macroeconomic, socio – politic and regulatory factors as well as adopting an appropriate investment strategy.

Country and Region Fund Risk – Country and region Funds have a limited investment universe which results in limited risk diversification compared to broadly invested funds. The smaller the respective country or region is the more limited the investment universe and the more limited the risk diversification might be. This risk may be mitigated by ensuring regular and rigorous reviews of macroeconomic, socio – politic and regulatory factors as well as adopting an appropriate investment strategy.

Currency Risk – For foreign investments, fluctuations in currency exchange rates may have an impact on the value of the Fund's investment assets. This risk may be managed by engaging in foreign currency hedging.

Theme Fund Risk – Sector and theme funds have a limited investment universe which results in limited risk diversification compared to broadly invested funds. The more specific the respective sector and/or theme is, the more limited the investment universe and the more limited the risk diversification might be. A limited risk diversification can increase the impact of the development of individual securities acquired for the respective Fund. This risk may be mitigated by ensuring regular and rigorous reviews of themes as well as adopting an appropriate investment strategy.

Sector Risk – The value of the Fund's investment assets may be adversely affected by the changes in sector-specific factors, such as the business condition, industry outlook and demand/supply dynamic of the industry. This risk may be managed through portfolio diversification and control on sector concentration risk.

Company Specific Risk – The asset values of securities may be affected by company-specific factors, some of which include volatile business situations, adverse financial conditions and poor corporate governance. This risk may be contained through appropriate portfolio diversification, prudent investment selection and better control on investment concentration risks.

Credit and Default Risk – This relates to the creditworthiness of the issuers of the debt and money market instruments as well as their abilities to make timely payments of interest and principal. Any adverse situations faced by the issuer may impact the value of the Fund as well as the liquidity of the debt instrument or money market instrument. This risk is managed through appropriate portfolio diversification, stringent credit selection and control on sector as well as credit concentration risks.

Liquidity Risk – If an asset has insufficient liquidity, there is the risk that the asset cannot be sold or can only be sold at a significant discount to the purchase price. Appropriate portfolio diversification, control on investment concentration limits taking into account liquidity constraints and regular monitoring could help mitigate the said risk.

Derivatives Risk – The use of certain derivatives which may include leverage could result in the Fund and/or Target Fund having a more volatile or magnified exposure to the underlying assets and an increased exposure to counterparty risk. Other risks include the derivatives may be misvalued or having varying valuations, the derivatives not perfectly hedging the underlying risk intended to be hedged and the derivatives being difficult to sell or unwind, where the Fund and/or Target Fund may not be able to liquidate a position at an appropriate time or price. This risk can be mitigated by using the Commitment Approach, absolute Value-at-Risk approach, or other approaches.

Dividend Policy Risk – This risk may occur when there is a significant deterioration in a company's business or if there is a change in management policy resulting in a reduction or removal of the company's dividend policy. Such risk is particularly relevant to a fund that focuses largely on dividend yielding stocks. This risk can be mitigated by investing mainly in companies with consistent historical record of paying dividends, companies operating in fairly stable industries or companies with strong cash flows.

Risk of Non-Compliance with Shariah Requirements - For Shariah-approved funds, there is the risk that the Fund may hold securities which are Shariah non-compliant due to:

- 1) "Shariah-compliant securities" which are subsequently considered "Shariah non-compliant"; or
- 2) Investment in Shariah non-compliant securities.

This risk may be mitigated by pre – trade Shariah Compliant checks conducted whenever the Fund invests into securities, regular monitoring of our portfolio's investments to identify if any investments may be in danger of losing their Shariah compliant status, and regular reviews of the Fund's compliance with the list of securities approved by the Shariah Advisory Council of the Securities Commission.

Target Fund Risk - As the Fund is a feeder fund, it will invest into a Target Fund which is being managed by a Target Fund manager. While we would make every effort to ensure that the objectives of the Target Fund are appropriately aligned with those of ours, we do not have control over the Target Fund manager's investment in terms of its approach, intelligence, operations and management. In the unlikely event of any mishandling of the Target Fund, the NAV of our Fund, which is investing predominantly into the Target Fund, could be similarly adversely affected. This risk may be mitigated by our constant monitoring of the Target Fund, which is requisite to ensuring that the Target Fund's objective, risk profile and characteristics are in line with ours. Please also refer to the Target Fund's prospectus for more detailed and comprehensive information on Target Fund specific risks.

Target Fund Subscription/Redemption Time Lapse Risk - Due to the inherent unitisation and Target Fund subscription/redemption processing times, there could be a time lapse between the time monies are received by the Fund and the times the monies are subsequently invested into the Target Fund, vice versa for redemption. The risk of unnecessary subscription/redemption time lapse may be minimised by our best efforts in optimising the process while adhering strictly to the stipulated asset allocation.

Exceptional circumstances:

Temporary Suspension of Dealing in the Fund Risk – The Fund may be at risk of having a temporary suspension of the calculation of NAV of the Fund and resulting suspension of dealing in the Fund upon occurrence of any of the following:

1. during any period (with the exception of regular bank holidays) in which any of the principal stock exchanges or other markets on which a substantial portion of the assets of the Fund and/or Target Fund is listed or dealt in is closed, or during any period in which trade on such an exchange or market is restricted or suspended, provided that such closure, restriction or suspension affects the valuation of the assets of the Fund and/or Target Fund listed on such exchange or market; or
2. during any period in which, in the view of the Fund manager and/or Target Fund manager, there is an emergency, the result of which is that the sale or valuation of assets of the Fund and/or Target Fund cannot, for all practical purposes, be carried out; or
3. at times when there is a breakdown in the means of communication or calculation normally used on an exchange or other market to determine the price or the value of investments of the Fund and/or Target Fund or to determine the current price or value of investments of the Fund and/or Target Fund; or
4. if, for any other reason, the prices for assets of the Fund and/or Target Fund cannot be determined rapidly or precisely; or
5. during any period in which it is not possible for the Fund and/or Target Fund to repatriate the necessary funds for the redemption of shares, or in which the transfer of funds from the sale or for the acquisition of investments or for payments resulting from redemptions of shares cannot be carried out, in the view of the Fund manager and/or Target Fund manager, at normal exchange rates; or
6. from the time of the announcement of a call by investors for an extraordinary meeting of shareholders for the purpose of liquidating the Target Fund or for the purpose of carrying out a merger of the Target Fund or for the purpose of informing investors of the decision by the Target Fund manager to liquidate Target Fund or for the purpose of merging Target Fund; or
7. during any period in which the valuation of the currency hedges of the Fund and/or Target Fund whose respective investment objectives and policies make hedging of currencies at the Fund and/or Target Fund level desirable cannot be adequately carried out or cannot be carried out at all.

Appropriate notice of any such suspension as considered necessary will be published by the Fund manager and/or Target Fund manager. The Fund manager may notify Policy Owner applying to deal in Units of the Fund for which the calculation of NAV of the Fund and/or Target Fund has been suspended.
